They joined the Russians in 1654, and in the great war against France (1813-15) formed a valuable portion of the Russian army.

COSTERMONGERS, itinerant dealers in fruit, vegetables, fish, &c., deriving their name, it is said, from *costard*, a favourite apple. The London costermongers are useful in relieving the markets when glutted; and it was said in 1860, that 3,000,000*l.* passed through their hands annually. Previous to fasting and thanksgiving days, they sell the appointed forms of prayers in great numbers. On 22 Nov. 1860, they held a meeting in order to represent to the city authorities the hardships they felt by the police restricting their means of livelihood; and the Metropolitan Streets Act was modified, 7 Dec. 1867.

Their moral and physical condition has been much improved of late years, greatly through the instrumentality of the earl of Shaftesbury, who constituted himself a costermonger, and owned a barrow in 1874.

COTTAGE. The term was originally applied to a small house without land, 4 Edw. I. 1275. "No man may build a cottage, except in towns, unless he lay four acres of land thereto," &c., 31 Eliz. 1589. This statute was repealed, 15 Geo. III. 1775. By returns to the tax office, in 1786, the number of cottages was 284,459. The number in 1800 was 428,214; the number in 1840 was about 770,000. In 1860 the public attention was much drawn to the deplorable state of cottages in many parts of the country, and the law of settlement was altered in 1865. Mr. Disraeli (afterwards lord Beaconsfield) said that "every cottage should have a tank, an oven, and a porch."

COTTON, a vegetable wool, the produce of the *Gossypium*, a shrub indigenous to the tropical regions of India and America. Indian cotton cloth is mentioned by Herodotus, was known in Arabia in the time of Mahomet, 627, and was brought into Europe by his followers. It does not appear to have been in use among the Chinese till the 13th century; to them we are indebted for the cotton fabric termed nankeen. Cotton was the material of the principal articles of clothing among the Americans when visited by Columbus. It was grown and manufactured in Spain in the 10th century; and in the 14th century was introduced into Italy. Indian muslins, chintzes, and cottons were so largely imported into England in the 17th century, that in 1700 an act of parliament was passed, prohibiting their introduction. Cotton became the staple commodity of England in the present century. About 1841 the "cotton" or "Manchester" interest began to obtain political influence, which led to the repeal of the corn laws in 1846. Failure of Mr. Morris Ranger, a great cotton speculator, and others at Liverpool announced 31 Oct. 1883. Cotton manufacture introduced into Bombay about 1868 gradually becomes very successful, reported Dec. 1889. See *Calico*, *Muslin*, *Corner*, *Strikes*.

The fly-shuttle was invented by John Kay, of Bury, 1738; the drop-box by Robert Kay, 1760; spinning by rollers (also attributed to John Wyatt) patented by Louis Paul, 1738; the spinning-jenny, by Hargreaves, 1767; the water-frame, by Arkwright, 1769; the power-loom, by Rev. Dr. Edmund Cartwright, 1785; the dressing machine, by Johnson and Radcliffe, 1802-4; another power-loom, by Horrocks, 1803-13. A combing machine was patented by Joshua Heilmann, in 1845.

British muslin (totally superseding that of India) is due mainly to the invention of the MULE (*which see*) by Samuel Crompton, 1774-9; and to the self-acting mule of Mr. Roberts, 1825.

Calico Printing commenced 1764.

The *Steam-Engine* first applied to the cotton manufacture (by Boulton and Watt), 1785.

Bleaching by means of chloride of lime introduced by Mr. Tennant, of Glasgow, 1798.

Stockings. The stocking-frame was invented by William Lee, in 1589. *Cotton stockings* were first made by hand about 1730; Jedediah Strutt obtained a patent for Derby ribbed stockings in 1759; and Horton patented his knotter frame in 1776; Crompton's mule was employed in making thread for the stocking manufacture about 1770.

Cotton-Lace—Bobbin-net. The stocking-frame of Lee was applied to lace-making by Hammond, about 1768; the process perfected by John Heathcoat, 1809.

American Cotton. Previous to 1795, our cotton fibre came from the East and West Indies, the Levant, and

a little from the United States. About 1786, the growth of cotton began in Georgia. In 1793, Eli Whitney, an American, invented the *saw-gin*, a machine by which cotton wool is separated from the pod and cleaned with great ease and expedition.* This led to such increased cultivation that the United States soon exported 1,500,000 lb. of cotton :—

COTTON FAMINE.

The supply of cotton from North America nearly ceased, in consequence of the secession of the southern states from the union in 1860-61. In 1852, Mr. T. Bazley warned the country on the danger of trusting to this source. In May, 1862, he stated that through its failure the loss of the labouring classes was 12,000,000*l.* sterling a year, and estimated the loss, including the employing classes, at nearly 40,000,000*l.* a year.

At a meeting of noblemen and gentlemen, connected with the cotton manufacturing districts, at Bridgewater-house, St. James's, on 19 July, 1862, the earl of Derby in the chair, 10,000*l.* were subscribed to the *Cotton District Relief Fund.* The viceroy of Egypt, in London at the time, gave 1000*l.*, and the queen gave 2000*l.* on 24 July. Liberal subscriptions flowed in from all parts. On 28 Aug., the lord mayor had received 41,902*l.*

In the Lancashire district (population about 4,000,000) there were receiving parish relief, Sept. 1861, 43,500 persons ; in Sept. 1862, 163,498. *Earl of Derby*, 2 Dec. 1862.

In July, 1863, about the value of 700,000*l.* remained of the donations which had been received in money and goods, amounting to about 1,900,000*l.*

On 9 Feb., 1863, the "George Griswold" arrived, containing contributions of provisions, &c., from North America, for the relief of the sufferers in Lancashire.

The Union Relief Act (passed Aug. 1862, and continued in 1863) gave much relief by enabling overseers to borrow money to be expended in public works to be executed by the unemployed workmen.

In Oct. 1864, much distress still existed, and fears were entertained for the approaching winter—90,000 more paupers than ordinary in cotton districts. *Times*, 18 Jan. 1865.

In June, 1865, Mr. Farnall, the special commissioner, (appointed in May, 1862) was recalled by the poor-law board and the famine was declared to be ended. 1,000,000*l.* had been expended in two years. The executive of the Central Relief Fund held their last meeting, 4 Dec. 1865.

"The Coal Question," by Wm. Stanley Jevons, published 1865.

The account of the fund was made up in 1873. The balance, above 130,000*l.*, was proposed to be appropriated to the foundation of a convalescent hospital for Lancashire.

COTTON FACTORIES regulated by acts of parliament passed in 1825, 1831, 1833, 1844, and 1889. The hours of labour were limited, and the employment of children under nine years of age prohibited. In 1846, 1724 cotton mills employed 197,500 persons. In 1862, the persons employed were stated to be 451,000 ; 315,000 in Lancashire. Excitement through 5 per cent. reduction of wages in Lancashire, &c., Sept. 1883 ; strike ; dispute settled, 27 Sept. 1883. COUNCILS. King Alfred, in about 886, is said to have so arranged the business of the nation, that all resolutions passed through three councils. The first was a select council which considered all affairs to be laid before the second council, bishops and nobles appointed by the king, like the present privy council. The third was a general assembly of the nation, called, in Saxon, Wittenagemót, in which quality and offices gave a right to sit. In these three councils we behold the origin of the cabinet, privy councils, and parliaments; see *Cabinet*, *Common* and *Privy Councils*, &c.

COUNCILS, FRENCH. The Council of ANCIENTS, consisting of 250 members, together with the council of FIVE HUNDRED, instituted at Paris, 1 Nov. 1795: the executive was a Directory of FIVE. Bonaparte dispersed the council of Five hundred at St. Cloud, 9 Nov. 1799, declaring himself, Roger Ducos, and Siéyès, consuls *provisoires*; see *France*.

COUNTIES or SHIRES. The division of this kingdom into counties began, it is said, with king Alfred; but some counties bore their present names above a century before. The division of Ireland into counties took place in 1562. Lord-lieutenants were appointed in 1549 in England, and in 1831 in Ireland. Counties first sent members to parliament, before which period knights met in their own counties, 1285. CHANDOS CLAUSE, Sect. 20 of the Reform act, 2 Will. IV. c. 45 (1832), inserted by the motion of the marquis of Chandos. By it occupiers as tenants of land not situate in a borough, paying an annual rent of 50*l.*, became entitled to a vote for the knight of the shire. It increased the number of tory voters, and in consequence several attempts were made to repeal it. It was superseded by the Reform act of 15 Aug. 1867.

By the Winter Assizes Act, 1876, certain counties were united (by order in council, first time, 23 Oct. 1876) to facilitate more speedy trials of prisoners.

Its most distinguished statesman was sir Thomas Hanmer (the *Montalto* of Pope's Satires), who died in 1746. *Ashe*.

COURT OF HONOUR. In England the court of chivalry, of which the lord high constable

was a judge, was called *Curia Militaris*, in the time of Henry IV., and subsequently the Court of Honour. In Bavaria, to prevent duelling, a court of honour was instituted in April, 1819. Mr. Joseph Hamilton for many years ardently laboured to establish a similar institution in Britain.

COURT OF SESSION, the highest civil tribunal in Scotland, was instituted by James V. by statute, 17 May, 1532, its origin being ascribed to the regent, duke of Albany. It consisted of 14 judges and a president, and replaced a committee of parliament. In 1830 the number of judges was reduced; and the court now consists of the lord president (termed lord justice general), the lord justice-clerk, and 11 ordinary judges. In 1867 the necessity of renovating this court was asserted by high legal authority; and an act to amend its procedure was passed 31 July, 1868. The lord president, the right hon. John Inglis, appointed, Feb. 1867; died 20 Aug., succeeded by James P. B. Robertson, Sept. 1891.

COURT THEATRE, Sloane-square, Chelsea, opened 25 Jan. 1871; Miss Litton first manager.

COURTRAI (Belgium). Here Robert, count of Artois, who had defeated the Flemings in 1297, was defeated and slain by them, 11 July, 1302. The conflict was named the "Battle of Spurs," from the number of gilt spurs collected.

COURTS MARTIAL are regulated by the Mutiny act, first passed in 1690. The powers of these courts were much discussed in 1867, in consequence of the measures used to suppress the negro insurrection in Jamaica, Oct. 1866. See *Army*, 1 Jan. 1887, 1893.

COURTS OF JUSTICE were instituted at Athens, 1507 B.C. (see *Areiopagus*); by Moses, 1491 B.C. (*Exod.* xviii. 25), and in Rome. For these realms, see *Chancery*, *Common Pleas*, *Exchequer*, *King's Bench*, &c. The citizens of London were privileged to plead their own cause in the courts of judicature, without employing lawyers, except in pleas of the crown, 41 Hen. III. 1257. *Stow*. The rights of the Irish courts were established by the British parliament in April, 1783. See *Supreme Court*.

COUTRAS (S. W. France). Here Henry of Navarre totally defeated the duc de Joyeuse and the royalists, 20 Oct. 1587.

COVENANTERS, those persons who in the reign of Charles I. having signed the solemn league and *covenant*, engaged to stand by each other in opposition to the projects of the king in 1638. The COVENANT or league between England and Scotland (the preceding one modified), solemnly adopted by the parliament, 25 Sept. 1643; was accepted by Charles II. 16 Aug. 1650, but repudiated by him on his restoration in 1661, when it was declared to be illegal by parliament, and copies of it ordered to be burnt. See *Cameronians* and *Bothwell Bridge*.

The covenant consisted of six articles:

1. The preservation of the reformed church in Scotland and the reformation of religion in England and Ireland.
2. The extirpation of popery, prelacy, schism, &c.
3. The preservation of the liberties of parliament and the king's person and authority.
4. The discovery and punishment of all malignants, &c.
5. The preservation of "a blessed peace between these kingdoms;"
6. The assisting all who enter into the covenant:

"*This will we do as in the sight of God.*"

COVENT GARDEN (London), corrupted from "Convent Garden," having been the garden of St. Peter's convent. The square was built about 1633, and the piazza on the north side and the church were designed by Inigo Jones. The fruit and vegetable markets were rebuilt in 1829-30, from designs by Mr. Fowler (the ground belonging to the duke of Bedford).

COVENT GARDEN THEATRE sprang out of one in Lincoln's-inn-fields, through a patent granted 14 Chas. II. 1662, to sir William Davenant, whose company was denominated the "duke's servants," as a compliment to the duke of York, afterwards James II.; see under *Theatres*.—The theatre was burnt down 5 March, 1856, during a *bal masqué* held by Mr. Anderson, the wizard of the north. The present theatre by E. Barry was opened 15 May, 1858. The *Floral Hall* adjoining it was opened 7 March, 1860, with the volunteers' ball.

COVENTRY ACT passed, to prevent malicious maiming and wounding, 6 March, 1671, in consequence of sir John Coventry, K.B., M.P., being maimed in the streets of London, by sir Thomas Sandys and others, adherents of the duke of Monmouth, 21 Dec. 1670. Repealed 1828.

COVENTRY (Warwickshire). Leofric, earl of Mercia, lord of Coventry, is said to have relieved it from heavy taxes, at the intercession of his wife Godiva, on condition of her riding naked through the streets, about 1057. Processions in her memory took place in 1851; 23 June, 1862; 4 June, 1866; 20 June, 1870; 4 June, 1877; 6 Aug. 1883; and 2 Aug. 1892. The legend is probably fabulous. A parliament was held here in the reign of Henry IV. called *parliamentum indoctum*, or the unlearned parliament, because lawyers were excluded, 1404; and in the reign of Henry VI. another met, called *parliamentum diabolicum*, from the acts of attainder passed against the duke of York and others, 20 Nov. 1459. The town was surrounded with strong walls, three miles in circumference, and twenty-six towers, which were demolished by order of Charles II. in 1662. The ribbon-makers here suffered much from want of work in the winter of 1810-6. An industrial exhibition here was opened by earl Granville, 19 June; closed by the earl of Clarendon, 21 Oct. 1867. The prince and princess of Wales were warmly received 7 Nov. 1874. The BISHOPRIC was founded by Oswy, king of Mercia, 656, and had the double name of Coventry and Lichfield, which was reversed by later bishops. It was so wealthy, that king Offa, by the favour of pope Adrian, made it archiepiscopal; but this title was laid aside on the death of that king. In 1075 the see was removed to Chester; in 1102 to Coventry; and afterwards to its original foundation, Lichfield,

but with great opposition from the monks of Coventry. Coventry merged into the bishopric of Lichfield (*which see*). Population, 1881, 44,831; 1891, 52,720.

CRACOW, a city in Austrian Poland. The Poles elected Cracus for their duke, who built Cracow with the spoils taken from the Franks about 700. It was their capital, 1320-1609. Cracow was taken by Charles XII. in 1702, and taken and retaken several times by the Russians and other confederates. The sovereign was crowned at Cracow until 1764. The Russians, who had taken it 1768, were expelled by Kosciusko, 24 March, 1794; but it surrendered to the Prussians, 15 June same year, and in 1795 was awarded to Austria. Cracow was formed into a republic, June, 1815. Occupied by 10,000 Russians, who followed here the defeated Poles, Sept. 1831. Its independence was extinguished: and it was seized by the emperor of Austria, and incorporated with his empire, 16 Nov. 1846, which was protested against by England, France, Sweden, and Turkey; see *Poland*. A dreadful fire laid the greater part of the city in ashes, 18 July, 1850. The discovery on 22 July, 1869, of Barbare Abryk, a nun, secluded for 21 years in a convent cell, led to violent rioting. Population, 1890, 76,025.

CRANES are of very early date, for the engines of Archimedes may be so called. In 1857 a crane had been erected at Glasgow capable of lifting 50 tons. One in Woolwich arsenal in 1881 lifted 400 tons. See *Derricks*.

CRANIOLOGY (or PHRENOLOGY), the study of the external form of the human skull, as indicative of mental powers and moral qualities. Dr. Gall, the propounder, was a German physician, born March, 1758, and his first observations were among his schoolfellows. Afterwards he studied the heads of criminals and others, and eventually reduced his ideas to a system, marking out the skull like a map. His first lecture was given at Vienna in 1796; but in 1802 the Austrian government prohibited his teaching. In 1800 he was joined by Dr. Spurzheim; and in 1810-12 they published at Paris their work on the "Anatomy and Physiology of the Nervous System, and of the Brain in particular." Gall died in 1828. The researches of Gall and Spurzheim led to increased study of the brain. Combe's "Phrenology," first published in 1819, is the popular English work on this subject. Phrenological societies were formed early in London and Edinburgh.

Phrenology was refuted by Lord Jeffrey in the *Edinburgh Review*, in 1826, and more recently by Dr. W. B. Carpenter. Professor David Ferrier reported the results of researches tending to prove localisation of certain faculties in the brain to the British Association, Sept. 1873. He published his work "The Functions of the Brain," 1876; 2nd edition 1887.
'Brain," a quarterly journal, began in 1878.

CRANNON or CRANON, Thessaly, N. Greece. Near here the Macedonians under Antipater and Craterus defeated the confederated Greeks, twice by sea, and once by land, 322 B.C. The Athenians demanded peace, and Antipater put their orators to death, among whom was Hyperides, who, that he might not betray the secrets of his country when under torture, cut out his tongue, and Demosthenes is said to have taken poison shortly after.

France), where Edward III. and his son, Edward the Black Prince, and an army of about 36,800, obtained a great victory over Philip, king of France, with about 130,000, 26 Aug. 1346. John, king of Bohemia (nearly blind); James, king of Majorca; Ralph, duke of Lorraine (sovereign princes); and a number of French nobles, together with 30,000 private men, were slain, while the loss of the English was very small. The crest of the king of Bohemia (three ostrich feathers, with the motto *Ich dien*—in English, "I serve") has since been adopted by princes of Wales.

CRÉDIT FONCIER, &c. A plan of providing loans to landowners was introduced by Frederick the Great of Prussia, in 1763, in some of the Prussian provinces, as the best method of alleviating the distresses of the landed interest caused by his wars. The system consists of lending money to landowners on the security of their estates, and pro-

From 1848 to 1865 there had been no commitment viding the loan capital by the issue of debentures charged upon the aggregate mortgaged estates. There are two modes of carrying out this scheme: (1) by means of an association of landowners; (2) by means of a proprietary public company. The former obtains in Eastern Prussia, but the latter is exclusively found in Western Europe.

Crédit Foncier companies have been founded in Hamburg (1782), Western Prussia (1787), Belgium (1841), France (1852), England (1863). Similar companies were formed in all the states of Europe, in India, and in our colonies and dependencies. *A. G. Henriques.* See *France*, May, 1890.

CRÉDIT MOBILIER: a joint-stock company with this name was established at Paris by Isaac and Emile Péreire, and others, 18 Nov. 1852.

It took up or originated trading enterprises of all kinds, applying to them the principle of *commandite*, or limited liabilities; and was authorised to supersede or buy in any other companies (replacing their shares or bonds with its own scrip), and also to carry on the ordinary business of banking. The funds were to be obtained by a paid-up capital of 2⅔ millions sterling, the issue of obligations at not less than 45 days' date or sight, and the receipt of money on deposit or current account. The society apparently prospered; but was considered by experienced persons a near approach to Law's bank of 1716.

CRESPY (N. France). Here was signed a treaty between Charles V. of Germany and Francis I. of France, 18 Sept. 1544. The former renounced Burgundy, and the latter Italy.

CRESTS are ascribed to the Carians. Richard I. (1189) had a crest on the helmet resembling a plume of feathers. The English kings had generally crowns above their helmets; that of Richard II. 1377, was surmounted by a lion on a cap of dignity; see *Crecy*. CRIME. About 1856 it was computed that a fifteenth part of the population of the United Kingdom lived by crime. The increase in education and manufactures is gradually reducing this proportion.

for political offences, such as treason or sedition. The returns of thirty-two years showed that crime absolutely and relatively diminished (Sept. 1866). "Judicial Statistics" for England and Wales, with abundant details, published by the government annually, began with the year 1856; the new series (in two parts, civil and criminal, published separately) began in 1893; comparative tables, 1857-96. CRIMEA, or CRIM TARTARY, a peninsula in the Euxine or Black Sea, the ancient *Taurica Chersonesus*, colonised by the Greeks about 550 B.C. The Milesians founded the kingdom of Bosporus, now Kertch, which about 108 B.C. formed part of the dominion of Mithridates, king of Pontus, whose descendants continued to rule the country under Roman protection till the irruption of the Goths, Huns, &c. about A.D. 258. About 1237 it fell into the hands of the Mongols under Genghis Khan; soon after the Venetians established commercial stations, with a lucrative trade, but were supplanted by the Genoese, who were permitted to rebuild and fortify Kaffa, about 1261. In 1475 Mahomet II. expelled the Genoese, and subjected the peninsula to the Ottoman yoke; permitting the government to remain in the hands of the native khans, but closing the Black Sea to Western Europe. In 1774, by the intervention of the empress Catherine II., the Crimea recovered its independence: but on the abdication of the khan in 1783, the Russians took possession of the country, after a war with Turkey, and retained it by the treaty of Jassy, 9 Jan. 1792. The Crimea (now Taurida), was divided into eight governments in 1802. War having been declared against Russia by England and France, 28 March, 1854, large masses of troops were sent to the East, which, after remaining some time at Gallipoli, and other places, sailed for Varna, where they disembarked 29 May. An expedition against the Crimea having been determined on, the allied British, French, and Turkish forces, amounting to 58,000 men (25,000 British), commanded by lord Raglan and marshal St. Arnaud, sailed from Varna, 3 Sept. and landed on the 14th, 15th, and 16th, without opposition, at Old Fort, near Eupatoria, about 30 miles from Sebastopol. On the 20th they attacked the Russians, between 40,000 and 50,000 strong (under prince Menschikoff), entrenched on the heights of Alma, supposed to be unassailable. After a sharp contest the Russians were totally routed. See *Alma* and *Russo-Turkish War*. Peace was proclaimed in April, 1856, and the allies quitted the Crimea 12 July following.

CRIMINAL LAW PROCEDURE (IRELAND) ACT, (see *Ireland*) 50 & 51 Vict. c. 20, passed 19 July, 1887, provides for summary jurisdiction by magistrates, special juries, change of place of trial, proclamation of districts, prohibition of dangerous associations, and continuance of 44 & 45 Vict. c. 5, and 49 & 50 Vict. c. 24.

Act for Scotland passed 16 Sept. 1887 to simplify and amend the Criminal Law of Scotland.

CRIMINAL LAWS OF ENGLAND. Their great severity, pointed out by sir Samuel Romilly, sir James Mackintosh, and others, about 1818, was considerably mitigated by sir R. Peel's acts, passed 1826-8. The criminal law acts were consolidated by 24 and 25 Vict. cc. 94-100, 1861. Some defects were amended by an act passed in 1867. The punishment of death is now virtually restricted to treason and wilful murder. See *Evidence*.

CRINOLINE (a French word, meaning stuff made of *crin*, hair) is the modern name of the "fardingale" of the time of queen Elizabeth, hoop-like petticoats made of whalebone, &c., revived in France and England since 1855. They have frequently occasioned loss of life, by coming in contact with fire and machinery. In No. 116 of the *Tatler*, published 5 Jan. 1710, is an amusing trial of the hoop-petticoat then in fashion.

A "No Crinoline League" was originated by "John Strange Winter" (Henrietta E. V. Stannard), a popular writer, in the view of a revival of crinolines, and was well supported . . Jan. 1893

CRIPPLEGATE (London), was so-called from the lame beggars who sat there, so early as the year 1010. The gate was new built by the brewers of London in 1244; and was pulled down and sold for 91*l.* in July, 1760. The poet Milton was buried in the church near it, 12 Nov. 1674. CRISPIN AND CRISPIANUS are said to have been two saints, born at Rome, from whence they travelled to Soissons, in France, to propagate the Christian religion. They worked as shoemakers; but the governor of the town discovering them to be Christians, ordered them to be beheaded, about 288. Their day is 25 Oct.

CRITERION THEATRE, Regent's Circus, Piccadilly, opened by Spiers and Pond, 21 March, 1874.

CRITH (from the Greek *krithē*, a barleycorn or small weight), a term suggested by Dr. A. W. Hofmann (about 1864) to express the volume-weight of gases; a cube containing 1 litre of hydrogen (0·0896 gramme) to be the unit. Hydrogen being 1 crith, oxygen will be 16, nitrogen 14 criths.

CRITICS. The first society of them was formed 276 B.C. *Blair.* Varro, Cicero, Apollonius, and Aristarchus were ancient critics. In modern times the *Journal des Sçavans* was the earliest periodical critical work. It was originated by Denis de Sallo, ecclesiastical councillor in the parliament of France, and was first published at Paris, 30 May, 1655, and is still continued. Jean Le Clerc's "Ars Critica," published 1696, is said to be the earliest systematic treatise. The first work of this kind in England was the *Review* of Daniel Defoe (the term being invented by himself), published in Feb. 1703. The *Works of the Learned* began 1710, and the *Waies of Literature* in 1714; discontinued in 1722. See *Reviews*.

The legality of fair criticism was established in the English courts, in Feb. 1794, when an action that excited great attention, brought by an author against a reviewer for a severe critique upon his work, was determined in favour of the defendant on the principle that criticism is allowable, however sharp, if just, and not malicious. See *Trials*, 1875.

CROSS. That on which the Redeemer suffered on Mount Calvary, was said to have been found at Jerusalem, with two others, deep in the ground, by the empress Helena, mother of Constantine I., 3 May, 326 (termed the *Invention of the Cross*); commemorated annually on that day. It was carried away by Chosroes, king of Persia, on the plundering of Jerusalem; but was recovered by the emperor Heraclius (who defeated him in battle), 14 Sept. 615, and that day has since been commemorated as "the festival of the Exaltation of the Cross," established in 642.

It is asserted by church writers that a great shining cross was seen in the heavens by Constantine, and that it led him to adopt it on his standard, with the inscription "*In hoc signo vinces*," "Under this sign thou shalt conquer." With this (Labarum) he advanced to Rome, where he vanquished Maxentius, 27 Oct. 312. *Lenglet.*

CRUSADES (French *Croisades*), wars undertaken to drive the infidels from Jerusalem and the "Holy Land." Peter Gautier, the Hermit, an officer of Amiens, on his return from pilgrimage incited pope Urban II. to expel infidels from the city where Christ had taught. Urban convened a council of 310 bishops at Clermont in France, at which the ambassadors of the chief Christian potentates assisted, and gave Peter the commission to summon Europe to a general war, 1094. The first crusade was published; an army of 300,000 men was raised, of which Peter had the direction, and Godfrey de Bouillon the command, 1095. The warriors wore a red cross upon the right shoulder: and their motto was *Volonté de Dieu*, "God's will." —The French government have published some of the Historians of the Crusades (1844-86).

VII. By Louis IX. (St. Louis), 1248, who was defeated and taken prisoner at Mansourah, 5 April, 1250; released by ransom; truce of ten years.

The cuirass was worn by cavalry in the reign of Henry III. 1216 *et seq.* Napoleon had several regiments of cavalry wearing cuirasses; and most European armies have picked corps of such. For bullet-proof cuirasses, see *Bullets*, 1894.

The Scots lost 2500 men killed upon the field, or in the slaughter which occurred in the cruel pursuit, while the loss of the English did not far exceed 200. Prince Charles, who wandered among the wilds of Scotland for six months, while 30,000*l.* were offered for taking him, at length escaped from Uist to Morlaix, and died at Rome, 3 March, 1788.

The Guelph Fund bill for making the necessary arrangements, was passed by the Prussian diet, 31 March–6 April, 1892.

It was restored to the Dutch in 1802; taken from them by the British in 1807, and again restored in 1814.

CURATES were of early appointment as coadjutors in the Romish church, and are mentioned in England in the 7th century. Among the acts passed for the relief of this laborious class of the clergy are the 12th Anne, 1713, and 36th, 53d, and 58th Geo. III., and especially the beneficent act, 2 Will. IV. Oct. 1831. CUSTOM is a law not written (*lex non scripta*), established by long usage and consent, and is distinguished from *lex scripta*, or the written law. It is the rule of law when it is derived from 1189 downwards. Sixty years' custom is binding in the civil law, and forty years' in ecclesiastical cases.

CUSTOMS were collected upon merchandise in England, under Ethelred II. in 979. The king's claim to them by grant of parliament was established 3 Edw. I. 1274. The customs were farmed to sir Thomas Smith for annual sums varying from 14,000*l.* to 50,000*l.* in the reign of Elizabeth. *Stow.* They were farmed by Charles II. for 390,000*l.* in 1666. *Davenant.* In 1671 commissioners were appointed. The customs were consolidated by Mr. Pitt in 1787. Between 1820 and 1830 so many reductions and consolidations were made in the customs department, that above a quarter of a million was saved in salaries, though the work had enormously increased.—Acts consolidating the customs duties were passed in 1853, 1854, and 1860, whereby the number of articles in the tariff and the amount of the customs were greatly reduced. Many changes have been made since: by the Customs Act of 1890, the laws were amended and the duties modified; see *Revenue.* The disqualification of custom-house officers and officers of excise from voting for the election of members of parliament in 1782, was removed in 1867–8.

The laws respecting the customs were amended by an act passed 21 Aug. 1871, and consolidated by acts passed, 24 July, 1876; amended, 1887 and 1898

DAHOMEY, a negro kingdom, West Africa, became known to Europeans early in the last century, when Trudo Andati or Guadjor Trudo, a man of energy and talent, was king. He died in 1732, and was succeeded by a series of cruel tyrants, a large part of whose revenue was derived from the slave-trade. *Abbeokuta*, a robbers' haunt in 1825, has, since 1829, become a strong-walled town, inhabited by free blacks; and was consequently opposed by the king of Dahomey. His army has been severely defeated in its attacks on this place, and in one on 16 March, 1864, a great number of his Amazons (female celibates) were slain. During the last few years Dahomey has been visited by captain Burton and other travellers, who have described the royal sanguinary customs. Capital of Dahomey, Abomey.

DANCE OF DEATH. The triumph of death over all ranks of men was a favourite subject with the artists of the middle ages, and appears in rude carvings and pictures in various countries.

The *Chorea Machabæorum* or *Danse Macabre*, the first printed representation, published by Guyot Marchand, a bookseller of Paris 1485
Holbein's *Dance of Death* (concerning the authorship of which there has been much controversy), printed at Lyons in 1538, and at Basil . . . 1594
Many editions have since appeared; one with an introduction and notes published by Mr. Russell Smith 1849
The term *Dance of Death* was also applied to the frenzied movements of the Flagellants, who had sometimes skeletons depicted on their clothing, about the end of the 14th century.
Dancing mania, accompanied by aberration of mind and distortions of the body, was very prevalent in Germany in 1374, and in the 16th century in Italy, where it was termed Tarantism, and erroneously supposed to be caused by the bite of the Tarantula spider. The music and songs employed for its cure are still preserved.

DANCING was practised by the Curetes, 1534 B.C. *Eusebius*. The Greeks combined the dance with their dramas, and pantomimic dances were introduced on the Roman stage, 22 B.C. *Usher*. Dancing by cinque paces was introduced into England from Italy, A.D. 1541. In modern times the French introduced *ballets analogues* in their musical dramas. The country dance (*contre-danse*) is of French origin, but its date is not precisely known. *Spelman*. See *Morice Dance*, *Quadrille*, and *Waltz*.

The tax was suppressed by Edward the Confessor in 1051; revived by William I. 1068; and formed part of the revenue of the crown, until abolished by Stephen, 1136. Every hide of land, *i.e.* as much as one plough could plough, or as *Bede* says, as much as could maintain a family, was taxed at first 1*s.*, afterwards as much as 7*s.* Camden says that once 24,360*l.* was raised.

DANES, or NORTHMEN; see *Denmark*. During their attacks upon Britain and Ireland they made a descent on France, where, in 895, under Rollo, they received presents under the walls of Paris. They returned and ravaged the French territories as far as Ostend in 896. They attacked Italy in 903. DANNEWERKE, or DANNAWIRKE, a series of earthworks, considered almost impregnable, stretching across the long narrow peninsula of Schleswig, Holstein, and Jutland—said to have been constructed during the "stone age," long before the art of metal-working. It was rebuilt in 937 by Thyra, queen of Gormo the Old, for which she was named "Dannabod," the pride of the Danes. It was repaired by Olaf Tryggveson between 995 and 1000. Near here the Prussians, helping the duchies, defeated the Danes, 23 April, 1848. The retreat of the Danes from it, 5 Feb. 1864, occasioned much dissatisfaction at Copenhagen.

DANUBE (German, Donau; anciently Ister and Danuvius), the largest river in Europe, except the Volga, rises in the Black Forest and falls into the Black Sea. Trajan's bridge at Gladova was destroyed by Adrian, to prevent the barbarians entering Dacia. Steam navigation was projected on this river by count Szechenyi, in 1830, and in that year the first steam-boat was launched at Vienna, and the Austrian company was formed shortly after. The Bavarian company was formed 1836. A canal between the Danube and the Maine was completed by Louis I. of Bavaria. Charlemagne, in the 8th century, contemplated uniting the Danube and Rhine by a canal. At the peace of 30 March, 1856, the free navigation of the Danube was secured, and an independent European commission appointed to make it navigable from Isaktchi to the sea, which has worked with good effect. The British government, in 1868, lent 135,000*l.* to complete the works. The treaty respecting the navigation of the Danube renewed for twelve years, 13 March, 1871. The river suddenly took possession of a new bed near Vienna, 17 April, which was formally opened 30 May, 1875.

DARDANELLES. Two castles (Sestos, in Roumania, and Abydos, in Anatolia), built by the sultan Mahomet IV. in 1659, commanding the entrance of the strait of Gallipoli, named Dardanelles from the contiguous town Dardanus.—The passage of the strait was achieved by the British squadron under sir John Duckworth, 19 Feb. 1807; but he repassed them with great loss, 3 March, the castles of Sestos and Abydos hurling down stone-shot upon the British ships. A company was formed in 1695, and in 1698-9, three expeditions sailed thither from Scotland, where 400,000*l.* had been raised. The first consisted of 1200 young men of all classes, besides women and children. The enterprise not having been recognised by the English government, the settlements were threatened by the Spaniards, to whom they were finally surrendered, 30 March, 1700. Paterson and a few survivors from famine and disease, had set off shortly before the arrival of the second expedition. Several years after, 398,085*l.* were voted by parliament to the survivors as "Equivalent money."

18,000*l.* were also voted to Paterson; but the bill was rejected in the house of Lords. See *Panamá.* The *average breadth*, 40 miles; least breadth, 30 miles.

A convent of nuns, of the order of St. Augustin, endowed here by Edward III. 1355, was converted by Henry VIII. into a royal palace. The first paper-mill in England was erected at Dartford by sir John Spielman, a German, in 1590 (*Stow*), and about the same period was erected here the first mill for splitting iron bars. The powder-mills here were blown up four times between 1730 and 1738. Various explosions have since occurred, in some cases with loss of life to many persons: 12 Oct. 1790; 1 Jan. 1795; and others recently. Population, 1881, 10,163; 1891, 11,962.

DARTMOUTH (Devon). Burnt by the French in the reigns of Richard I. and Henry IV. In a third attempt (1404), the invaders were defeated by the inhabitants, assisted by the valour of the women. The French commander, Du Chastel, three lords, and thirty-two knights, were made prisoners. In the war of the parliament, Dartmouth was taken after a siege of four weeks, by prince Maurice, who garrisoned the place for the king (1643); but it was retaken by general Fairfax in 1646. Population, 1881, 5,725; 1891, 6,038.

DARWINISM, see *Development* and *Species*.

DATES were affixed to grants and assignments 18 Edw. I. 1290. Before this time it was usual at least to pass lands without dating the deed of conveyance. *Lewis.* Numerous instruments of assignment enrolled among our early records establish this fact. The date is determined by the names of the parties, particularly that of the grantor: the possession of land was proof of the title to it. *Hardie.* A useful glossary of the dates given in old charters and chronicles will be found in Nicolas's "Chronology of History." J. J. Bond's "Handy-Book for Verifying Dates," published 1866.

DAUPHINÉ,* S.E. France, successively held by the Allobroges, Burgundians, and Lombards; was, about 732-4, delivered from the invading Saracens by Charles Martel. After forming part of the kingdom of Arles, it was much subdivided among counts. One of these, Humbert II., ceded Dauphiné and the Viennois to Philip VI., in 1343, for his eldest son, on the condition that the prince should be styled *dauphin*, which took effect in 1349, when Humbert became a monk. Louis Antoine, duke of Angoulême, son of Charles X., the last dauphin who assumed the title at his father's accession, 16 Sept. 1824, died 3 June, 1844.

DAVENTRY, Northamptonshire. Near here Lambert, having escaped from the Tower, was defeated and retaken, in his attempt to enkindle the war, by Monk, 21 April, 1660. The dissenting academy removed here from Northampton in 1752, was transferred to Wymondley in 1789, thence to London as Coward College, and finally united with Homerton and Highbury Colleges as New College, in 1850.

DAVID'S, ST. (S. W. Wales), the ancient Menapia, now a poor decayed place, but once the metropolitan see of Wales, and archiepiscopal. When Christianity was planted in Britain, three archbishops' seats were appointed, viz. London, York, and Caerleon upon Usk, in Monmouthshire. That at Caerleon being too near the dominions of the Saxons, was removed to Mynyw, and called St. David's, in honour of the archbishop who removed it, 522. St. Sampson was the last archbishop of the Welsh; for he, withdrawing himself on account of a pestilence to Dôle, in Brittany, carried the pall with him. In the reign of Henry I. the archbishops submitted to the see of Canterbury. *Beatson.* Present income 4500*l.*

DAVID'S DAY, ST., 1 March, is annually commemorated by the Welsh, in honour of St. David. Tradition states that on St. David's birthday, 540, a great victory was obtained by the Welsh over their Saxon invaders; and that the Welsh soldiers were distinguished, by order of St. David, by a leek in their caps.

DAVIS'S STRAIT (N. America), discovered by John Davis, 11 Aug. 1585, on his voyage to find a N. W. passage, 1585-87. He made two more voyages for the same purpose, and five voyages to the East Indies. In the last he was killed by Japanese pirates, on the coast of Malacca, 27 or 29 Dec., 1605.

DAY. Day began at sunrise among most of the northern nations, at sunset among the Athenians and Jews; and among the Romans at midnight as with us. The Italians in some places, reckon the day from sunset to sunset, making their clocks strike twenty-four hours round. The Chinese divide the day into twelve parts of two hours each. The astronomical day begins at noon, is divided into twenty-four hours (instead of two parts of twelve hours). Thus the astronomical day 8 Dec. begins at noon of 8 Dec. and ends at noon 9 Dec. At Greenwich, from 1 Jan. 1885, the day of 24 hours began at midnight; the reckoning was recommended for railways, &c. A system of universal time for all countries was put forth by Mr. Sandford Fleming, of Canada. The Washington Prime Meridian Conference adopted a resolution declaring the universal day to be the mean solar day, beginning, for all the world, at the moment of mean midnight of the initial meridian, coinciding with the beginning of the civil day, and that meridian to be counted from zero up to 24 hours, 21 Oct. 1884. The scheme for universal time was advocated by Mr. W. H. M. Christie, the Astronomer Royal, at the Royal Institution, 19 March, 1886.

DEACONS (literally *servants*), an order of Christian ministers, began with the Apostles, about 53. (*Acts* vi.) Their qualifications are given by St. Paul (65), 1st *Timothy* iii. 8—14. Mr. John Andrews, master of Shrewsbury High School, was ordained at Lichfield Cathedral a *permanent* deacon in conformity with a resolution passed in the Upper House of Convocation, Feb. 1884; his duties are to assist the priest in the communion service, &c., 18 Dec. 1887.

DEACONESSES, or ministering widows, have their qualifications given in 1 *Tim.* v. 9, 10 (65). Their duties were to visit the poor and sick, assist at the agapæ or love feasts, admonish the young women, &c. The office was discontinued in the Western church in the 5th and 6th centuries, and in the Greek church about the 12th, but has been recently revived in Germany. The appointment of deaconesses, subject to the parochial clergy, was advocated by the bishop of Ely about 1853, and some were appointed. The Diocesan Deaconess Institution, London, was established in 1861.

DEAD. Prayers for their benefit were probably offered up in the 2nd century, being referred to by Tertullian, who died 220. The practice was protested against by Aerius, and defended by Epiphanius, who died 403. It is generally objected to by the church of England, but is not expressly forbidden; so decided by sir Herbert Jenner in the Court of Arches (*Phillimore, Eccl. Law*, 1873-6).

Book of the Dead, a collection of prayers and exorcisms written in Egyptian hieroglyphic or hieratic characters, composed for the benefit of the pilgrim soul in his journey through Amenti (the Egyptian Hades). Portions of these papyri were placed with the mummy in his tomb. They are said to form fully one half of the thousands which are extant. The "Book of the Dead" is dated from the 4th dynasty 3733–3566 B.C. After much toil a pure text with illustrations was published by M. Edouard Naville, 1886. Translations in several European languages have appeared. A facsimile of the Papyrus of Ani in the British Museum was printed in 1890. Mr. E. A. Wallis Budge's editions with translations, 1895 and 1897.

DEAD WEIGHT LOAN acquired its name from its locking up the capital of the Bank of England, which in 1823 advanced 11,000,000*l.* to the government (to construct new ordnance, &c.). The latter engaged to give an annuity of 585,740*l.* for 44 years, which ceased in June, 1867.

By the help of the baroness Meyer de Rothschild and others, the "Association for the Oral Instruction of the Deaf and Dumb" was founded in 1871, and a day-school opened at 12, Fitzroy-square . 16 July, 1872

DEAN, FOREST OF, Gloucestershire, anciently wooded quite through, and in the last century, though much curtailed, was twenty miles in length and ten in breadth. It was famous for its oaks, the material of our ships of war. Riots in this district, when more than 3000 persons assembled in the forest, and demolished upwards of fifty miles of wall and fence, throwing open 10,000 acres of plantation, took place on 8 June, 1831. The Dean forest (mines) act passed 16 Aug. 1871.

DEAN (decanus), a name commonly given to the arch-presbyter, or eldest presbyter, in the 12th century; originally a military title, an officer over ten soldiers. In the church of England the dean

and chapter of a cathedral nominally elect the bishop and form his council. By 13 & 14 Car. II. (1662), a dean must be in priest's orders; previously the office had occasionally been held by a layman, with special dispensation. The ancient office of "rural dean" has been much revived since 1850. The Deans' and Canons' resignation act passed 13 May, 1872. The Five Deans' memorial, and counter memorial, see *Church of England*, 1881. See *Arches*.

DEBATING SOCIETIES; several formed in the last century. The celebrated Oxford Union Society was founded in 1823, and many orators have been trained by it.

DEBTORS have been subjected to imprisonment in almost all countries and times. In the eighteen months subsequent to the panic of Dec. 1825, as many as 101,000 writs for debt were issued in England. In the year ending 5 Jan. 1830, there were 7114 persons sent to the several prisons of London; and on that day, 1547 of the number were yet confined. On the 1st of Jan. 1840, the number of prisoners for debt in England and Wales was 1732; in Ireland the number was under 1000; and in Scotland under 100. The operation of statutes of relief, and other causes, considerably reduced the number of imprisoned debtors. When the new Bankruptcy act (abolishing imprisonment for debt except when fraudulently contracted) came into operation in Nov. 1861, a number of debtors who had been confined were released. Arrest of Absconding Debtors bill, 14 & 15 Vict. c. 52, 1852. By an act passed 9 Aug. 1869, the imprisonment of fraudulent debtors was abolished, with certain exceptions, and nearly a hundred debtors were released by a judge's order in Jan. 1870. An act to facilitate the arrest of absconding debtors, passed 9 Aug. 1870. Imprisonment for debt in Ireland was abolished by an act passed 6 Aug. 1872, and in Scotland (after 31 Dec.) by Dr. Cameron's Act, passed 7 Sept. 1880. See *Arrest*, *King's Bench*, *Bankrupts*, *Insolvents*, *Fleet*, and *National Debt*.

DECAPITATION, see *Beheading*.

DECCAN (Dekhan or Dakhan), S. India, was invaded by the Mahometans in 1294. The first independent sultan was Alaudin. The natives revolted, and the dynasty of Bahmani was founded by Hasan Ganga in 1347. About 1686-90, Aurungzebe I. recovered the Deccan, but soon lost great part of it to the Mahrattas. The Nizam al Mulk, his viceroy, became independent in 1717. A large

part of the Deccan was ceded to the English in 1818.

DECEMBER (from *decem*, ten), the tenth month of the year of Romulus, commencing in March. In 713 B.C. Numa introduced January and February before March, and thenceforward December became the twelfth of the year. In the reign of Commodus, A.D. 181—192, December was called, by way of flattery, Amazonius, in honour of a courtesan whom that prince had loved, and had had painted like an Amazon. The English commenced their year on the 25th December, until the reign of William I.; see *Year*. For 2 Dec. revolution see *France*, 1851.

DECEMVIRI, or Ten Men, appointed to draw up a code of laws, to whom for a year the whole government of Rome was committed, 451 B.C. The laws they drew up were approved by the senate and general assembly of the people, written on ten metallic tables, and set up in the place where the people met (*comitium*). Two more tables were added by a second decemvirate, 450 B.C. The tyrannical conduct of Appius Claudius, one of the Decemviri, towards Virginia, who was stabbed by her father Virginius to save her from slavery, led to a revolution, and the re-establishment of the consular government, 449 B.C.

DECORATIVE ART. Its principles, enunciated by A. W. Pugin, in his "Designs," in 1835, have been advanced by Owen Jones, Redgrave, and others. Owen Jones's elaborate "Grammar of Ornament," was published in 1856. A Decorative Art society, founded in 1844, existed for a short time only.

DE COURCY'S PRIVILEGE, that of standing covered before the king, granted by king John to John de Courcy, baron of Kingsale, and his successors, in 1203. He was the first Irish nobleman created by an English sovereign, 27 Hen. II. 1181, and was entrusted with the government of Ireland, 1185. The privilege was allowed to the baron of Kingsale by Will. III., Geo. III., and by Geo. IV. at his court held in Dublin, in Aug. 1821. The 31st baron, John Fitz-Roy de Courcy, who succeeded 1874, died, aged 69, 20 Nov. 1890. The present baron is the 32nd in succession.

DECRETALS. They formed the second part of the canon law, or collection of the pope's edicts and decrees and the decrees of councils. The first acknowledged to be genuine is a letter of Siricius to Himerus, a bishop of Spain, written in the first year of his pontificate, 385. *Howel*. Certain false decretals were used by Gregory IV. in 837. The decretals of Gratian, a Benedictine (a collection of canons), were compiled in 1150. *Hénault*. Five books were collected by Gregory IX. 1227; a sixth by Boniface VIII. 1297; the Clementines by Clement V. in 1313; employed by John XXII. in 1317; the Extravagantes range from 1422 to 1483.

DEDICATION of the Jewish tabernacle took place 1490 B.C.; of the temple, 1004 B.C.; of the second temple, 515 B.C. The Christians under Constantine built new churches and dedicated them with great solemnity, in A.D. 331, *et seq*. The dedication of BOOKS (by authors to solicit patronage or testify respect) existed in the time of Mæcenas, 17 B.C., the friend and counsellor of Augustus, and a patron of Horace (*Ode* I. 1).

DEED, a written contract or agreement. The formula, "I deliver this as my act and deed," occurs in a charter of 933. *Fosbrooke*. Deeds in England were formerly written in Latin or French; the earliest known instance in English is the indenture between the abbot of Whitby and Robert Bustard, dated at York in 1343; see *English Language*.

DEEP-SEA SOUNDINGS. Much new and interesting information respecting the animal life and temperature of the deep sea has been acquired by the dredgings on the coast of Norway by M. Sars, and by those of Dr. W. B. Carpenter and prof. (aft. sir) Wyville Thomson on our own coasts, near the Faroe isles, in 1868 and 1869, and in the Mediterranean by Dr. Carpenter in 1870. Living animals have been found at a depth of three miles. On 21 Dec. 1872, Dr. Wyville Thomson and a party of scientific men sailed in H.M.S. *Challenger* (Capt. G. S. Nares), to examine into the physical chemical, geological, and biological condition of the great ocean basins and the direction of their currents. Deepest sounding then known was taken in the Atlantic, north of St. Thomas's, 3875 fathoms (4 miles, 710 yards), 24 March, 1873. On 10 Dec. 1874, capt. Thompson succeeded capt. Nares, who took the command of the new Arctic expedition. The *Challenger* returned, with valuable collections, 25 May, 1876, after a voyage of above 80,000 miles. The "Voyage" was published by sir C. Wyville Thomson in Dec. 1877; and fifty volumes of reports, with many illustrations, had been published, in 1895. The *Challenger* expedition was warmly promoted by Mr. Robert Lowe (afterwards lord Sherbrooke), chancellor of the exchequer, 1868-73. A Norwegian expedition explored the northern seas 16 July—18 Aug. 1877; an Italian expedition in the Mediterranean started 2 Aug. 1881.

The deep sea explorations, carried on in the eastern Mediterranean for the academy of Vienna, reported successful; the greatest depth, 2¼ miles, is between Molla and Cerigo . . . March, 1891
The greatest known ocean depth was said to be 4,475 fathoms south of the Ladrone Islands.
Adm. W. J. Wharton stated that the soundings taken by H.M.S. *Penguin* in the S. Pacific, Feb. 1896, exceeded 5,000 fathoms; *Times* . 29 Feb. 1896
Exploration of the Danish cruiser *Ingolf* round Iceland, 2 years; successful results; reported, at Copenhagen . . . . . 20 Aug. ,,

DEER are mentioned in a will of one Athelstan, dated 1045. Professor Owen thinks that fallow deer are not native, but were introduced here at an early period. There are now in England 334 deer parks, the oldest being probably lord Abergavenny's at Eridge, Sussex. See Evelyn Shirley's "Account of Deer Parks," July, 1867. 1658 deer in the royal parks, 1873.

DEFENDERS, a faction in Ireland, which arose out of a quarrel between two residents of Market-hill, 4 July, 1784. Each was soon aided by a large body of friends, and many battles ensued. On Whit-Monday, 1785, an armed assemblage of one of the parties (700 men), called the *Nappagh Fleet,* prepared to encounter the *Bawn Fleet,* but the engagement was prevented. They subsequently became religious parties, Catholic and Presbyterian, distinguished as *Defenders* and *Peep-o'-day-boys:* the latter were so named because they usually visited the dwellings of the Defenders at daybreak in search of arms; see *Diamond.*

DEISM, THEISM, or **MONOTHEISM** (Latin, *deus;* Greek, *theos,* God), the belief in one God, in opposition to polytheism and to the doctrine of the Trinity. About the middle of the 16th century some gentlemen of France and Italy termed themselves *deists,* to disguise their opposition to Christianity by a more honourable appellation than that of Atheism (*which see*). The most distinguished deists were Herbert, baron of Cherbury, in 1624; Hobbes, Tindal, Morgan, lord Bolingbroke, Gibbon, Hume, Holcroft, Paine, and Godwin.

A high-caste Brahmin, Rammohun Roy, founded a Brahmin monotheistic church in 1830, termed the Brahmo Somaj. He died at Bristol 27 Nov. 1833. His reforming work was revived in 1842 by Debendra Nath Tangore. In 1858 Baboo Keshub Chunder Sen joined the society, and became a most energetic propagandist, advocating also social reform; being much opposed, he formed the new Brahmo Somaj of India in 1866

DELHI, the once great capital of the Mogul empire, and chief seat of the Mahometan power in India; it was taken by Timour in 1398. It is now in decay, but contained a million of inhabitants in 1700. In 1739, when Nadir Shah invaded Hindostan, he entered Delhi; 100,000 of the inhabitants perished by the sword, and plunder to the amount of 62,000,000*l.* sterling is said to have been collected. Similar calamities were endured in 1761, on the invasion of Abdalla, king of Candahar. In 1803, the Mahrattas, aidedby the French, took Delhi; but were defeated by general Lake, 11 Sept., and the aged Shah Aulum, emperor of Hindostan, was restored to his throne with a pension; see *India*, 1803. On 10 May, 1857, a mutiny arose in the sepoy regiments at Meerut. It was soon checked; but the fugitives fled to Delhi on 11 May, and, combined with other troops here, seized the city; proclaimed a descendant of the Mogul king, and committed frightful atrocities. The rebels were anxious to possess the chief magazine, but after a gallant defence it was exploded by order of lieut. Willoughby, who died of his wounds shortly after. The other heroes of this exploit were lieutenants Forrest and Rayner, and the gunners Buckley and Scully. Delhi was shortly after besieged by the British, but was not taken till 20 Sept. following. The final struggle began on the 14th; brigadier (aft. sir) Archdale Wilson, the commander, much aided by col. R. Baird Smith. Much heroism was shown; the gallant death of Salkeld at the explosion of the Cashmere gate created much enthusiasm. The old king and his sons were captured soon after: the latter were shot, and the former after a trial was sent for life to Rangoon, where he died 11 Nov. 1862. See *India*, 1857. A camp formed at Delhi by the earl of Mayo, the viceroy, Dec. 1871, was visited by the king of Siam, Jan. 1872. The prince of Wales visited Delhi, 11 Jan. 1876. "DELICATE INVESTIGATION" into the conduct of the princess of Wales (afterwards queen of England, as consort of George IV.), was commenced by a committee of the privy council, under a warrant of inquiry, dated 29 May, 1806. The members were lord Grenville, lord Erskine, earl Spencer, and lord Ellenborough. The inquiry, of which the countess of Jersey, sir J. and lady Douglas, and other persons of rank, were the prompters, led to the publication called "The Book"; afterwards suppressed. The charges against the princess were disproved in 1807 and in 1813; but not being permitted to appear at court, she went on the continent in 1814; see *Queen Caroline*.

The Pythian games were first celebrated here 586 B.C. The temple was burnt by the Pisistratidæ, 548 B.C. A new temple was raised by the Alcmæonidæ. The Persians (480 B.C.) and the Gauls (279 B.C.) were deterred from plundering the temple by awful portents. It was, however, robbed and seized by the Phocians 357 B.C., which led to the sacred war, and Nero carried from it 300 costly statues, A.D. 67. The oracle was consulted by Julian, but silenced by Theodosius.

Each author is illustrated by notes and an index of words. An edition of the Delphin classics, with additional notes, &c., was published by Mr. Valpy of London, 1818, *et seq.*

DEMOCRATIC FEDERALS, a political party, proposed by Mr. Joseph Cowen, M.P. for Newcastle, opposed to the policy of the government of Mr. Gladstone, 5 April, 1881.

DEMOCRATS, advocates for government by the people themselves (*demos*, people, and *kratein*, to govern), a term adopted by the French republicans in 1790 (who termed their opponents *aristocrats*, from *aristos*, bravest or best). The name *Democrats* was adopted by the pro-slavery party in N. America (the southern states), and the abolitionists were called *Republicans*. Into these two great parties a number of smaller ones were absorbed at the presidential election in 1856. In 1860, the Republicans formed "Wide-awake" clubs for electioneering purposes, and succeeded in getting their candidate, Abraham Lincoln, elected president, 4 Nov., which led to civil war; see *United States*, 1860.

In the autumn of 1874, the democrats, free-traders, and opponents of negro-rule, once more obtained the majority in the elections for the next congress; a reaction in their favour against the republicans, protectionists, then powerful; see *United States*, 1875-7. DENIS, ST., an ancient town of France, near Paris, famous for its abbey and church; the former abolished at the revolution, the latter the place of sepulture of the French kings, from its foundation by Dagobert, about 630; the remains of the saint Denis were placed there in 636. On 6, 7, 8 Aug. 1793, the republicans demolished most of the royal tombs, and in Oct. following, the bodies were taken from coffins and cast into a pit; the lead was melted, and the gold and jewels taken to Paris. By a decree of Bonaparte, dated 20 Feb. 1806, the church (which had been turned into a cattle-market) was ordered to be cleansed out and redecorated as "the future burial-place of the emperors of France." On the return of the Bourbons, more restorations were effected, and the duc de Berri and Louis XVIII. were buried here. The damage sustained in the war of 1870-1 has been well repaired. Near St. Denis the Catholics defeated the Huguenots, but lost their leader, the constable Montmorency, 10 Nov. 1567.

DENMARK (N. Europe). The most ancient inhabitants were Cimbri and Teutones, who were driven out by the Jutes or Goths. The Teutones settled in Germany and Gaul; the Cimbrians invaded Italy, where they were defeated by Marius. The peninsula of Jutland obtained its name from the Jutes; and the name of Denmark is supposed to be derived from *Dan*, the founder of the Danish monarchy, and *mark*, a German word signifying country. For their numerous invasions of Britain, &c., see *Danes.* Population of the kingdom of Denmark in 1860, 1,600,551; of the duchies of Schleswig, Holstein, and Lauenburg, 1,004,473; of the colonies, 120,283. DERRICKS are lofty, portable crane-like structures, used on land and water for lifting enormous loads, and in some cases depositing them at an elevation. They are extensively used in the United States, and were introduced into England as floating derricks for raising sunken vessels, by their inventor, A. D. Bishop, in 1857.

The cathedral, built in 1164, becoming ruinous, was rebuilt by Londoners, who settled here in the reign of James I. The see is valued in the king's books at 250*l.* sterling; but it has been one of the richest sees in Ireland. *Beatson.* The see was united to Derry, 1834; see *Bishops; Londonderry.*

DERVISH. Probably a corruption of der-pish or der-bish, one in advance. The dervishes of the present time, fanatical enthusiasts, unrecognized by orthodoxy, originated in Persia, whence they spread over the Mahommedan world. The khalifa Abdulla reported supreme, 1890 *et seq.* The dervishes have great influence over the ignorant masses. See *Soudan.*

The French passed a defile, which they should have merely guarded. The duc de Grammont with his cavalry charged the British foot with great fury, but was so received that he was obliged to give way, and to repass the Maine, losing 3000 men. Handel's "Dettingen Te Deum," first performed, 27 Nov. 1743.

DEVELOPMENT (or Evolution). Wolff put forth a theory of epigenesis in 1759; Lamarck, the naturalist, in 1809, propounded a theory that all animals had been developed from "monads," living minute particles; see *Species* and *Vestiges.* Buffon held a similar doctrine. In 1827 Ernst von Baer of Königsberg demonstrated that all mammals are developed from a minute egg not a hundredth of an inch in diameter. Mr. C. Darwin's views are given in his "Origin of Species," 1859; and "Descent of Man," 1871. He supposes that man was gradually evolved from the lowest created form of animal life. Hæckel, his most advanced follower, published in German a "History of Creation," 1873; a translation in English, 1875. Mr. Alfred Wallace published his work on Natural Selection in 1870. See *Evolution.*

The theory of the development of living beings out of the substance of the earth was put forth by Lucretius in his "De Rerum Naturæ," about 57 B.C.

DIAMOND JUBILEE, see *Jubilee*, 1897.

DIAMONDS were first brought to Europe from the East, where the mine of Sumbulpoor was the first known. Golconda, in India, now in ruins, was a celebrated diamond mart. The mines of Brazil were discovered in 1728. From these last a diamond, weighing 1680 carats, or fourteen ounces, was sent to the court of Portugal, and was valued by Mr. Romeo de l'Isle at 224 millions; by others at 56 millions, and at 3½ millions; its true value (not being brilliant) was 400,000*l.*

The great Russian diamond weighs 193 carats, or 1 oz. 12 dwts. 4 gr. troy. The empress Catherine II. offered for it 104,166*l.* 13*s.* 4*d.*, besides an annuity for life to the owner of 1041*l.* 13*s.* 4*d.*, which was refused; but it was afterwards sold to Catherine's favourite, count Orloff, for the first-mentioned sum, without the annuity, and was by him presented to the empress on her birthday, 1772; it is now in the sceptre of Russia.
The Pitt (or Regent) diamond weighed 136 carats, and after cutting, 106 carats: it was sold to the king of France for 125,000*l.* in 1720.
The Pigott diamond (bought by Mr. Pitt, grandfather of Wm. Pitt) was sold for 9500 guineas, 10 May, 1802.
The diamond called the Kohinoor, Koh-i-Nur, or Mountain of Light, has a legendary history, and is said to have belonged in turn to Shah Jehan, Aurungzebe, Nadir Shah, the Afghan rulers, and afterwards to the Sikh chief Runjeet Singh. Upon the abdication of Dhuleep Singh, the last ruler of the Punjab, and the annexation of his dominions to the British empire, in 1849, the Kohinoor was surrendered to the queen. It was accordingly brought over and presented to her, 3 July, 1850. It was shown in the Great Exhibition, 1851. Its original weight was nearly 800 carats,

but it was reduced by the unskilfulness of the artist, Hortensio Borghese, a Venetian, to 279 carats. Its shape and size resembled the pointed half (rose cut) of a small hen's egg. The value is scarcely computable, though two millions sterling have been mentioned as a justifiable price, if calculated by the scale employed in the trade. This diamond was re-cut in 1852, and now weighs 102¼ carats.

The SANCI diamond, which belonged to Charles the Bold, duke of Burgundy, was bought by sir C. Jejeebhoy from the Demidoff family for 20,000*l.* in Feb. 1865.

A diamond, termed the STAR OF THE SOUTH, was brought from Brazil in 1855, weighing 254½ carats, half of which was lost by cutting.

Diamonds were discovered in Cape Colony, S. Africa, in March, 1867. A fine one, termed the "Star of South Africa," brought to England in 1869, was purchased by Messrs. Hunt and Roskell. After cutting, it weighed 46½ carats, and was valued at 25,000*l.*, in June, 1870.

A diamond weighing 655 carats found in the Jagersfontein mine in the Orange Free State, 26 Nov. 1895.

DIAMOND NECKLACE AFFAIR.—In 1785, Bœhmer, the court jeweller of France, offered the queen Marie Antoinette, a diamond necklace, for 56,000*l.* The queen desired the necklace, but feared the expense. The countess de la Motte (of the ancient house of Valois) forged the queen's signature, and by pretending that the queen had an attachment for him, persuaded the cardinal de Rohan, the queen's almoner, to conclude a bargain with the jeweller for the necklace for 56,000*l.* De la Motte thus obtained the necklace and made away with it. For this she was tried in 1786, and sentenced to be branded on the shoulders and imprisoned for life. She accused in vain the celebrated Italian adventurer, Cagliostro, of complicity in the affair, he being then intimate with the cardinal. She made her escape and came to London, where she was killed by falling from a window-sill, in attempting to escape an arrest for debt.—De Rohan was tried and acquitted, 14 April, 1786. The public in France at that time suspected the queen of being a party to the fraud. Talleyrand wrote at the time, that he should not be surprised if this miserable affair overturned the throne.

Moissan's method of manufacturing artificial diamonds from molten iron in a carbon crucible, and exhibited specimens on the screen of others made by prof. Roberts-Austen and himself. See *Royal Institution Proceedings*, with illustrations, 1897.

INFLAMMABILITY OF DIAMONDS.

Boetius de Boot conjectured that the diamond was inflammable, 1609. When exposed to a high temperature it gave an acrid vapour, in which a part of it was dissipated, 1673. *Boyle.*

Sir Isaac Newton concluded from its great refracting power, that it must be combustible, 1675.

Averani demonstrated, by concentrating the rays of the sun upon it, that the diamond was exhaled in vapour, and entirely disappeared, while other precious stones merely grow softer, 1695.

It has been ascertained by Guyton, Davy, and others, that diamonds contain nothing but pure charcoal, or carbon. Diamonds were charred by the intense heat of the voltaic battery—by M. Dumas, in Paris, and by professor Faraday, in London, in 1848.

DIANA, TEMPLE OF (at Ephesus), accounted one of the seven wonders of the world, was built at the common charge of all the Asiatic states, 552 B.C.; the chief architect being Ctesiphon. Pliny says that 220 years were employed in completing it. It was 425 feet long, 225 broad, and was supported by 127 columns (60 feet high, each weighing 150 tons of Parian marble), furnished by so many kings. It was set on fire, on the night of the birth of Alexander the Great, by Herostratus or Eratostratus, who confessed that his sole motive was the desire of transmitting his name to future ages, 356 B.C. The temple was rebuilt, but again burnt by the Goths, in their naval invasion, A.D. 256 or 262. In April, 1869, Mr. J. T. Wood discovered the site of the second temple; and since then sculptured marble columns have been removed to the British Museum. Diana was the Roman name of the Greek *Artemis.*

DICTATORS were supreme and absolute magistrates of Rome, appointed to act in critical times. Titus Lartius, the first dictator, was appointed, 501 B.C. Caius Marcius Rutilus was the first plebeian dictator, 356 B.C. This office became odious by the usurpations of Sylla and Julius Cæsar; and after the death of the latter, the Roman senate, on the motion of the consul Antony, passed a law forbidding a dictator to exist in Rome, 44 B.C. The dictator was also called master of the people, and had under him a master of the horse.

DILETTANTI, SOCIETY OF, established in 1734 by the viscount Harcourt, lord Middlesex, duke of Dorset, and others who had travelled and who were desirous of encouraging a taste for the fine arts in Great Britain. The society published, or aided in publishing, Stuart's Athens (1762-1816), Chandler's Travels (1775-6), and several other finely illustrated works. The members dine together from time to time at the Thatched-house tavern, St. James's. Mr. R. P. Pullan, on behalf of this society, excavated the temple of Bacchus at Teos, of Apollo Smintheus in the Troad, and of Minerva Polias at Priene, between 1861-70. Published "Antiquities of Ionia," 4 parts, 1769-1881. "History of the Society of Dilettanti," by Lionel Cust, published May, 1898.

DIOCESE. The first division of the Roman empire into dioceses, at that period civil governments, is ascribed to Constantine, 323; but Strabo remarks that the Romans had the departments called dioceses long before. In England the principal dioceses are coeval with the establishment of Christianity; of 28 dioceses, 20 are suffragan to the diocese of Canterbury, and six to that of York; see *Bishops*, and the sees severally. Diocesan conferences of the clergy and laity now frequent.

DIOCLES' CODE, drawn up by him for Syracuse, where he was a popular leader, 412 B.C. It was highly approved, and copied by other nations, and remained in force till superseded by the Roman laws, after the conquest, 212 B.C.

DIOCLETIAN ERA (called also the era of Martyrs, on account of the persecution in his reign) was used by Christian writers until the introduction of the Christian era in the 6th century, and is still employed by the Abyssinians and Copts. It dates from the day on which Diocletian was proclaimed emperor at Chalcedon, 29 Aug. 284.

DIONYSUS, the Greek god of wine, poetry, and music, called Bacchus after the 5th century B.C. His worship was introduced from Greece into Rome, and his festivals, termed Dionysia and Bacchanalia, were finally suppressed by the senate on account of their dissolute character. The Greek drama is said to have arisen out of the Bacchic festivals, 168 B.C.

DIOPTRIC SYSTEM (from the Greek, *dia*, through, and *optomai*, I see), an arrangement of lenses for refracting light in lighthouses, devised by Fresnel, about 1819, based on the discoveries of Buffon, Condorcet, Brewster, and others; see *Lighthouses.*

DIORAMA. This admired exhibition was first opened by MM. Bouton and Daguerre in Paris, 11 July, 1822; in London, 29 Sept. 1823. It was not successful commercially here, and was sold in 1848. The building in Regent's-park was purchased by sir S. M. Peto, in 1855, to be used as a Baptist chapel.

DIPHTHERIA (from the Greek *diphthera*, leather), a disease resembling croup which has the essential character of developing a false membrane on the mucous membrane connected with the throat. It was named *diphtheritis* by Brétonneau of Tours in 1820. From its prevalence in Boulogne, it has been termed the Boulogne sore-throat; many persons were affected with it in England at the beginning of 1858. The princess Alice, grand-duchess of Hesse-Darmstadt, died of this disease, 14 Dec. 1878, after nursing her husband and children.

Often epidemic in London, &c., 1891–95; origin and propagation uncertain.
Dr. Roux of Paris successfully applied the anti-toxin treatment of disease to diphtheria in 1894 by injecting into the patient's blood the serum of the blood of a horse previously rendered *immune* by a course of injections of the weak virus of diphtheria.
The treatment has been gradually developed from the discoveries of Löffler, Behring, Koch, and others in Germany. The Goldsmiths' company grant 1000*l.* for the prosecution of researches on the subject . . . . . Nov. 1894
Anti-toxin successfully used in . . . 1895–8

DIPLOMACY, the art of managing the relations of foreign states by means of ambassadors, envoys, consuls, chargés d'affaires, &c.; see *Ambassadors* and *Consuls.* New regulations for the British diplomatic service were issued 5 Sept. 1862.

DIPLOMAS. The wholesale fraudulent sale of diplomas of M.D., &c., for 10*l.*, by a Dr. Buchanan, dean of the American University of Philadelphia, and others, was detected in 1880. He attempted escape by a sham suicide, but was captured, prosecuted, and imprisoned.

DIPLOMATICS, the foreign term for the science of palæography or ancient writings. Valuable works on this subject have been compiled by Mabillon (1681), De Vaines (1774), Astle (1781), De Wailly (1838), and other antiquaries.

"DIRECTORY FOR THE PUBLIC WORSHIP OF GOD" was drawn up at the instance of the parliament by an assembly of divines at Westminster in 1644, after the suppression of the Book of Common Prayer. The general hints given were to be managed with discretion; for the Directory prescribed no form of prayer or manner of external worship, and enjoined the people to make no responses except *Amen.* It was adopted by the parliament of Scotland in 1645, and many of its regulations are still observed by presbyterians.

DIRECTORY, THE FRENCH, established by the constitution of the 5th of Fructidor, an III. (22 Aug. 1795), and nominated 1 Nov., was composed of five members (MM. Lépeaux, Letourneur, Rewbel, Barras, and Carnot). On 18 Fructidor, 4 Sep. 1797, two directors (Carnot and Barthélemy) were deposed, and afterwards, with other officials, transported to Cayenne for favouring royalty. The directory ruled in conjunction with two chambers, the Council of Ancients and Council of Five Hundred (*which see*), till the revolution of the 18th of Brumaire (9, 10 Nov. 1799). It was deposed by Bonaparte, who, with Cambacérès and Lebrun, assumed the government as three consuls, himself the first, 13 Dec. 1799; see *Consuls.*

DIRECTORY, the first LONDON, is said to have been printed in 1677. The "Post-office Directory" first appeared in 1800.

Messrs. Kelly's "Directory of the Merchants, Manufacturers, and Shippers of the United Kingdom,' was first published in 1877; at first triennially, now annually.

DIRECTORS' LIABILITY Act, relating to prospectuses, &c., of public companies, passed 18 Aug. 1890.

"DISCIPLES OF CHRIST" (also called CAMPBELLITES) profess adherence to pure Scriptural doctrine and practice, reject human creeds and formularies, and admit to their communion all who recognise Christ's obedience and death, as "the only meritorious cause of the sinner's acceptance with God;" and are baptized (by immersion) in his name.

The term Campbellite originated through their first church at Brush Run, in America, having been set up by a Scotch presbyterian preacher from Ireland, named Thomas Campbell, and his son Alexander. In 1812 they renounced infant baptism, and were rebaptized by immersion. Their number in America is said to be about 600,000; and in the United Kingdom, where the movement began independently and simultaneously, about 5000. They have also churches in the British colonies.

DISCIPLINE, ecclesiastical, originally conducted spiritually according to the divine commands in *Matt.* xviii. 15, 1 *Cor.* v., 2 *Thess.* iii. 6, and other texts, was gradually changed to a temporal character, as it now appears in the Roman, Greek, and other churches. The "First Book of Discipline" of the presbyterian church of Scotland was drawn up by John Knox and four ministers in Jan. 1560-1. The more important "Second Book" was prepared with great care in 1578 by Andrew Melville and a committee of the leading members of the general assembly. It lays down a thoroughly presbyterian form of government, defines the position of the ecclesiastical and civil powers, &c.

DISESTABLISHMENT. See *Church of Ireland.*

DISPENSARIES, to supply the poor with medical advice and medicines, began in London. The Royal General Dispensary, London, was established in St. Bartholomew's Close, in 1770. It relieved about 20,000 persons in 1861; about 17,000 in 1866. Western Dispensary, 1789. Garth's satirie poem, "The Dispensary," published 1699.

DISPENSATIONS, ecclesiastical, were first granted by pope Innocent III. in 1200. These exemptions from the discipline of the church, with indulgences, absolutions, &c., led eventually to the Reformation in Germany in 1517.

DISPENSING POWER OF THE CROWN (for setting aside laws or their power) asserted by some of our sovereigns, especially by Charles II. (in 1672 for the relief of nonconformists) and by James II. principally to enable Roman Catholics to hold civil and military offices, in 1686-8, was abolished by the bill of rights, 1689. It has been on certain occasions exercised, as in the case of embargoes upon ships, the Bank Charter act, &c.; see *Indemnity.*

DISSENTERS, the modern name of the *Puritans* and *Nonconformists* (*which see*). In 1851, in London, the number of chapels, meeting-houses, &c., for all classes of dissenters amounted to more than 554. (The Church of England had 458; Roman Catholics, 35.) The great act (9 Geo. IV. c. 17) for the relief of dissenters from civil and religious disabilities was passed 9 May, 1828. By this act, called the Corporation and Test Repeal act, so much of the several acts of preceding reigns as imposed the necessity of receiving the sacrament of the Lord's Supper as a qualification for certain offices, &c., was repealed. By 6 & 7 Will. IV. c. 85 (1836), dissenters acquired the right of solemnising marriages at their own chapels, or at a registry office. Another act passed in 1898; see *Worship in England*.

A Burials Bill to permit the ministers of dissenters to officiate at funerals in churchyards several times rejected; in the commons 248 to 234, 21 April, 1875; 279 to 248, 3 March, 1876; earl Granville's resolution in the lords rejected 148 to 92, 15 May, 1876.
Lord Harrowby's additional clause to the government burials bill (permitting dissenters to have religious services in churchyards), was supported by the archbishops, and carried against government, (127-111,) 18 June; the bill withdrawn, 25 June, 1877.

The Rev. W. H. Fremantle having proposed to preach at Dr. Parker's city temple, and the bishop of London having disapproved, the opinion of two counsel (Messrs. Fitzjames Stephen and Benjamin Shaw), was taken. They declared it to be illegal for the clergy of the English church to take part in worship of dissenters, June, 1875.
Several episcopal clergymen take part in the dedication services of Christ church (formerly Surrey chapel) Blackfriars, middle of July, 1876.

DISSOLVING VIEWS. Henry Langdon Childe, the alleged inventor, died 15 Oct. 1874, aged 92.

DISTAFF (or Rock), the staff to which flax or any substance to be spun is fastened. The art of spinning with it at the small wheel, first taught to English women by Anthony Bonavisa, an Italian. *Stow*. St. Distaff's or Rock day, was formerly the first free day after the Epiphany (6th Jan.) because the Christmas holidays were over and women's work was resumed.

DISTILLATION, and the various processes dependent on it, are believed to have been introduced into Europe by the Moors about 1150; see *Alcohol*, *Brandy*. The distillation of spirituous liquors was in practice in Great Britain in the 16th century. *Burns*. The processes were improved by Adam of Montpellier in 1801. M. Payen's work (1861) contains recent improvements. An act to prevent the use of stills by unlicensed persons was passed in 1846. 118 licences to distillers were granted in the year ending 31 March, 1858, for the United Kingdom.

M. Raoul Pictet announces a method of distillation by use of ice made by the air-pump, April, 1881.

DIVIDENDS OF PUBLIC STOCKS. By an act passed 11 Aug. 1869, these may be paid by post if the recipients desire it, as railway dividends are.

DIVINATION was forbidden to the Jews, B.C. 1451. (*Deut.* xviii. 9.) It was common among their neighbours: and is described by *Ezekiel* (xxi. 21) 493 B.C.

DIVINE RIGHT OF KINGS, the absolute and unqualified claim of hereditary sovereigns to the obedience of their subjects, a doctrine which is generally considered to be foreign to the genius of the English constitution, was defended by many persons of otherwise opposite opinions, *e.g.*, by James I., by Hobbes the free-thinker (1642), by Salmasius (1640), by sir Robert Filmer (about 1653), in his *Patriarcha*, published in 1680, and by the High Church party generally about 1714; but opposed by Milton (1651), Algernon Sydney, and others. The comte de Chambord, the last of the elder branch of the Bourbons, and the last consistent holder of the divine right of kings, died 24 Aug. 1883. See *France*, 1872, *et seq*.

DIVING-BELL (first mentioned, though obscurely, by Aristotle, about 325 B.C.) was used in Europe about A.D. 1509. It is said to have been used on the coast of Mull, in searching for the wreck of part of the Spanish Armada, before 1662. Halley (about 1716) greatly improved this machine, and was, it is said, the first who, by means of a diving-bell, set his foot on the ground at the bottom of the sea. Smeaton made use of the diving-bell in improving Ramsgate harbour, 1779-88. Mr. Spalding and his assistants going down in a diving-bell in Ireland were drowned, 1 June, 1783. The *Royal George* man-of-war, which was sunk off Portsmouth in 1782, was first surveyed by means of a diving-bell in May, 1817. Latterly it has been employed in submarine surveys and harbour works. The "*talpa marina*," or sea-mole, a diving machine for laying down torpedoes, &c., being a cylinder provided with compressed air sufficient for two persons for 50 hours, was invented by Toselli, a Venetian, and was successfully tried in the bay of Naples, 26 Aug. 1871. *Diving Dress*, a close dress made by Mr. Siebe about 1836; used by sir C. W. Pasley in 1838. M. Cabirol, maker of one, died Dec. 1874.

Mr. Fleuss invented a helmet with a mouthpiece into which he introduced enough oxygen to last five hours

and thus was enabled to remain under water several hours. He exhibited his method at the Polytechnic Institution, London, Nov. 1879, and at the Society of Arts, 6 May, 1880.

DIVINING ROD (*virgula divina*, *baculatorius*), formed of wood or metal, was formerly believed, even by educated persons, to have the property of indicating the position of minerals and springs of water. Instances were alleged in 1851 by Dr. H. Mayo, in his work on "Popular Superstitions."

DIVINITY, see *Theology* and *Mythology*.

DIVORCE was permitted by the law of Moses (*Deut.* xxiv. 1), 1451 B.C., but forbidden by Christ except for unchastity (*Matt.* v. 31, 32). It was put in practice by Spurius Carvilius Ruga at Rome, 234 B.C. At this time morals were so debased that 3000 prosecutions for adultery were enrolled. Divorces are of two kinds; one, *à vinculo matrimonii* (total divorce); the other *à mensâ et thoro* (from board and bed). Divorces were attempted to be made of more easy obtainment in England in 1539. The Judicature act, 1873, constituted the probate, divorce, and admiralty division of the High Court of Justice, with two judges. See *Supreme Court* and *Probate*.

Doctor of the Church was a title given to Athanasius, Basil, Gregory Nazianzen, and Chrysostom in the Greek church; and to Jerome, Augustin, Ambrose, and Gregory the Great in the Latin church; see *Fathers*. Afterwards the title of doctor only was conferred on certain persons with distinguishing epithets, viz.: Thomas Aquinas (Angelicus), Bonaventura (Seraphicus), Alexander de Hales (Irrefragabilis), Duns Scotus (Subtilis), Roger Bacon (Mirabilis), William Occam (Singularis), Joseph Gerson (Christianissimus), Thomas Bradwardine (Profundus), and so on. *Doctor of the Law*, was a title of honour among the Jews. The degree of doctor was conferred in England, 8 John, 1207. *Spelman*. DOCTORS' COMMONS, the college for the professors of civil and canon law in the 8th century. In February, 1568, Dr. Henry Hervie, dean of the arches and master of Trinity-hall (a seminary founded at Cambridge chiefly for the study of the civil and canon laws), procured from the dean and chapter of the diocese of London a lease of Montjoy-house and buildings in the parish of St. Benet, Paul's wharf, for the accommodation of the society. Other courts being held here, the whole place received the appellation of "Doctors' Commons." The original college was destroyed in the great fire of 1666; in 1672 it was rebuilt on the old site. After the great fire, until 1672, the society held its courts at Exeter-house in the Strand. It was incorporated by charter in June, 1768. *Coote*. The buildings of the College of Advocates, which included all the courts of Doctors' Commons, (arches, admiralty, consistory, &c.) were purchased by the Metropolitan Board of Works, and were pulled down in April, 1867, for the new Queen Victoria Street; some new buildings were erected. Till 1857 the causes taken cognizance of here were blasphemy, divorces, bastardy, adultery, penance, tithes, mortuaries, probate of wills, &c.; see *Ecclesiastical Courts*, *Civil Law*, &c.

The term has been applied in this country to the writers in the "Westminster Review" (1824, *et seq.*), Bentham, Molesworth, and others.

It was intended to be a register to determine the right in the tenure of estates*; and from it the question whether lands be ancient demesne or not, is sometimes still decided. The book, formerly kept in the Chapter-house of Westminster, is now in the Public Record Office. It consists of two volumes, a greater and less, wherein all the counties of England, except Northumberland, Durham, Westmorland, and Cumberland, are surveyed. "This Dome's-day book was the tax-book of kinge William." *Camden*. The taxes were levied according to this survey till 13 Hen. VIII., 1522, when a more accurate survey was taken, called by the people the New Doom's-Day-Book. Domes'-day Book was printed in 2 vols., folio, and issued in 1783; 2 supplemental vols., including an introduction by sir Henry Ellis, were issued in 1816. The French took Dominica in 1778, but restored it at the subsequent peace in 1783. Their admiral Villeneuve ineffectually attacked it in 1805. The seven days of the week, reckoned as beginning on the 1 Jan., are designated by the first seven letters of the alphabet, A (1 Jan.), B, C, D, E, F, G; and the one of these which denotes Sunday is the Dominical letter. If the year begin on Sunday, A is the Dominical letter; if on Monday, G; on Tuesday, F; and so on. Generally to find the Dominical letter call New Year's day A, the next B, and go on thus until you come to the first Sunday, and the letter that answers to it is the Dominical letter; in leap years count two letters. The letters for 1893, A; 1894, G; 1895, F; 1896, E D; 1897, C; 1898, B; 1899, A; 1900, G. The letter or its number (figure of 1 for A, &c.) used in ancient charters.

In 1276 the corporation of London gave the Dominicans two streets near the Thames, where they erected a large convent, whence that part is still called Blackfriars. A Dominican establishment at Haverstock hill, near London, was consecrated 10 Oct. 1867.

DORCHESTER (Oxfordshire) was once a bishopric, founded about 636. The first bishop Birinus, the apostle of the West Saxons (*which see*), was succeeded in 650 by Agilbert. In 659 the see was divided by the king. Dorchester remained with Agilbert, and Wina, established at Winchester, in 660 obtained the whole. The see of Dorchester was revived about 764. In 1072 the bishop Remigius de Feschamp removed the see to Lincoln.

DORCHESTER (Dorsetshire), the Roman *Durnovaria*, the Saxon *Dornceaster*. Here are found remains of a Roman theatre and of a British camp. Here Jefferies held his "bloody assize" (after Monmouth's rebellion) 3 Sept. 1685. Much excitement was caused by six labourers of Dorchester being sentenced to transportation 17 March, 1834, for administering illegal oaths. Population, 1881, 7,567; 1891, 7,946.

DORIANS, Greeks, who claimed descent from Dorus, son of Hellen; see *Greece.* The return of the Dorians, named Heraclidæ, to the Peloponnesus is dated 1104 B.C. They sent out many colonies. To them we owe the Doric architecture, the second of the five orders.

DORKING, Surrey, an ancient town; the manor having been given by the Conqueror to earl Fitzwarren. An imaginary battle of Dorking in which the German invaders totally defeat the British army is the subject of a clever article, attributed to gen. sir George Chesney, in Blackwood's Magazine for May, 1871. It provoked much controversy, and caused the publication of several pamphlets. Population, 1881, 6,328; 1891, 7,132.

DORMANS (N. E. France). The Huguenots and their allies, under Montmorency, were here defeated by the duke of Guise, 10 Oct. 1575.

DORT, or DORDRECHT, an ancient town in Holland. Here happened an inundation of the Meuse in 1421, through the breaking down of the dykes. In the territory of Dordrecht 10,000 persons perished; and more than 100,000 round Dollart, in Friesland, and in Zealand. The independence of the thirteen provinces was declared here in 1572, when William Prince of Orange was made stadtholder. A Protestant synod sat at Dort 13 Nov. 1618, to 25 May 1619; to which deputies were sent from England, and from the reformed churches in Europe, to settle the difference between the doctrines of Luther, Calvin, and Arminius, principally upon points of justification and grace. DOUAY (N. France), the Roman Duacum, was taken from the Flemings by Philip the Fair in 1297; restored by Charles V. in 1368. It reverted to Spain, from which it was taken by Louis XIV. in 1667. It was captured by the duke of Marlborough in June, 1710; and retaken by the French 8 Sept. 1712. This town gives its name to the Roman Catholic English version of the Bible authorised by the pope, the text being explained by notes of Roman divines. The Old Testament was published by the English college at Douay in 1609; the New had been published at Rheims in 1582. The English college for Roman Catholics was founded in 1568 by William Allen, afterwards cardinal. *Dodd.*

DOURO, a river (separating Spain and Portugal), which, after a desperate struggle between Wellington's advanced guard under Hill, and the French under Soult, was successfully crossed by the former on 12 May, 1809. So sudden was the movement, that Wellington at 4 o'clock sat down to the dinner prepared for the French general. *Alison.*

DOVER (Kent), the Roman Dubris. Near here Julius Cæsar is said to have first landed in England, 26 Aug., 55 B.C., and its original castle to have been built by him soon after; but this is disputed. The works were strengthened by Alfred and succeeding kings, and rebuilt by Henry II. The earliest named constable is Leopoldus de Bertie, in the reign of Ethelred II., followed by earl Godwin, Odo the brother of William I., &c. In modern times, this office, and that of warden of the Cinque Ports, have been frequently conferred on the prime minister for the time being,—*e.g.*, lord North, Mr. Pitt, lord Liverpool, and the duke of Wellington. The earl of Dalhousie, late governor-general for India, appointed in Jan. 1853, died 19 Dec. 1860. Lord Palmerston, appointed constable March, 1861, died 18 Oct. 1865. Earl Granville appointed Dec. 1865, died 31 March, 1891. W. H. Smith, appointed May, died 6 Oct. 1891. The marquis of Dufferin and Ava, about 4 Nov. 1891. DOWER, the gifts of a husband to a wife before marriage (*Genesis* xxxiv. 12). The portion of a man's lands or tenements which his wife enjoys for life after her husband's death. By the law of king Edmund, a widow was entitled to a moiety of her husband's lands or tenements for her life, 941. The widows of traitors, but not those of felons, are debarred their dower by statute 5 Edw. VI. 1551. By the Dower act passed in 1833, the power of the wife over her dower was much diminished.

DOWN (N. E. Ireland). An ancient see, first (bishop St. Cailan, in 499. At the instance of John de Courcy, the conqueror of Ulster, the cathedral, consecrated to the Trinity, was re-dedicated to St. Patrick about 1183. The sepulchre of St. Patrick (buried here in 493, in the abbey of Saul, founded by himself) brought this place into great repute. The see was united with that of Connor in 1441 (see *Connor*); and the see of Dromore was united to both by the Irish Church Temporalities act, 3 & 4 Will. IV. c. 37, Aug. 14, 1833. The cathedral of Downpatrick was destroyed by lord Grey, lord deputy of Ireland; for this and other crimes he was impeached and beheaded in 1541. *Beatson.*

DRACO'S LAWS (enacted by him when archon of Athens, 621 B. C.), on account of their severity, were said to be written in blood. Idleness was punished as severely as murder. This code was set aside by Solon's, 594 B. C.

DRAFTS (or cheques). In 1856, drafts crossed with a banker's name were made payable only to or through the same banker. This act was passed in consequence of a decision to the contrary in the case of Carlon *v.* Ireland, 12 Dec., 1855. In 1858 the crossing was made a material part of a cheque, but bankers are not held responsible when the crossing does not plainly appear, and a penny stamp was ordered to be affixed to drafts on bankers, commencing 25 May. In the case of Simmonds *v.* Taylor, May, 1858, it had been decided that the crossing formed no part of the draft. The crossing had been erased, and the money paid to the holder of the draft, who had stolen it.

The "*Cheque-bank*," established for issuing drafts for limited amounts, opened 23 July, 1873.
The payment of a stolen draft crossed on one banker and presented by another banker declared legal; Smith *v.* Union Bank of London: verdict for defendants, 29 Nov. 1875.

DRAINAGE OF LAND, in England, is of early date—remains of British works being still extant in the Fens district. Cornelius Vermuyden, the Dutch engineer, was invited to England in 1621, and amidst much opposition, he and his successors drained the districts termed the Great Levels; see *Levels.* In the present century great progress has been made in drainage. In 1861 was passed "an act to amend the laws relative to the drainage of land for agricultural purposes;" see *Sewers.*

DRESS. The attire of the Hebrew women is censured in *Isaiah* iii., about 760 B.C. Excess in dress among the early Romans was restrained by sumptuary laws: and also in England by numerous statutes, in 1363, 1465, 1570, &c. (see *Cap*). *Stow.* F. W. Fairholt's "Costume in England" (1846) contains a history of dress with numerous illustrations derived from MSS., the works of Strutt, &c. J. R. Planché's elaborate "Cyclopædia of Costume" first appeared in 1876. A "dress-making company" was established in London, 6 Feb. 1865, with the view of improving the condition of the workwomen.

Sir Walter Raleigh wore a white satin-pinked vest, close-sleeved to the wrist, and over the body a doublet finely flowered, and embroidered with pearls, and in the feather of his hat a large ruby and pearl drop at the bottom of the sprig in place of a button. His breeches, with his stockings and ribbon garters, fringed at the end, all white; and buff shoes, which, on great court days, were so gorgeously covered with precious stones as to have exceeded the value of 6600*l.*; and he had a suit of armour of solid silver, with sword and belt blazing with diamonds, rubies, and pearls.

The Bloomer Costume, introduced into America in 1849, by Mrs. Amelia Jenks Bloomer, and worn there by many of the women. It resembled male attire, being an open-fronted jacket and loose trowsers, the latter wide like those of the Turk, but gathered in at the ankles. The Bloomer dress was adopted by a few females in the west of London, in August, 1851; but though recommended by some American ladies in popular lectures, it was soon totally discontinued. Mrs. Bloomer warmly advocated the enfranchisement of women and other important reforms. She was born at Homer, New York, in 1818, and died at Council Bluffs, Iowa 30 Dec. 1894.

DROWNING, an ancient punishment. The ancient Britons are said to have inflicted death by drowning in a quagmire. *Stow*. It is said to have been inflicted on eighty intractable bishops near Nicomedia, A.D. 370; and to have been adopted as a punishment in France by Louis XI. The wholesale drownings of the royalists in the Loire at Nantes, by command of the brutal Carrier, Nov. 1793, were termed *Noyades*. 94 priests were drowned at one time. He was condemned to death in Dec. 1794. Societies for the *recovery of drowning persons* were first instituted in Holland, in 1767. DRURY-LANE THEATRE derives its origin from a cock-pit, which was converted into a theatre in the reign of James I. It was rebuilt and called the Phœnix; and Charles II. granted an exclusive patent to Thomas Killigrew, 25 April, 1662. The actors were called "the king's servants," and ten of them, called gentlemen of the great chamber, had an annual allowance of ten yards of scarlet cloth, with lace; see under *Theatres*. *Drury-lane Theatrical Fund*, established, 1766.

DRUSES, a warlike people dwelling among the mountains of Lebanon, derive their origin from a fanatical Mahometan sect which arose in Egypt about 996, and fled to Palestine to avoid persecution. They now retain hardly any of the religion of their ancestors: they eat pork and drink wine, and do not practise circumcision, pray, or fast. In the middle of 1860, in consequence of disputes (in which doubtless both parties were to blame), the Druses attacked their neighbours the Maronites (*which see*), whom they massacred, it was said, without regard to age or sex. Peace was made in July; but in the meantime a religious fury seized the Mahometan population of the neighbouring cities,

and a general massacre of Christians ensued. Fuad Pacha with Turkish troops, and general Hautpoul with French auxiliaries, invaded Lebanon in Aug. and Sept. The Druses surrendered, giving up their chiefs, Jan. 1861. See *Damascus* and *Syria*.

DUBLIN, Archbishopric of. It is supposed that the bishopric of Dublin was founded by St. Patrick, in 448. Gregory, bishop in 1121, became *archbishop* in 1152. It was united to Glandalagh in 1214. George Browne, an Augustine friar of London (deprived by queen Mary in 1554), was the first Protestant archbishop. Dublin has two cathedrals, St. Patrick's, said to have been founded 1190, restored 1865; Christ Church, built about 1038, made a cathedral in 1541. The revenue was valued, in the king's books, 30 Henry VIII., at 534*l.* 15*s.* 2*d.* Irish. Kildare, on its last avoidance, was annexed to Dublin, 1846; recent protestant archbishops: Richard Whately, 1831, dies 8 Oct. 1863; Richard Chenevix Trench, Nov. 1863, resigns 28 Nov. 1884 (dies 28 March, 1886); Wm. Conyng-

ham, lord Plunket, 18 Dec. 1884, dies 1 April, 1897; succeeded by Dr. J. F. Peacocke, 17 June, 1897. See *Bishops*. For R.C. abps. see *Dublin*.

DUDLEY GALLERY. The exhibition held since 1865 in the Egyptian Hall was removed to a new building in Piccadilly, under the direction of the Dudley Gallery Art Society, established in 1883.

DUELLING took its rise from the judicial combats of the Celtic nations. The first formal duel in England, between William count of Eu and Godfrey Baynard, took place 1096. Duelling in civil matters was forbidden in France, 1305. Francis I. challenged the emperor Charles V. 1528 without effect. The fight with small swords was introduced into England, 1587. Proclamation that no person should be pardoned who killed another in a duel, 1679.* Duelling was checked in the army, 1792; and has been abolished in England, by the influence of public opinion, aided by the prince consort. A society "for the discouraging of duelling" was established in 1845. "The British Code of Duel," published in 1824, was approved by the duke of Wellington and others. See *Battle, Wager of, Combat*, and *Jarnac*.

DUNBAR (Haddington). Here the Scottish army and king John Baliol were defeated by Warrenne, earl of Surrey, 27 April, 1296, and Scotland was subdued. Near here also Cromwell obtained a signal victory over the Scots, in arms for Charles II. 3 Sept. 1650.

DUNDALK (Louth, Ireland). On 5 Oct. 1318, at Foughard near this place, was defeated and slain Edward Bruce, who had invaded Ireland in 1315. The walls and fortifications of Dundalk were destroyed in 1641. It was taken by Cromwell in 1649. The first cambric manufacture in Ireland was established in this town by artisans from France in 1727.

DUNDEE (E. Scotland), on the Tay. The site was given by William the Lion (reigned 1165—1214) to his brother David, earl of Huntingdon, who built or strengthened the castle, and erected a large church, the tower of which, 156 feet high, still remains. Charter granted by Robert I. 1327. The town was taken by the English in 1385; pillaged by Montrose, 1645; stormed by Monk in 1651; and visited by queen Victoria in 1844. It has thriven since 1815, through its extensive linen manufactories; at one of these (Edwards's) a steam explosion took place on 15 April, 1859, when twenty persons were killed. Claverhouse, viscount Dundee (killed 1689), had a house here. See *Population*.

DUNGAN-HILL (Ireland). Here the English army, commanded by colonel Jones, signally defeated the Irish, of whom 6000 are said to have been slain, while the loss on the side of the English was inconsiderable, 8 Aug. 1647.

DUNKIRK (N. France), founded in the 7th century, was taken by the Spaniards, Sept. 1652, and retaken from them by the English and French after Turenne's victory over them under Condé on the *dunes* (or sands), 14 June, 1658, and put into the hands of the English, 25 June following. It was sold by Charles II. for 500,000*l.* to Louis XIV., 17 Oct.; restored 1662, and was one of the best fortified ports in the kingdom; but the works were demolished in conformity with the treaty of Utrecht in 1713. The earliest recorded claim for the bacon was in 1445, since when to 1855 it is said to have been demanded only five times.
The last claimants previous to 1855 were John Shakeshanks and his wife, 20 June, 1751; they made a large sum by selling slices of the flitch to witnesses of the ceremony (5000 persons).
Flitches were awarded to Mr. and Mrs. Barlow, of Chipping-Ongar, and the Chevalier Chatelaine and his lady, 19 July, 1855.
The lord of the manor opposed the revival, but Mr. W. Harrison Ainsworth, the novelist, and some friends, defrayed the expense, and superintended the ceremonials.
A flitch was awarded in 1860 and 9 July, 1873; on 17 July, 1876, to James Henry and Mary Boosey; to others 23 July, 1877; to 3 couples, 3 Aug. 1896; to 2 couples, 2 Aug. 1897.

DUST. A controversy respecting the connection between dust and disease originated with a lecture on the subject by professor Tyndall at the Royal Institution, 21 Jan. 1870, when he demonstrated the presence of organic matters in the dust of the atmosphere in conformity with the experiments of Pasteur and other eminent philosophers. See *Germ Theory* and *Vivisection*. The agency of dust in promoting fires and explosions was asserted by Faraday in relation to coal mines in 1845, and by Rankine and Macadam in relation to flour mills in 1872. Professor F. A. DUUMVIRI, two Roman patricians appointed by Tarquin the Proud 520 B.C. to take care of the books of the Sibyls, which were supposed to contain the fate of the Roman empire. The books were placed in the Capitol, and secured in a chest under the ground. The number of keepers was increased to ten (the Decemviri) 365 B.C., afterwards to fifteen, the added five called *quinque viri*.

DWARFS, OR PIGMIES, are described by several ancient classical writers. Herodotus gives an account of a race of pigmies living in Libya and the Syrtes, to which Aristotle and Pliny also refer. Mr. H. M. Stanley, in his journey across Africa in 1888, came upon a dwarfish race, which he thought might be descended from that mentioned by Herodotus. Philetas of Cos, distinguished about 330 B.C., as a poet and grammarian, was jocularly said to have carried weights to prevent his being blown away. He was preceptor to Ptolemy Philadelphus. *Ælian.* Julia, niece of Augustus, had a dwarf named Coropas, two feet and a hand's breadth high; and Andromeda, a freedmaid of Julia's, was of the same height. *Pliny.*

MODERN DWARFS.—John d'Estrix, of Mechlin, was brought to the duke of Parma, in 1592, when he was 35 years of age, having a long beard. He was skilled in languages, and not more than three feet high.
Geoffrey Hudson, an English dwarf, when a youth of 18 inches high, was served up to table in a cold pie, before the king and queen, by the duchess of Buckingham, in 1626. He challenged Mr. Crofts to fight a duel, but the latter came armed with a squirt. At another meeting the dwarf shot his antagonist dead, 1653.
Count Borowlaski, a Polish gentleman, of great accomplishments and elegant manners, well known in England, where he resided for many years, was born in Nov. 1739. His growth was at one year of age, 14 inches; at six, 17 inches; at twenty, 33 inches; and at thirty, 39. He had a sister, named Anastasia, seven years younger than himself, and so much shorter that she could stand under his arm. He visited many of the courts of Europe, and died in England in 1837.
Charles Heywood Stratton (termed general Tom Thumb), an American, was exhibited in England, by Mr. P. T. Barnum, 1846. In Feb. 1863, in New York, when 25 years old and 31 inches high, he married Lavini Warren, aged 21, 32 inches high. He, his wife nd child, and commodore Nutt, another dwarf, came to England in Dec. 1864, and remained here some time Died 15 July, 1883.
Mr. Collard, aged 22, smaller than Stratton, sang at concerts in London, and was termed the "Pocket Sims Reeves," May, June, 1873.
Several dwarfs (said to be smaller than the preceding) exhibited at the Westminster Aquarium, July, 1878.
Che-mah, a Chinese, 42 years old, 25 inches high, exhibited at the Westminster Aquarium, 11 June, 1880.
Lucia Zarate, born 2 Jan. 1863, in Mexico, height inches, weight 4¾ lbs., and general Mite, Francis Joseph Flynn, born 2 Oct. 1864, in New York State, height 21 inches, weight 9 lbs., exhibited in Piccadilly. 22 Nov 1880, *et seq.* Milly Edwards exhibited in London, July, 1882, 15 years of age, weighing 7 lbs.; these two were married at Manchester, 28 May, 1884.
"Princess Topaze," of French parentage, born at Buenos Ayres, stated to be 16 years of age, to weigh 15 lbs., height 20 inches, with symmetrical proportions, exhibited at the Westminster aquarium, 30 Jan. *et seq.* 1893.

DYEING is attributed to the Tyrians, about 1500 B.C. The English are said to have sent fine goods to be dyed in Holland, till the art was brought to them probably in 1608. "Two dyers of Exeter

were flogged for teaching their art *in the north*" (of England), 1628. A statute against abuses in dyeing passed in 1783. The art has been greatly improved by chemical research. A discovery of Dr. Stenhouse in 1848, led to M. Marnas procuring *mauve* from lichens; and Dr. Hofmann's production of aniline from coal-tar, has led to the invention of a number of beautiful dyes (mauve, magenta, red, green, black, &c.); see *Aniline*.

DYNAMICS is the science which treats of matter and motion recently substituted for "*mechanics*," *which see*. Professor W. K. Clifford's "Elements of Dynamics," 2 vols., 1878-87.

DYNAMITE, a new explosive compound, consisting of 25 parts of silicious earth saturated with 75 parts of nitro-glycerine (*which see*). It is suitable for mining purposes, and was tried and approved at Merstham 14 July, 1868. It was invented by Alfred Nobel to obviate danger. Its manufacture is very dangerous. Mr. Nobel died, 10 Dec. 1896; and bequeathed a fund of about 434,093*l.* to promote science. A preparation called "Safety" Dynamite, invented by Herr von Dahmen, who by the addition of a simple substance renders dynamite uncongealable, thus avoiding the danger of thawing in cold weather, 1889. Dynamite which cannot be frozen, invented by Herr Edward Liebert, of Berlin (very important, many deaths having been caused by thawing frozen dynamite); reported Aug. 1890. See *New York*, 28 Dec. 1892, and *Cannon*, 1891.

A man named Thomson, Thomassin, or Thomas, consigned a cask of dynamite to Bremerhafen, to be conveyed by the North German Lloyd steamer *Mosel*. With it he sent a clock-work machine, which would in eight days give the cask a blow powerful enough to explode the dynamite and destroy the ship. From some cause the machine went off and exploded in the dock, killing above 80 and wounding about 200 persons, chiefly emigrants and their friends, 11 Dec. 1875. Thomson committed suicide, dying 16 Dec. 1875, after confessing his crime, his object being to obtain the paltry sum for which he had insured his goods. It appears that similar machines were known in 1873.

DZOUNGARIA, a region of Central Asia, N. of China, with about 2,000,000 inhabitants, fierce, warlike Mahometans. After being long tributary to China, they rebelled in 1864, massacred the Chinese residents, and set up their countryman Abel Oghlan as sultan. As he was unable to restrain predatory attacks upon the Russians, the czar declared war in April, 1871. After a brief campaign in May and June, and several conflicts in which the Russians were victors, the sultan surrendered himself to general Kolpakoviski, 4 July, and the country was annexed to the Russian empire.

E.

EAGLE, an ancient coin of Ireland, made of a base metal, and current in the first years of Edward I. about 1272, was so named from the figure impressed upon it. The *American* gold coinage of eagles, half eagles, and quarter eagles, began 6 Dec. 1792; an eagle is of the value of 10 dollars, or about 2*l.* 1*s.*—The *standard of the eagle* was borne by the Persians, at Cunaxa, 401 B.C. The Romans carried gold and silver eagles as ensigns, and sometimes represented them with a thunderbolt in their talons, on the point of a spear, 102 B.C. Charlemagne added the second head to the eagle for his arms, to denote that the empires of Rome and Germany were united in him, A.D. 802. The eagle was the standard of Napoleon I. and Napoleon III.; as well as of Austria, Russia, and Prussia; see *Knighthood.*

EARL (Latin, *comes*), introduced at the conquest, superseded the Saxon ealdorman, and continued the highest rank in England, until Edward III. created dukes in 1337 and 1351, and Richard II. created marquises (1385), both above earls. Alfred used the title of earl as a substitute for king. William Fitz-Osborn was made earl of Hereford by William the Conqueror, 1066. Gilchrist was created earl of Angus, in Scotland, by king Malcolm III. in 1037, and sir John de Courcy created baron of Kingsale and earl of Ulster in Ireland, by Henry II. 1181.

EARL MARSHAL of England, the eighth great officer of state. This office, until it was made hereditary, always passed by grant from the king. Gilbert de Clare was created lord marshal by king Stephen, 1135. The last *lord* marshal was John Fitz-Alan, lord Maltravers. *Camden.* Richard II. in 1397 granted letters patent to the earl of Nottingham by the style of *earl* marshal. In 1672, Charles II. granted to Henry lord Howard the dignity of hereditary earl marshal. The earl marshal's court was abolished in 1641. (See *Howard.*)

EARL MARISCHAL of Scotland was an officer who commanded the cavalry, whereas the constable commanded the whole army; but they seem to have had a joint command, as all orders were addressed to "our constable and marischal." The office was never out of the Keith family. It was reserved at the Union, and when the heritable jurisdictions were bought, it reverted to the crown, being forfeited by the rebellion of George Keith, earl marischal, in 1715.

EARTHQUAKES. Kircher, Des Cartes, and others, supposed that there were many vast cavities under ground which have a communication with each other, some of which abound with water, others with exhalations, arising from inflammable substances, as nitre, bitumen, sulphur, &c. Dr. Stukeley and Dr. Priestley attributed earthquakes to electricity. They are probably due to steam generated by subterraneous heat. An elaborate Catalogue of earthquakes (from B.C. 1606 to A.D. 1842), with commentaries on the phenomena, by R. and J. W. Mallet, was published by the British Association in 1858. In 1860 the velocity of their propagation was estimated by Mr. J. Brown at between 470 and 530 feet per second.* Prof. John Milne, at the Royal Institution, London, 12 Feb. 1897, described his important researches in seismology, with special reference to Japan. See *Seismometer.*

EASTER, instituted about 68, the festival observed by the church in commemoration of Our Saviour's resurrection, so called in England from the Saxon goddess *Eostre*, whose festival was in April. After much contention between the eastern and western churches, it was ordained by the council of Nice, 325, to be observed on the same day throughout the whole Christian world. But the eastern and western churches generally differ; they coincided in 1882. "Easter-day is the Sunday following that fourteenth day of the calendar moon which happens upon or next after the 21st March: so that, if the said fourteenth day be a Sunday, Easter-day is not that Sunday but the next." Easter-day may be any day of the five weeks which commence with March 22 and end with April 25. The dispute between the old British church and the new Anglo-Saxon church respecting Easter was settled about 664.—Easter Sunday, 1893, 2 April; 1894, 25 Mar.; 1895, 14 April; 1896, 5 April; 1897, 18 April; 1898, 10 April; 1899, 2 April; 1900, 15 April.

EASTER ISLAND, in the Pacific Ocean, was discovered by Davis in 1686; it was visited by Roggewein, April 1722, and from him obtained the name it now bears; it was visited by captain Cook, March 1774. At the south-east extremity is the crater of an extinguished volcano, about two miles in circuit and 800 feet deep.

Prehistoric remains; about 555 stone images were examined by Mr. paymaster Thomson, of the U.S. navy, who gave a report to the national museum at Washington, Sept. 1892. The decaying population was then about 155.

The "Journal" (which began in 1795) contains profound mathematical papers. The school was reorganised 4 Sept. 1816. The pupils helped to defend Paris in 1814 and 1830. ECONOMIC MUSEUM (or Museum of Domestic and Sanitary Economy), at Twickenham, open free, was established chiefly by the agency of Mr. Thos. Twining, in 1860. It originated from the Paris exhibition of 1855. *Economic Review*, No. 1, published Jan. 1891.

ECONOMIST, London weekly journal, devoted to financial matters, first appeared 2 Sept. 1843.

ECONOMISTES, a philosophical sect, founded by François Quesnay (1694—1774), who exalted agriculture above all other arts; he asserted that it gave two things, the support of the labourer and an excess of value which belonged to the proprietor of the land ("product net"), and which alone should be taxed. He also favoured great freedom for industry and trade. His "Physiocratie" (1768), and other works, were at the time very popular, even at court, and are said to have influenced Adam Smith, author of "The Wealth of Nations."

ECONOMY, see *Political Economy*.

The British Association for the Advancement of Economic Knowledge was founded 20 Nov. Mr. G. J. Goschen elected first president, 23 Nov. 1890. A quarterly journal was founded . . 1893

ECORCHEURS (Flayers), bands of armed adventurers who desolated France and Belgium during the 15th century, beginning about 1435. Amongst their leaders were Chabannes, comte de Dammartin, the bastard of Armagnac, and Villandras; and they at one time numbered 100,000. They are said to have stripped their victims to their shirts, and flayed the cattle. They were favoured by the English invasion and the civil wars.

ECRASITE, an explosive invented by Siersch and Kubin, Austrian engineers, impervious to damp, shock, or fire, Oct. 1889.

EDDAS (thought formerly to mean *Oldemoder*, or "mother of mothers," by others, "art,") two books of songs and sagas (prose and verse) contain-

ing the Scandinavian mythology (or history of Odin, Thor, Frea, &c.), written by skalds or bards about the 10th, 11th or 12th centuries. Translations have been made into French, English, &c. "The Prose, or Younger Edda," by George Dasent, was published in 1842. MSS. of the Eddas exist at Copenhagen and Upsal. The "Saga Library," published by Mr. B. Quaritch, includes texts, with translations by Wm. Morris, Eiriker Magnússon, and Snorri Sturluson, 1891 *et seq.*

EDDYSTONE (or EDYSTONE) LIGHT-HOUSE, off the port of Plymouth, erected by the Trinity-house to enable ships to avoid the Eddystone rock. The first lighthouse was commenced under Mr. Winstanley, in 1696; finished in 1699; and destroyed in the dreadful tempest of 27 Nov. 1703, when Mr. Winstanley and others perished. A wooden one, by Rudyerd, was built by order of parliament, and all ships were ordered to pay one penny per ton inwards and outwards towards supporting it, 1708. This lighthouse was burnt 4 Dec. 1755; and one on a better plan, erected by Mr. Smeaton, finished 9 Oct. 1759. The woodwork of this, burnt in 1770, was replaced by stone.

The foundation having given way, a new one was designed by Mr. (aft. sir) James N. Douglass, engineer of the Trinity House. The foundation-stone was laid by the duke of Edinburgh in the presence of the prince of Wales, 19 Aug., 1879. The corner-stone was placed by the duke on 1 June, 1881. Successfully lit, 3 Feb. 1882; opened by the duke, 18 May, 1882.

Smeaton's light-house memorial tower erected at Plymouth; founded by duke of Edinburgh, 20 Oct. 1882. Inaugurated, 24 Sept. 1884.

EDEN, ship burnt; see *Wrecks*, 1873.

EDESSA (now Orfah), a town in Mesopotamia, said by some, to have been built by Nimrod; by Appian, to have been built by Seleucus. It became famous for its schools of theology in the 5th century. It was made a principality by the crusaders, and was taken by the Saracens, 1145; by Nur-ed-deen, in 1144; and the Turks in 1184. Its ancient kings or rulers were named Abgarus and Mannus.

EDGEHILL FIGHT (23 Oct. 1642), Warwickshire, between the royalists under prince Rupert and the parliament army under the earl of Essex, was the first important engagement in the civil war. Charles I. was present, and the earl of Lindsay, who headed the royal foot, was mortally wounded. The king lost 5000 dead. The action was indecisive, though the parliament claimed the victory.

EDICT OF NANTES, by which Henry IV. of France granted toleration to his protestant subjects, 13 April, 1598, was confirmed by Louis XIII. in 1610, and by Louis XIV. in 1652. It was revoked by Louis XIV. 22 Oct. 1685. This act cost France 50,000 Protestant families, and gave to England and Germany thousands of industrious artisans. It also caused a fierce insurrection in Languedoc. See *Camisards*. Some of the refugees settled in Spitalfields, where their descendants yet remain; others settled in Soho and St. Giles's, and pursued the art of making crystal glasses, and carried on the silk manufacture and jewellery, then little understood in England.

EDICTS, public ordinances and decrees, usually set forth by sovereigns; originated with the Romans. The PERPETUAL EDICT: Salvius Julianus, of Milan, a civilian at Rome (author of several treatises on public right), was employed by the emperor Adrian to draw up this body of laws for the prætors, promulgated 132.

EDINBURGH, the metropolis of Scotland, derives its name—in ancient records *Edinbure* and *Dun Edin*, "the hill of Edin"—from its castle, founded or rebuilt by Edwin, king of Northumbria, who, having greatly extended his dominions, erected it for the protection of his newly acquired territories from the incursions of the Scots and Picts, 626. But it is said the castle was first built by Camelon, king of the Picts, 330 B.C. It makes a conspicuous appearance, standing on a rock 300 feet high at the west end of the old town, and, before the use of great guns, was a fortification of considerable strength. Edinburgh returns 4 M.P.'s by act passed 25 June, 1885. "Municipal Edinburgh" (historical and official), published June, 1895. See *Population*.

Elba was conferred upon Napoleon (with the title of emperor) on his relinquishing the throne of France, 5 April, 1814. He secretly embarked hence with about 1200 men in hired feluccas, on the night of 25 Feb. 1815, landed in Provence, 1 March, and soon after recovered the crown; see *France*, 1815. Elba was resumed by the grand duke of Tuscany, July, 1815; was annexed to Sardinia, 1860, and included in the kingdom of Italy in 1870; population in 1893 about 24,000.

EL DORADO (the "Gilded Man"). When the Spaniards had conquered Mexico and Peru, they began to look for new sources of wealth, and having heard of a golden city ruled by a king or priest, smeared in oil and rolled in gold dust (which report was founded on a merely annual custom of the Indians), they organised various expeditions into the interior of South America, which were accompanied with disasters and crimes, about 1560. Raleigh's expeditions in search of gold in 1596 and 1617 led to his fall.

ELEASA, Palestine. Here Judas Maccabæus was defeated and slain by Bacchides and Alcimus, and the Syrians, about 161 B.C. (1 *Macc.* ix.)

ELEATIC SECT, founded at Elea in Sicily, by Xenophanes, of Colophon, about 535 B.C., whither he had been banished on account of his wild theory of God and nature. He supposed that the stars were extinguished every morning and rekindled at night; that eclipses were occasioned by a partial extinction of the sun; that there were several suns and moons for the convenience of the different climates of the earth, &c. *Strabo.* Zeno (about 364) was an Eleatic.

ELECTORS OF GERMANY. In the reign of Conrad I. king of Germany (912-918), the dukes and counts, from being merely officers, became gradually independent of the sovereign, and subsequently elected him. In the 13th century seven princes (the archbishops of Mentz, Treves, and Cologne, the king of Bohemia, the electors of Brandenburg and Saxony, and the elector Palatine), assumed the exclusive privilege of nominating the emperor. *Robertson.* An eighth elector (Bavaria) was made in 1648; and a ninth (Hanover) in 1692. The number was reduced to eight in 1777 (by the elector palatine acquiring Bavaria) and increased to ten at the peace of Luneville, in 1801. Professor Charles Wheatstone drew plans of a projected *submarine telegraph* between Dover and Calais 1840

Mr. John Watkins Brett (on behalf of his brother, Jacob Brett, the inventor and patentee), submitted a similar plan to Louis Philippe without success 1847

He obtained permission from Louis Napoleon to make a trial, 1847; took place . . 28 Aug. 1850

The connecting wires (27 miles long) were placed on the government pier in Dover harbour, and in the *Goliath* steamer were coiled about 30 miles in length of telegraphic wire, enclosed in a covering of gutta-percha, half an inch in diameter. The *Goliath* started from Dover, unrolling the telegraphic wire as it proceeded, and allowing it to drop to the bed of the sea. In the evening the steamer arrived on the French coast, and the wire was run up the cliff at cape Grisnez to its terminal station, and messages were sent to and fro between England and the French coast. But the wire, in settling into the sea-bottom, crossed a rocky ridge, and snapped in two, and thus the enterprise for that time failed.

New arrangements were soon made, and on a scale of greater magnitude; and the telegraph was opened; the opening and closing prices of the funds in Paris were known on the London stock exchange within business hours, and guns were fired at Dover by communication from Calais; this cable was laid by the late T. R. Crampton, 13 Nov. 1851

* Mr. W. H. Preece, F.R.S., president of the Institution of Electrical Engineers, at a meeting on 26 Jan. 1893, described the amazing progress of the applications of electricity since 1850, in telegraphy, railway signaling, telephony, lighting, chemistry, transmission of power, and traction. This system was successfully used in 1895, to telegraph across the Sound of Mull, when the submarine cable had broken down. Mr. Preece next exhibited and explained the apparatus by which Herzian waves of high frequency are utilized in the new system invented by Mr. Marconi, a young Italian, who brought it to England, in July, 1896, and who assisted at the lecture.—*Times*, 7 June, 1897. Atlantic Telegraph. A plan to unite Europe and America by telegraph was entered at the government registration office in June, 1845, by Mr. J. Watkins Brett and Mr. Jacob Brett, who made proposals to the government, which were not accepted. This scheme was carried out by a company in 1858, with the concurrence of the British and American governments.

2500 miles of wire were manufactured, and tested in March, 1857

The laying it down commenced at Valentia, in Ireland on . . . . . 5 Aug. ,,

The vessels employed were the *Niagara* and *Susquehanna* (American vessels), and the *Leopard* and *Agamemnon* (British vessels). After sailing a few miles the cable snapped. This was soon repaired; but on 11 Aug. after 300 miles of wire had been *paid out*, it snapped again (and the vessels returned to Plymouth) . . . 11 Aug. ,,

A second attempt to lay the cable failed through a violent storm, ... 20–21 June, 1858

The third voyage was successful. The junction between the two continents was completed by the laying down of 2050 miles of wire from Valentia, in Ireland, to Newfoundland; the engineer, sir Chas. Bright was knighted, aged 26. The first two messages, on 5 Aug., were from the queen of England to the president of the United States and his reply . . . . . 5 Aug. ,,

This event caused great rejoicing in both countries; but, unfortunately, the insulation of the wire gradually became more faulty, and after 271 messages had been sent and received the power of transmitting intelligence utterly ceased owing to the employment of too high battery power, 4 Sept. ,,

A new company was formed 1860

First cable to India laid by sir Chas. Bright for the government in 1864

The *Great Eastern* steamer, engaged to lay down 2300 miles of wire, with 25,000 tons burden, sailed for Valentia, Ireland, from the Thames, sir Samuel Canning, engineer in charge for contractors, sir C. Bright and Mr. Latimer Clark, consulting engineers to the company, accompanied by professor Wm. Thomson and Mr. Cromwell F. Varley, as electricians, 15 July, 1865

After connecting the wire with the land, the *Great Eastern* sailed from Valentia . . 23 July, ,,

Telegraphic communication with the vessel (interrupted by two faults, due to defective insulation, caused by pieces of metal pressed into the gutta-percha coating, which were immediately repaired) finally ceased on 2 Aug. The apparatus for raising the wire proving insufficient, the vessel returned, and arrived at the Medway 19 Aug. ,,

Atlantic telegraph company reconstituted as the Anglo-American telegraph company limited, March, 1866

The *Great Eastern*, with a new cable, sailed from the Medway, 30 June; the shore-end at Valentia was spliced with the main cable, and the *Great Eastern* sailed, 13 July; 1200 miles of cable had been laid, 22 July; the cable was completely laid at Heart's Content, Newfoundland, and a message sent to lord Stanley, 27 July; message from the queen to president of the United States sent, 28 July, "From the queen, Osborne, to the president of the United States, Washington. The queen congratulates the president on the successful completion of an undertaking which she hopes may serve as an additional bond of union between the United States and England." To which he replied . . . . . 30 July, ,,

The lost cable of 1865 recovered, 2 Sept.; and its laying completed at Newfoundland . 8 Sept. ,,

The *Great Eastern* arrived at Liverpool . 19 Sept. ,,

Baronetcies conferred on Messrs. Curtis Lampson, John Pender, Daniel Gooch, R. R. Glass, Samuel Canning: prof. Wm. Thomson and capt. James Anderson, chief promoters of the company, were knighted . . . Oct. ,,

[It was stated (in Sept. 1866) that the engineer of the cable passed signals through 3700 miles of wire by means of a battery formed in a lady's thimble.]

The U. S. congress voted a gold medal to Cyrus Field, for his exertions connected with Atlantic telegraphs . . . . . 7 March, 1867

ELECTRIC CLOCK, &c. Professor Wheatstone invented an electro-magnetic telegraph clock in 1840. Clocks worked by electricity, invented by Mr. Alexander Bain, Mr. Shepherd, and others, appeared in the exhibition of 1851. An electric clock, with four dials, illuminated at night, was set up for some time in front of the office of the electric telegraph company, in the Strand, London, July, 1852. A time-ball was set up by Mr. French, in Cornhill, in 1856. In 1860, Mr. C. V. Walker so connected the clock of the Greenwich observatory with that of the South-eastern station, London, that they could be controlled by electricity.

A committee of the House of Commons appointed "to consider whether it is desirable to authorize municipal corporations or other local authorities to adopt any schemes for lighting by electricity" (Dr. Lyon Playfair, chairman), reports: "The energy of one-horse power may be converted into gaslight, and yields a luminosity equal to 12-candle power. But the same amount of energy transformed into electric light produces 1,600-candle power. . . . Scientific witnesses considered that in the future the electric current might be extensively used to transmit power as well as light to considerable distances, so that the power applied to mechanical purposes during the day might be made available for light during the night. . . . There seems to be no reason to doubt that the electric light has established itself for lighthouse illumination, and is fitted to illumine large symmetrical places, such as squares, public halls, railway stations, and workshops. . . . Compared with gas, the economy for equal illumination does not yet appear to be conclusively established. . . . Gas companies, in the opinion of your committee, have no special claims to be considered as the future distributors of electric light . . . Your committee, however, do not consider that the time has yet arrived to give general powers to private electric companies to break up the streets, unless by consent of the local authorities."—*Times*. . . . . 19 June, 1880

ELEGY. Elegiac verse (consisting of a hexameter and pentameter alternately) was the first variation from the hexameter or epic measure, used by Tyrtæus and other early poets. The elegies of Ovid and Catullus are celebrated. Gray's "Elegy, written in a country churchyard," was published in 1749.

Another act (for agricultural districts, &c.,) brought in by lord Sandon, 18 May, 1876; royal assent, 15 Aug. 1876. Another combining act passed 5 Aug. 1891. See *Education*.

ELEMENTS were formerly reckoned as four: earth, air, fire and water. Lavoisier enunciated the principle that all bodies which cannot be proved to be compounded are elements, and to be treated as such. Mr. W. Crookes, (knt. 1897), F.R.S., in a lecture at the Royal Institution, London, by delicate experiments demonstrated that yttrium is a compound body, and expounded a theory that all the elements have been evolved from what he termed *Protyle*, 18 Feb. 1887. Above twelve new elements said to have been discovered in rare earths by MM. Krüss and Nilson by the spectroscope in 1887. Mr. Crookes declared Didymium to be a compound body. See *Table*, and separate articles. The chemical elements were stated to be about 77 in 1881.*

Seventy elements recognized in 1892. See *Argon*.

ELEPHANT, in the earliest times trained to war. The history of the Maccabees informs us, that "to every elephant they appointed 1000 men armed with coats of mail, and 500 horse: and upon the elephants were strong towers of wood, &c." The elephants in the army of Antiochus were provoked to fight by showing them the "blood of grapes and mulberries." The first elephant said to have been seen in England was one of enormous size, presented by the king of France to our Henry III. in 1238. *Baker's Chron.* Polyænus states that Cæsar brought one to Britain 54 B.C., which terrified the inhabitants greatly. See *Knighthood*. 13 elephants in lord mayor's procession, 9 Nov. 1876.

Chunee, an elephant 13 feet high, in Cross's menagerie, Exeter Change, London, becoming dangerous, was shot, receiving 180 musket balls before he fell, 1 March, 1826.

A young elephant brought into Court of Exchequer to show his peaceful character, in a suit for damages for frightening a pony at the Alexandra Palace, 18 July, 1879.

* Mr Joseph Norman Lockyer, in a paper read at the Royal Society, 12 Dec. 1878, expressed doubts of the elementary character of some of the following substances based on his spectroscopic experiments. His views were not supported by the researches of professors Dewar and Liveing, 1880–81. See *Chlorine*. Professor Mendeléef classified the elements into 7 groups or families; each having special properties. His "Principles of Chemistry" (in English), published 1898.

Barnum, the American showman, bought, for 2,000*l.*, the large male African elephant Jumbo, 6 tons weight, of the Zoological Society, Regent's Park, London. Jumbo refused to go 18 Feb. After much trouble he was removed in the night, 22–23 March, and placed in the *Assyrian Monarch*, 24 March; arrived at New York, 9 April, 1882; killed on the railway, 15 Sept. 1885.

A so-called white elephant (little differing from others), named Toung Taloung, bought by Mr. Barnum from the king of Siam, arrived at Liverpool, 14 Jan., at Zoological gardens, London, 17 Jan.; left 12 March, 1884; burnt with Alice, "Jumbo's wife," and others at the destruction of Mr. Barnum's show and menagerie at Bridgeport, U.S., by fire, 20 Nov. 1887.

Joseph Merrick, deformed, termed the "elephant man," supported at the London hospital, 1886 *et seq.*

"Jung Pasha" given to the "Zoo" by the Prince of Wales on his return from India in 1876; died 8 March, 1896.

ELEUSINIAN MYSTERIES. The institution of these annual secret religious ceremonies in honour of Demeter (Ceres) at Athens, is traditionally attributed to Cadmus, 1550; to Erechtheus, 1399; or to Eumolpus, 1356 B.C. If any one revealed them, he was to be put to death. They were introduced from Eleusis into Rome, lasted about 1800 years, and were abolished by Theodosius A.D. 389. The laws were—1. To honour parents; 2. To honour the gods with the fruits of the earth; 3. Not to treat brutes with cruelty. Cicero makes the civilisation of mankind one of the beneficial effects of the Eleusinian mysteries. During the excavations carried on by the Greek archæological society on the site of Eleusis in 1895, interesting ancient relics were discovered.

ELGIN MARBLES, derived chiefly from the Parthenon, a temple of Minerva, on the Acropolis at Athens, of which they formed part of the frieze and pediment, the work of Phidias, under the government of Pericles, about 440 B.C. Thomas earl of Elgin began the collection of these marbles during his mission to the Ottoman Porte, in 1802; and from him they were purchased by the British government for 35,000*l.* and placed in the British Museum, in 1816. The ship conveying them was wrecked near Cerigo, and Mr. W. R. Hamilton, who was on board, remained several months at Cerigo, and recovered them from the sea.

ELGUETA, N. Spain; near here the Carlists defeated the republicans under gen. Sorna, and took 600 prisoners, 5-6 Aug. 1873.

ELINGA, W. Spain. Here P. Scipio Africanus totally defeated the Carthagenians under Hasdrubal Gisco, which led to their expulsion from the country, 206 B.C.

ELIS, a Greek state termed the "Holy Land," in the Peloponnesus, founded by the Heraclidæ, 1103 B.C. Here Iphitus revived the Olympic games, 884, which were regularly celebrated after Corœbus gained the prize in 776. Elis surrendered many towns to the Spartans in war, 400. After various changes, Elis joined the Achæan league, 274; and with the rest of Greece was subjugated by the Romans in 146.

ELIZABETHAN SOCIETY. Lecture by the president, Mr. Sidney Lee, on "Thomas Nash," 5 Dec. 1894.

Elizabethan Stage Society, founded in 1895 to promote the performance of Shakespeare's plays in a manner resembling that of his time; "Twelfth Night" was so performed, under the direction of Mr. Wm. Poel, at Burlington Hall, London, 21 June; "Comedy of Errors," at Gray's Inn, 6 Dec., 1895; Marlowe's "Faustus," July, 1896. Other plays since, "Tempest," at the Mansion House, 2 Nov. 1897.

ELL (so named from *ulna*, the arm) was fixed at 45 inches, by king Henry I. in 1101. The old French ell, or *aune*, was 46·790 inches.

ELLISON GALLERY. In April, 1860, Mrs. Elizabeth Ellison (in conformity with the wish of her deceased husband, Richard), presented to the South Kensington Museum a series of 50 original water-colour drawings, by the first masters.

ELLORA or **ELORA**, Central India; remarkable for its very ancient rock-cut temple; excavated according to Hindoo legends nearly 7000 years ago; but more probably about 800 A.D. The town was ceded to the British by Holkar in 1818, and transferred by them to the Nizam of the Deccan in 1822.

ELMINA (originally named La Mina, from the gold found here), and Dutch Guinea, W. Africa, were ceded by the Dutch government by treaty, signed Feb. 1872, and consolidated with the West African settlements; first governor, Mr., after Sir John, Pope Hennessy, April, 1872. See *Ashantees*.

EL-OBEID, Battle of, 3-5 Nov. 1884. See *Soudan*.

ELOPEMENT. A wife who departs from her husband, loses her dower by the statute of Westm. 1285—unless her husband, without coercion of the church, be reconciled to her. Earlier laws punished elopement with death when adultery followed.

ELPHIN (Ireland). St. Patrick founded a cathedral near Elphin, in the 5th century, and placed over it St. Asicus, whom he created bishop, and who soon after filled it with monks. After many centuries, Roscommon, Ardcarn, Drumclive, and others of less note, were also annexed to Elphin, which became one of the richest sees in Ireland. It is valued in the king's books, by an extent returned 28 Eliz., at 103*l.* 18*s.* sterling. The see was united to Kilmore in 1841, under the provisions of the Church Temporalities act, passed Aug. 1833.

ELSINORE, Zealand, Denmark, formerly the station for receiving the Sound dues (*which see*). Population, 1890, 11,082.

ELSWICK, a township of Newcastle-on-Tyne. the site of the great works of lord Armstrong & Co. The engineering department began about 1847, the ordnance works in 1857, see *Cannon*. Since then the naval construction has been largely carried on. About 14,000 workmen employed in 1888 and about 19,000 in 1896. The works were visited by the Chinese grand secretary, Li Hung Chang, who specially examined the *Esmeralda*, 1st class cruiser, completed for the Chilian Republic, 20 Aug., 1896.

EL-TEB, Battle of, 29 Feb. 1884. See *Soudan*.

ELY, an island in Cambridgeshire, on which a church was built about 673, by Etheldreda, queen of Egfrid, king of Northumberland; she also founded a religious house, filled it with virgins, and became herself first abbess. The 1200th anniversary was celebrated 17-21 Oct. 1873; about 60,000*l.* had then been spent on the restoration of the cathedral. The Danes ruined the convent about 870; but a monastery was built in 879, on which king Edgar and succeeding monarchs bestowed great privileges and grants of land; whereby it became the richest in England. Richard, the eleventh abbot, wishing to free himself from the bishop of Lincoln, made great interest with Henry I. to get Ely erected into a bishopric, 1108, and his successor Hervæus was the first prelate, 1109. It is valued in the king's books at 2134*l.* 18*s.* 5*d.*; present stated income, 5500*l.* Population in 1881, 8,171; 1891, 8,017.

ELZEVIR, or ELSEVIER, a family of printers, in Holland, whose reputation is based on fine pocket editions of the classics.

Louis, the founder, was born in 1540; began business at Leyden in 1580; he printed about 150 works, and died 4 Feb. 1617. His sons (especially Bonaventure) and grandsons, were celebrated for their work.

EMANCIPATION, see *Roman Catholics* and *Slavery*. The Emancipation Society for slaves lasted 1862-5.

EMANUEL HOSPITAL, Westminster, founded in 1594 by lady Anne Dacre for aged people and children. Its original annual income had increased from 360*l.* to about 4000*l.* in 1870, when changes in the disposition of the funds were proposed by the Charity Commissioners, and some effected. Through reduction of income to about 800*l.* the buildings decay, and the number of inmates decrease, reported Jan. 1890. The proposed change of site much opposed, 1892.

EMBALMING. The ancient Egyptians believing that their souls, after many thousand years, would reinhabit their bodies, if preserved entire, embalmed the dead. Some of the bodies, called *mummies*, buried 3000 years ago, are still perfect. "The physicians embalmed Israel," 1689 B.C. *Gen.* l. 2; see *Mummies*. Carbolic acid was successfully employed by professor Seely in America, in 1868.

The most perfect specimens of *modern embalming* are preserved in the museum of the royal college of surgeons, one being the body of the wife of Van Butchell, preserved by John Hunter by injecting camphorated spirits of wine, &c., into the arteries and veins; and the other the body of a young woman, who died about 1780 of consumption, in the Lock hospital. The method of embalming royal personages in modern times is fully described in Hunter's "Posthumous Works." He died in 1793.—During the American War (1861-5), many soldiers' bodies were embalmed and sent home.

Improvements in embalming made by Prof. Laskowski of Geneva, 1885.

EMBANKMENTS of earth were erected by the ancients for preservation from their enemies and the inundations of the tide. Those of the Egyptians and Babylonians are described by Herodotus and Strabo. To the Romans are attributed the first dykes of Holland, and the embankments of Romney Marsh, considered to be the oldest in Britain. In 1250 Henry III. issued a writ enforcing the support of these works; and his successors followed his example. James I. greatly encouraged the embankment of the Thames. Sir W. Dugdale's "History of Embanking" first appeared in 1662; see *Drainage*, *Levels*, and *Thames*. Since 1830, millions of pounds have been expended in embankments for railways.

EMBARGO, from the Spanish *embargar*, to detain, applied to the restraining ships from sailing. This power is vested in the crown, but is rarely exercised except in extreme cases, and sometimes as a prelude to war. The most memorable instances of embargo were those for the prevention of corn going out of the kingdom in 1766; and for the detention of all Russian, Danish, and Swedish ships in the several ports of the kingdom, owing to the armed neutrality, 14 Jan. 1801; see *Armed Neutrality*.

EMBER WEEKS, instituted, it is said, by pope Callixtus I. (219-223), to implore the blessing of God on the produce of the earth by prayer and fasting, in which penitents used to sprinkle the ashes (embers) of humiliation on their heads. In the English church the *Ember days* are the Wednesday, Friday, and Saturday, after the following days—the first Sunday in Lent, Whit-sunday, 14 Sept. (Holy Cross), and 13 Dec. (St. Lucia).

EMBROIDERY is usually ascribed to the Phrygians; but the Sidonians excelled in it, and it is mentioned in 1491 B.C. *Exodus* xxxv. 35 and xxxviii. 23. See *Bayeux Tapestry*. Embroidery is now done by machinery. The first embroidery machine is said to have been invented by John Duncan of Glasgow in 1804. Heilman's embroidery machine was patented by Köchlin. *Berlin Wool-work* has been much improved of late years by the production of more elegant patterns, first published by Mr. Wittich in Berlin, about 1810.

EMERALD, a precious stone, of a green colour, found in the East and in Peru. It has been erroneously alleged that there were no true emeralds in Europe before the conquest of Peru; but there is one in the Paris Museum, taken from the mitre of pope Julius II. who died in 1513, and Peru was not conquered till 1545. It is stated that there were mines at Gebel Zabâra worked by Egyptians, 1800 B.C.

EMERGENCY MEN, a name given to the more energetic members of the Irish Defence Association; and especially to the men engaged in carrying out evictions in Ireland. See *Mansion House Funds*, 1881.

EMESA, now Hems, Syria, renowned for a temple of the sun, the priest of which, Bassianus, was proclaimed emperor with the name Heliogabalus or Elagabalus, 218. His atrocities led to his assassination, 11 March, 222.

EMIGRANTS. The French aristocracy and clergy (*émigrés*) began to leave their country in July, 1789, at the breaking out of the revolution: their estates were confiscated in Dec. A large number returned in 1802, by an amnesty granted after the peace of Amiens. Many were indemnified after the restoration in 1815.

EMIGRATION. Phœnician and Greek emigrants colonised the coasts of the Mediterranean and the Black Sea; see *Magna Græcia*, *Marseilles*, &c. The discovery of America opened a vast field for emigration, which was restrained by Charles I. in 1637. It has been greatly encouraged since 1819. Regulations for emigration were made in 1831, and in Jan. 1840, the Colonial Land and Emigration Board was established. Emigration much promoted through want of employment in London, 1869-70; from Ireland, by act passed, 1883. Much emigration from Great Britain and Germany to America, 1881-5. Fare of steerage passengers from Britain to America by steamers reduced to about 4*l.* Jan. 1883.

ENAMELLING was practised by the Egyptians, Chinese, and other nations, and was known in England in the time of the Saxons. At Oxford is an enamelled jewel, which belonged to Alfred, and which, as appears by the inscription, was made by his order, in his reign, about 887. Limoges enamelled ware was popular in the 16th century. Magnificent specimens by Lepec, Elkington, Emanuel, and others, appeared at the exhibition at Paris, 1867. See *Mosaic*. On 19 June, 1862, madame Rachel (Levison or Leverson) sued captain Carnegie for 928*l.* for *enamelling his wife's face*, and was nonsuited; see *Trials*, 1868. She was convicted of fraud in 1878; and died in prison 12 Oct. 1880. See *Trials*.

ENCÆNIA, Greek festivals kept on days on which cities were built and temples consecrated; and in later times, as at Oxford, at the celebration or commemoration of founders and benefactors. *Oldisworth*. The public commemoration at Oxford suspended in 1875; restored, 21 June, 1876. They were the origin of church-wakes in England, about 600. They were also feasts celebrated by the Jews on the 25th of the ninth month, in commemoration of the Maccabees cleansing the temple, which had been polluted by Antiochus Epiphanes, 131 B.C.

ENCAUSTIC PAINTING, enamelling by fire. Painting with burnt wax is said to have been known to Praxiteles about 360 B.C. This art was revived by M. Bachelier, 1749, by count Caylus, 1765, and by Miss Greenland, 1785 and 1792.

ENCYCLOPÆDIA or CYCLOPÆDIA, a general dictionary of art, science, and literature. This name has been given to a work by Abulpharagius in the 13th century.

"De Proprietatibus Rerum," an encyclopædic work in Latin, attributed to Bartholomeus Anglicus, a Franciscan (proved to be incorrectly named *Glanville*), was written about 1248 and 1267, and translated into several languages. The first English version, by John of Trevisa, a Wycliffite, in 1397, was printed between 1495–1582, and was doubtless the source from which Shakspeare, Spenser, and other writers derived much of their knowledge of natural history, &c., "Mediæval lore: being classified Gleanings," from this work, edited by Robert Steele, published, 1893.

ENDERBY LAND, see *Southern Continent*.

ENDOSMOSIS. M. Dutrochet, about 1826, found that if two fluids, gases or vapours, of unequal density, are separated by an animal or vegetable membrane, the denser will attract the less dense through the medium. This property he called *endosmose*, when the attraction is from the outside to the inside, and *exosmose* when it operates from the inside to the outside. Many natural phenomena are thus more clearly understood. *Brande*.

ENDOWED SCHOOL COMMISSION (consisting of lord Lyttelton, canon Robinson, and others), was appointed under the act 32-33 Vict. c. 56 (2 Aug. 1869). It threw open many endowments to the nation, and carried out reforms, being frequently much opposed. By an act passed 7 Aug. 1874, its duties were transferred to the charity commissioners, two new commissioners (Mr. Longley, lord Clinton), and canon Robinson being appointed. The commissioners had dealt with 74 schools; prepared schemes for 66; leaving about 660 to be dealt with; Aug. 1874.

ENDOWED SCHOOLS ACT, containing the "Conscience Clause," passed 1860; another similar act passed 2 Aug. 1869. A committee reported on the working of the act, June, 1887.

ENERGY. In an address to the British Association at York, 1 Sept. 1881, sir William Thomson described the sources of all the energy in nature available to man for the production of mechanical effect, as tides, food, fuel, wind and rain, all except the tides derived from the sun.

ENFIELD, N. Middlesex; a manor belonging to the duchy of Lancaster, is mentioned in Domesday, and was given to De Mandeville by William I. after 1066. After various changes it became the property of the crown by the marriage of Mary, heiress of the Bohuns, to Henry duke of Lancaster, afterwards king Henry IV. 1399. Edward VI. gave it to his sister Elizabeth, who resided here in 1552, in a palace, part of which still remains. The grammar school was founded about 1586. The ancient chase was dischased and enclosed, after 1 Jan. 1779. Population, 1881, 18,944; 1891, 31,532.

The body was exhumed, 20 March, 1816.

ENGINEERS, Military, formerly called Trench-masters. Sir William Pelham officiated as trench-master in 1622; the chief engineer was called camp-master-general in 1634. Capt. Thomas Rudd had the rank of chief engineer to the king about 1650. The corps of engineers was formerly a civil corps, but was made a military force, and directed to rank with the artillery, 25 April, 1787. It has a colonel-in-chief, 16 colonels-commandant, and 16 colonels. *Civil Engineering* became important in the middle of the last century, when Smeaton began the Eddystone lighthouse, and Brindley the Bridgewater canal. Since then the Rennies, Telford, the Stephensons and Brunels, Locke, and others have constructed breakwaters, docks, bridges, railways, tunnels, &c., which are the marvel of our age.

"*Engineering* is the art of directing the great sources of power in nature for the use and convenience of man." (*Thos. Tredgold*, died 1829.)

ENGLAND (from *Angles* and *lond*, land), so named, it is said, by Egbert, first king of the English, in a general council held at Winchester, 829; or by Athelstan, 925. See *Anglo-Saxons*. England was united to Wales, 1283; to Scotland in 1603; they have had the same legislature since 1707, when the three were styled Great Britain. James I. first adopted the title of king of England, Scotland, afterwards Great Britain, France, and Ireland. After the treaty of Amiens, signed 27 March, 1802, France was omitted from the royal style. Ireland was incorporated with them, by the act of legislative union, 1 Jan. 1801, as the United Kingdom of Great Britain, France, and Ireland. The British empire is computed to contain about 9,023,620 square miles of territory, with 340,220,000 inhabitants. Statistical details are given under the respective headings; *Army*, *Navy*, *Revenue*, *Population*, &c. Population of England and Wales, 1891, 29,001,018. Letter from the queen, to the empire
(*London Gazette*, 2 *Feb.*)
"Osborne, *January* 26, 1892.

"I must once again give expression to my deep sense of the loyalty and affectionate sympathy evinced by my subjects in every part of my empire on an occasion more sad and tragical than any but one which has befallen me and mine, as well as the nation. The overwhelming misfortune of my dearly loved grandson having been thus suddenly cut off in the flower of his age, full of promise for the future, amiable and gentle, and endearing himself to all, renders it hard for his sorely stricken parents, his dear young bride, and his fond grandmother to bow in submission to the inscrutable decrees of providence.

"The sympathy of millions, which has been so touchingly and visibly expressed, is deeply gratifying at such a time, and I wish, both in my own name and that of my children, to express from my heart, my warm gratitude to *all*.

"These testimonies of sympathy with us, and appreciation of my dear grandson, whom I loved as a son, and whose devotion to me was as great as that of a son, will be a help and consolation to me and mine in our affliction.

"My bereavements during the last thirty years of my reign have indeed been heavy. Though the labours, anxieties, and responsibilities inseparable from my position have been great, yet it is my earnest prayer that God may continue to give me health and strength to work for the good and happiness of my dear Country and Empire while life lasts. "Victoria, R.I."

For its libellous character, the editor was disbenched by the society of Gray's Inn, 1 Aug. 1874; ordered to give up his chambers by vice-chancellor, 29 June, 1876. He died 16 April, 1880.

ENGRAVING on signets is mentioned *Exod.* xxviii. 11 (B.C. 1491). Engraving on plates and wood began about the middle of the 15th century. Engraving on glass was perfected by Bourdier, of Paris, 1799. The copyright to engravings has been protected by several statutes; among the principal are the acts 16 & 18 Geo. III. 1775 and 1777; and the acts 7 & 8 Vict. 6 Aug. 1844, and 15 Vict. 28 May, 1852. A process of enlarging and reducing engravings by means of sheets of vulcanised india-rubber, was shown by the electro-printing block company in 1860; see *Lithography* and *Photo-Galvanography*. In "Lyra Germanica," published in 1861, are illustrations engraved upon blocks photographed from negatives taken by John Leighton, F.S.A.

The art is referred by some to a Florentine, and by others to Reuss, a German; it was greatly improved by Dürer (1471-1528) and Lucas van Leyden (1497). It was much improved in England by Bewick and his brother, and pupils, Nesbitt, Anderson, &c. 1789 *et seq.* The earliest wood engraving which has reached our times is one representing St. Christopher carrying the infant Jesus over the sea; it bears date 1423.

Barabbe of Paris was distinguished for his improvements in this kind of engraving, 1763. *Chiar'-oscuro* engraving originated with the Germans, and was first practised by Mair, one of whose prints bears date 1491 (see *Zinc*, &c.)

EQUINOX. When the sun in his progress passes through the equator in one of the equinoctial points, the day and night are equal all over the globe. This occurs twice in the year: about 21 March, the *vernal* equinox, and 22 Sept., the *autumnal* equinox. The equinoctial points move backwards about 50 seconds yearly, requiring 25,000 years to accomplish a complete revolution. This is called the *precession* of the equinoxes, which is said to have been observed by the ancient astronomers.

EQUITY, COURTS OF, are those of the lord chancellor, the vice-chancellors, and the master of the rolls, their office being to correct the operations of the literal text of the law, and supply its defects by reasonable construction not admissible in a court of law. The supreme court of session in Scotland combines the functions of law and equity. In 1865 equity powers were conferred on the county courts for cases respecting sums under 500*l.* See *Supreme Court*, in which law and equity are combined.

ERASTIANISM, the opinions of Thomas Lieber (latinised *Erastus*), a German physician (1524-83), who taught that the church had no right to exclude any person from church ordinances, to inflict excommunication, &c. Persons who acknowledge the jurisdiction of the civil power in spiritual matters and the law of patronage are now termed Erastians.

ERASURES. By order of sir John Romilly, master of the rolls, in 1855, no document corrected by erasure with the knife was to be henceforth received in his court. The errors must be corrected with the pen. It is so in the army courts.

ERDINGTON ORPHANAGE, &c.; see *Orphans'-houses*.

ERFURT (Central Germany), was founded in 476; and its university established about 1390. Erfurt was ceded to Prussia in 1802. It capitulated to Murat, when 14,000 Prussian troops surrendered, 16 Oct. 1806. In this city Napoleon and Alexander met, and offered peace to England, 27 Sept. 1808. The French retreated to Erfurt from Leipsic, 18 Oct. 1813. A German parliament met here in March and April, 1850. Population, 1890, 72,371.

ERICSSON'S CALORIC ENGINE, see *Heat*, note.

ERIVAN (Armenia), in the 16th century the residence of the shahs of Persia, was taken by the Turks in 1553 and 1582; but recovered by Abbas the Great, 1604. After being several times captured, it was ceded to Persia, 1769. It was taken by Paskiewitch in 1827, and annexed to Russia by treaty in Feb. 1828.

ERYTHREA, a new Italian colony on the Red Sea, established by royal decree, 2 Jan. 1890. Military occupation to be restricted to Massowah, announced, May, 1897; Sig. F. Martini appointed governor, 21 Nov. 1897. See *Massowah*.

ERZEROUM (Asiatic Turkey), a city built by Theodosius II., 415; taken by the Seljuk Turks in the 13th century, and by the Ottoman Turks in 1517. It was captured by the Russian general Paskiewitch, June, 1829, but restored in 1830. It was almost totally destroyed by earthquakes, 2 June to 17 July, 1859. Population in 1885, 60,000.

ESCHEAT, the reverting of any land or tenements to the lord of the fee, or to the state, through failure of heirs; formerly also through attainder of the tenant, which last was abolished by the Felony Act, 1870.

ESCOMBRERA BAY, BATTLE OF; see *Spain*, 11 Oct. 1873.

ESCURIAL, properly ESCORIAL (25 miles N.W. of Madrid), the magnificent palace of the sovereigns of Spain, termed the eighth wonder of the world, was commenced by Philip II. in 1563, and completed in 1586, at a cost of about 10,000,000*l.* It is built in the form of a gridiron in honour of St. Lawrence, on whose day (10 Aug. 1557) the Spaniards gained the victory of St. Quentin. According to Francisco de los Santos the total length of all its rooms and apartments is above 120 English miles. The Escurial comprises a church, mausoleum, monastery, palace, library, and museum. It was struck by lightning and caught fire 11.30 p.m. 1 Oct. 1872, and was much damaged; but the grand library and other treasures were preserved.

ESPARTO, from the Latin *spartum*, *stipa tenacissima* of Linnæus, a Spanish grass used by Romans for whip-thongs, and now largely employed in paper-making. In 1856 about 50 tons, in 1870 above 100,000 tons, and in 1890, 403,263 tons, were imported into Britain. The price has risen from 4*l.* to 10*l.* per ton. Living plants were received at Newcastle, July, 1867.

ESPIERRES (Belgium). At Pont-à-Chin, near this village, the French, under Pichegru, attacked the allied English and Austrian army (100,000 men), commanded by the duke of York, and were repulsed after a long and desperate engagement, losing the advantages gained by the victory at Turcoing, 22 May, 1794.

ESPRIT, SAINT (or Holy Ghost), the title of an order of knighthood, founded by Henry III. of France in 1578, and abolished in 1791.

ESQUIRES, among the Greeks and Romans, were armour-bearers to, or attendants on a knight. *Blount*. In England the king created esquires by putting about their necks the collars of SS, and bestowing upon them a pair of silver spurs. John de Kingston was created a squire by patent, 13 Richard II., 1389-90. There are now legally esquires by birth, by creation, and by holding some office, but the title is very loosely given by courtesy.

"ESSAYS AND REVIEWS," by six clergymen and one layman of the church of England (the Rev. Drs. Fred. Temple and Rowland Williams, professor Baden Powell, H. B. Wilson, Mark Pattison, and professor B. Jowett, and Mr. C. W. Goodwin) were published in an 8vo vol. in March, 1860. The book did not excite much attention at first, but having been severely censured for hetero-

dox views by nearly all the bishops and many of the clergy, it created much excitement in 1861, and was condemned by convocation 24 June, 1864. The ecclesiastical courts sentenced the revs. R. Williams and H. B. Wilson to suspension for one year, and costs, 15 Dec. 1862; but on appeal the sentence was reversed by the judicial committee of the privy council, 8 Feb. 1864. The most remarkable amongst the works put forth in opposition (in 1862) are the "Aids to Faith," edited by the bishop of Gloucester (W. Thomson, aft. abp. of York), and "Replies to Essays and Reviews," edited by the bishop of Oxford (S. Wilberforce). The election of Dr. Temple to the see of Exeter was much opposed on account of his essay in this collection; see *Church of England*, 1869.

ESSENES, an ascetic Jewish sect at the time of Christ.

ESSEN, a town in Rhenish Prussia, which began with the Benedictine nunnery, about 873. Among the iron and steel manufactories, the chief are those of Krupp, established 1810, in which were employed 74 men in 1848, and 20,960 in 1888, when the works contained 1,195 furnaces, 92 steam-hammers, 370 steam-engines, and other great apparatus. A Christian miners' congress held, 424 delegates present; opposed to the social democrats, 26 Aug. 1894. See *Cannon*. Population, 1890, 78,723. See *Westphalia*, 1889.

ESTE, HOUSE OF. Boniface, count of Lucca and duke of Tuscany, about 811, is said to have descended from Odoacer, king of Italy. From Boniface sprang Albert Azzo II. marquis of Italy and lord of Este, born about 996, who married—first, Cunegonda of the house of Guelf, by whom he had Guelf, duke of Bavaria, the ancestor of the house of Brunswick (see *Bavaria* and *Brunswick*); and secondly, Gersonda, by whom he had Fulk, the ancestor of the Estes, dukes of Ferrara and Modena.

Population, 1886, 395,979.

ETCHING, see *Engraving*.

ETHER was known to the earliest chemists. Nitric ether was first discovered by Kunkel, in 1681; and muriatic ether, from the chloride of tin, by Courtanvaux, in 1759. Acetic ether was discovered by count Lauraguais, same year; and hydriotic ether was first prepared by Gay-Lussac. The phosphoric ether was obtained by M. Boullay. The discovery that by *inhaling ether* the patient is rendered unconscious of pain, is due to Dr. C. T. Jackson, of Boston, U. S. Mr. Thomas Morton, of the same place, first introduced it into surgical practice, under Dr. Jackson's directions (1846); see *Chloroform*, and *Amylene*. The drinking of ether as an intoxicant greatly increased in the north of Ireland, was checked by the enforcement of the Poisons Act of 1870, in regard to its sale, Oct. 1891. The term "ether" was applied to the transparent celestial space by the German astronomer Encke, about 1829, when studying the elements of Pons' comet, discovered in 1818. Ether is now believed by scientists to be the medium by which heat, light, electricity, etc., are transmitted through space. See *Wireless Telegraphy* under *Electricity*, 1897.

ETHICS (Greek term for *Morals*). The works of Plato, Aristotle, and Confucius, contain heathen systems; the New Testament is that of Christianity. Paley's Moral Philosophy appeared in 1785, and Whewell's Elements of Morality in 1845. An Ethical Society existed in London, 1890. Mr. Herbert Spencer's "Principles of Ethics," 2 vols., published in sections, 1879–93. Moral instruction league formed in London, 7 Dec. 1897.

ETHIOPIA. The name was applied anciently rather vaguely to countries the inhabitants of which had *sun-burnt* complexions, in Asia and Africa; but is now considered to apply properly to the modern Nubia, Sennaar, and Northern Abyssinia. Many pyramids exist at Napata, the capital of Meroë, the civilised part of ancient Ethiopia.

ETHNOLOGY, a branch of Anthropology, is defined as the science "which determines the distinctive characters of the persistent modifications of mankind, their distribution, and the causes of the modifications and distribution." The study of the relations of the different divisions of mankind to each other is of recent origin. Balbi's Ethnographic Atlas was published in 1826, and Dr. Prichard's great work, *Researches on the Physical History of Mankind*, 1841-7. The Ethnological Society, established in 1843, published transactions. On 17 Jan. 1871, it was amalgamated with the Anthropological Society, (*which see*) and named the Anthropological Institute. Dr. R. G. Latham's works, on the Ethnology of the British Empire, appeared in 1851-2. Professor T. H. Huxley gave lectures on Ethnology at the Royal Institution, London, in 1866-7. Annual reports of the Bureau of Ethnology, Washington, U.S., began to be published, 1879. The International Congress of the Ethnographic Sciences met at Paris Sept. 30, 1889.

ETHYL, a compound radicle, a colourless gas, with a slightly ethereal odour, a compound of carbon and hydrogen, first obtained in the free state by professor Edw. Frankland in 1849. Several of its compounds with metals take fire in the air.

ETNA, MOUNT (Sicily). Here were the fabled forges of the Cyclops: and it is called by Pindar the pillar of heaven. Eruptions are mentioned by Diodorus Siculus as happening 1693 B.C., and Thucydides speaks of three eruptions as occurring 734, 477, and 425 B.C. There were eruptions, 125, 121, and 43 B.C. *Livy.*

ETON COLLEGE (Buckinghamshire), founded by Henry VI. in 1440, and designed as a nursery to King's College, Cambridge. John Stanbery, confessor to Henry VI. (bishop of Bangor, in 1448), was nominated the first provost. One of the provosts, William Waynflete, (bishop of Winchester, 1447) greatly promoted the erection of the buildings. Besides about three hundred noblemen's and gentlemen's sons, there were seventy king's scholars on the foundation, who, when properly qualified, were formerly elected, on the first Tuesday in August, to King's College, Cambridge, and removed there when there were vacancies, according to seniority. The establishment of the *Montem* is nearly coeval with the college. It consisted in the procession of the scholars, arrayed in fancy dresses, to Salt-hill once in three years; the donations collected on the road (sometimes as much as 800*l.*) were given to the senior or best scholar, their captain, for his support while studying at Cambridge. The montem was discontinued in 1847. The college system was modified by the Public Schools act, 1868. In 1873 election Saturday ceased, the scholars to be students at Cambridge being chosen there. In 1880 there were 853 students; in 1891, 1,007.

ETRURIA (or TUSCIA, hence the modern name Tuscany), a province of Italy, whence the Romans, in a great measure, derived their laws, customs, and superstitions. Herodotus asserts that the country was conquered by a colony of Lydians. The subjugation of this country forms an important part of early Roman history. It was most powerful under Porsena of Clusium, who attempted to reinstate the Tarquins, 506 B.C. Veii was taken by Camillus, 396 B.C. A truce between the Romans and Etrurians for forty years was concluded, 351 B.C. The latter and their allies were defeated at the Vadimonian lake, 310, with the Boii their allies, 283 B.C., and totally lost their independence about 265 B.C. The vases and other works of the Etruscans still remaining show the degree of their civilisation. Napoleon I. established a kingdom of Etruria, 1801, and suppressed it 1807, see *Tuscany.*—"The Cities and Cemeteries of Etruria," by George Dennis, published 1848 and 1878. *Etruria*, Staffordshire, the site of Josiah Wedgwood's porcelain works, &c., was founded in 1771.

EUBŒA, the largest island in the Ægean sea. Two of its cities, Chalcis and Eretria, were very important, till the former was subdued by Athens, 506 B.C. and the latter by the Persians, 490. After the Persian war, Eubœa became wholly subject to Athens, and was its most valuable possession. It revolted in 445, but was soon subdued by Pericles. After the battle of Chæronea, 338, it became subject to Macedon. It was made independent by the Romans in 194; but was afterwards incorporated in the province of Achaia. It now forms part of the kingdom of Greece.

EUCALYPTUS GLOBULUS, or Blue Gum Tree, a very fast growing Tasmanian evergreen, of the order *Myrtaceæ*. From the extraordinary power of its roots of absorbing moisture, and the salutary aromatic odour of its leaves, it has been found highly beneficial in counteracting the malaria of marshy districts of hot climates, and hence has been named the fever-destroying tree. M. Ramel first sent seeds from Melbourne to Paris in 1854, and subsequently seeds were distributed over the south of Europe, the north and south of Africa, and elsewhere. He died in 1881.

So rapid is the growth of this tree, that a forest may be formed in twenty years. It sometimes reaches the height of 350 feet, with a circumference of 100 feet, rivalling *Wellingtonia gigantea*, which see.

The timber, bark, and oils of the Eucalyptus are highly valuable, and professor Bentley says that the genus is one of the most important to man in the vegetable kingdom. In 1874 its medicinal value was said to have been exaggerated.

EUCHARIST, thanksgiving, an early name for the Lord's Supper; see *Sacrament.*

EUCLID'S ELEMENTS. Euclid, a native of Alexandria, flourished about 323-283 B.C. The

Elements are not wholly his; for many of the demonstrations were derived from Thales, Pythagoras, Eudoxus, and others; Euclid reduced them to order, and probably inserted many theorems of his own. The *Elements* were first printed at Basil by Simon Grynæus, in 1533. Euclid is said to have told king Ptolemy that there was no royal road to geometry.

EUDIOMETER, an apparatus to ascertain the purity of atmospheric air, or the quantity of oxygen gas or vital air contained in it; one was invented by Marsilio Landriani, and described by him in his "Ricerche," 1775; Dr. Priestley is said to have first used Fontana's eudiometer in 1770. *Gmelin.*

EUGENICS, see *Heredity.*

EUGUBINE TABLES, seven tablets of brass, probable date about 400 B.C., (with inscriptions relating to sacrifices, &c., four in Umbrian, two Latin, and one partly in both dialects), were discovered in 1444 at Gubbio, the ancient Eugubium or Iguvium. The inscriptions are accurately given by Lepsius, in his "Inscriptiones Umbricæ et Oscæ," 1841.

EUNUCHS, first mentioned among the Egyptians and Assyrians, and said to have been first employed by Semiramis, queen of Assyria, about 2007 B.C. Eunuchs frequently attained to political power in the later Eastern empire.

EUPATORIA (KOSLEFF), a sea-port on the west coast of the Crimea. After the allied French, English, and Turkish armies landed in the Crimea, 14 Sept. 1854, a detachment under captain Brock occupied this place, which was afterwards reinforced by the Turks. It was attacked 17 Feb. 1855, by 40,000 Russians under Liprandi. The latter were repulsed with the loss of 500 men by the Turks, whose loss was only 50, among which, however, was Selim Pasha, the commander of the Egyptian contingent.

EUPHRATES, the largest river in Western Asia. It rises in Armenia, and has two branches. On its banks are the remains of numerous ancient cities, such as Babylon and Birs Nimrúd. The Euphrates Valley Railway, as a speedy means of reaching India, has been much advocated, especially by the late general Chesney, who published his survey of the Euphrates and Tigris in 1850. A parliamentary commission reported on it, Aug. 1872, when it was also considered at the meeting of the British association at Brighton. The construction would cost from five to ten millions sterling, and its advantages are considered rather hypothetical by the best judges.

EUPHUISM, an affected style of language, prevalent in the time of Elizabeth, arose from "Euphues; the Anatomy of Wit," by John Lyly, published in 1581.

EURASIAN PLAIN, the great central plain of Europe and Asia, so named by ethnologists (1865). The offspring of a European father and an Asiatic mother is termed Eurasian. The degraded condition of the Eurasians, which has caused much anxiety, especially at Calcutta, was discussed early in 1891. The Marchioness of Dufferin was deeply interested in the matter about 1884.

EUROPE, the smallest of the three divisions of the old continent, really an appendage of Asia; area, nearly 3,800,000 square miles; population, 301,700,000 (1872); 310,675,966 (1877); 330,321,680 (1884) 333,054,908 (1888); 357,379,000 (1891); nearly 370,000,000 (1898). For the history, see *Greece*, *Rome*, and the modern kingdoms.

EUSTACE, ST. (Lower Canada). The rebels were defeated here, 14 Dec. 1837, and compelled to surrender their arms. Their chiefs fled.

EUSTATIUS, ST., a West India island, settled by the Dutch, 1632; taken by the French in 1689; by the British in 1690; again by the British forces under Rodney and Vaughan, 3 Feb. 1781. It was recovered by the French under the marquis de Bouillé, 26 Nov. same year; captured by the British, 1801, 1810; restored to the Dutch, 1814.

EUTAW SPRINGS (S. Carolina). Here the Americans were defeated by the British under Arnold, 8 Sept. 1781.

EUTYCHIANS, so called from Eutyches, an abbot of Constantinople, who asserted in 446 that there was but one nature in Christ, the human having been absorbed in the divine. This doctrine was condemned by councils—at Constantinople in 448, and at Chalcedon in 451. It has been also called *Monophysite* (of one nature), and *Jacobite*, from Jacobus Baradæus, its zealous defender in the 6th century. It is the form of Christianity now existing among the Copts and Armenians.

EVANGELICAL, a term applied to a portion of the clergy of the church of England (also called the low church), who profess to preach the gospel more purely than their brethren termed the high church party; see *Church of England* and *Free Church.*

The Evangelical Alliance was founded by sir Culling Eardley Smith and others at Liverpool in 1845, with the view of promoting unity among all denominations of Protestant Christians against Romanism and infidelity.

At a general meeting held in London 19 Aug. 1846, 921 members were present from all parts of the world.

Since 1845, annual meetings have been held in various towns in the United Kingdom.

General international conferences have been held: London, 1851; Paris, 1855; Berlin (received by the king), Sept., 1857; Geneva, 1861; Amsterdam, 1867; New York, Oct., 1873; Basle, 1879; Copenhagen, 1885; Florence, 4 April, 1891; Exeter-hall, London, 29 June, 1896.

The "Evangelical Church" in Germany began with a fusion of the Lutherans and Calvinists in Nassau in 1817; followed by similar movements in different parts of Germany, 1818-22.

A conference termed *Reunion* was held at Grindelwald, Switzerland, to promote a protestant union, July; it closed 15 Sept. 1892; at Lucerne, Sept. 1893; when annual conferences were decided upon.

EVANGELISTS, preachers of the "gospel," or good news; see *Gospels.*

EVELINA HOSPITAL, Southwark, established in 1869 by baron Ferdinand de Rothschild, in memory of his wife, and since maintained by him. Its enlargement by public aid was proposed in 1871.

EVENING SCHOOLS for adults of the lower classes were strongly recommended by bishop Hinds in 1839, and by the committee of the Privy Council on Education in 1861. One was set up at Bala in Wales by the rev. T. Charles in 1811. See under *Recreation*.

EVESHAM (Worcestershire), where prince Edward, afterwards Edward I., defeated the barons headed by Simon de Montfort, earl of Leicester, 4 Aug. 1265, when the earl, his son Henry, and most of his adherents were slain. Henry III. at one period of the battle was on the point of being cut down by a soldier who did not know him, but was saved by exclaiming, "Do not kill me, soldier; I am Henry of Winchester, thy king!" This victory broke up the combination of the barons.

Prisoners in certain criminal cases were permitted for the first time in England to give evidence on their own behalf in 1872, and the practice has been legalised with good effect by 26 acts up to 1897.
The Evidence in Criminal Cases Act which makes this practice uniform in all cases, was passed 12 Aug. 1898

EVIL MAY-DAY (1 May, 1517), thus called on account of the violence of the apprentices and populace, directed against foreigners, particularly the French. The rioters were headed by one Lincoln, who, with 15 others, was hanged; and 400 more in their shirts, and bound with ropes, and halters about their necks, were carried to Westminster; but they crying "Mercy, mercy!" were all pardoned by the king, Henry VIII.

EVOLUTION THEORY includes the nebular theory and Mr. Darwin's doctrine of natural selection; see *Development*, and *Progressionists*.

In 1877 three forms of evolution were discussed:— 1. That of all animals gradually from the lowest form, the amœba, up to man, in opposition to the Biblical account of the creation; 2. that of every animal from protoplasm in a cell, or egg; 3. that of all the parts of an animal from its blood.

EXALTATION, see *Cross*.

EXAMINATIONS of candidates for employment in the civil service has been enforced since 1855. Mr. Gladstone in 1862 said that the present might be termed the "age of examinations;" see *Civil Service*.

A strong protest against the system, fully signed, *Nineteenth Century*, Nov. 1888.

EXAMINER, liberal weekly journal, established Jan. 1808; last number, 26 Feb. 1881.

EXAMINER OF STAGE PLAYS, an office under the lord chamberlain, held by Mr. E. F. S. Pigott, appointed 25 Aug. 1874; died 23 Feb.; succeeded by Mr. G. A. Redford, March, 1895. His more recent predecessors were, George Colman, Chas. Kemble, John Mitchell Kemble, and Mr. Wm. Bodham Donne (1857-74).

EXARCHS, appointed by the Byzantine emperors of the East, to govern central Italy after its conquest by Belisarius and Narses, 548-553. They rule Ravenna from 568 to 752, when Eutychus, the last, was overcome by Astolphus the Lombard. The Exarch in the church was next in dignity to the patriarch.

EXCHANGE, formerly *Bourse*, the Royal Exchange being "Britain's Burse;" that at Paris is still named "*La Bourse*," from *bursa*, a purse. One called *Collegium Mercatorum* existed at Rome, 493 B.C. The Exchange at Amsterdam was reckoned the finest structure of the kind in the world. See *Royal Exchange*, and *Bills of Exchange*.

EXCHEQUER, an ancient institution, consisting of officers with financial and judicial functions: the chancellor of the exchequer, the financial officer, formerly sat in the court of exchequer above the barons. The first chancellor was Eustace de Fauconbridge, bishop of London, in the reign of Henry III. about 1221. Sir Robert Walpole was the last chancellor of the exchequer who acted judicially (in 1735). The legal function of the chancellor was abolished by the Judicature act, Aug. 1873. Charles II. seized on the Goldsmiths' funds in the exchequer to prepare for war, 2 Jan. 1672. The English and Irish exchequers were consolidated by parliament in 1817; see *Chancellors of the Exchequers*, and *Tally Office*.

EXCHEQUER BILLS. The government securities, so called, said to have been invented by Montague, afterwards earl of Halifax, were first issued in 1697, and first circulated by the bank in 1796. These bills, of which more than twenty millions sterling are often in circulation, are in effect accommodation notes of government, that are issued in anticipation of taxes, at daily interest; and being received for taxes, and paid by the bank in lieu of taxes, in its dealings with the exchequer, they usually bear a premium. Amount in circulation, 56,974,780*l.* in 1817; in 1854, 16,008,700*l.*

Robert Aslett, a cashier of the bank of England, tried for embezzling exchequer bills, and found *not guilty*, on account of the invalidity of the bills, though the actual loss to the bank amounted to 342,697*l.*, 18 July, 1803.

Mr Beaumont Smith tried for forging exchequer bills to the amount of 350,000*l.*; pleaded guilty; sentenced to transportation, 4 Dec. 1841.

EXCHEQUER BONDS, a species of public securities, introduced by Mr. W. E. Gladstone, in 1853, have not been well received.

TELLERS OF THE EXCHEQUER. Besides chamberlains of the exchequer, clerks of the pells, and auditor of the exchequer (offices which have all been discontinued since their last avoidance in Oct. 1826, or by surrender or abolition, in Oct. 1834), there were the four lucrative offices of *tellers* of the exchequer, also abolished, 10 Oct. 1834.

John Jeffreys Pratt, earl, afterwards marquis Camden, was appointed a teller of the exchequer, in 1780, and held the appointment until his death, in 1840. During nearly half of this long term he relinquished the income (amounting in the whole to upwards of a quarter of a million sterling) and placed it at the service of the state, as it annually accrued.

COMPTROLLER-GENERAL OF THE EXCHEQUER. This office was created on the abolition of the offices of the auditor and the four tellers of the exchequer, and the clerk of the pells, mentioned in the preceding paragraph. The first comptroller-general was sir John Newport, appointed 11 Oct. 1834.—34,438*l. per annum* have been saved to the state by the retrenchments in this department of the government.

COURT OF EXCHEQUER CHAMBER. Erected by Edward III. in 1357. It was remodelled by Elizabeth, in 1584, and then made to comprise the judges of all the courts. This court is for error from the judgments of the courts of queen's bench, common pleas, and exchequer of pleas in actions commenced therein. Re-modelled by act 2 Geo. IV. & 1 Will. IV. c. 70 (23 July, 1830).

The Exchequer office, Westminster, was instituted by Henry IV. in 1399.

EXCHEQUER, COURT OF (*Curia Regis*), instituted by William I. on the model of the Transmarine Exchequer of Normandy, in 1079; according to some authorities, by Henry I. It included the common pleas until they were separated, 16 John, 1215. *Coke's Reports.* The exchequer is so named from a chequered cloth which anciently covered the table where the judges and chief officers sat.* Here are tried all causes relating to the king's revenue; such as are concerning accounts, disbursements, customs, and fines imposed, as well as all matters at common law between subject and subject. The judges are styled barons, first appointed 1234. There were a chief and four puisne barons: the fifth judge having been added 23 July, 1830. The office of Cursitor Baron was abolished in 1856. For changes, see *Supreme Court.* The ancient court sat for last time, 10 July, 1875. The Exchequer division was abolished in 1881; in Ireland in 1887. See *Supreme Court Judicature Act*, passed 27 Aug. 1881.

EXCISE. The system was established in England by the Long Parliament in 1643, duties being levied on wines, beer, &c., and tobacco, to support the army against Charles I. It was continued under Charles II. Sir Robert Walpole's plan for extending the excise and introducing the bonding system was withdrawn through vehement opposition in 1733. Farming the excise duties led to many evils, see *Smugglers. Bonded warehouses* for the temporary storage of exciseable goods, authorized in 1802, were begun in 1823. The system was modified in 1882. Bonds for the payment of the duties are entered into by the importers. The old excise office was built on the site of Gresham college in 1774; the present is at Somerset-house. The officers of excise and customs were deprived of their votes for returning members to parliament in 1782; but received them again in

* In process of time the court of exchequer became gradually enlarged in its jurisdiction, until at length it was not merely a revenue court and one at common law between subject and subject, but one in which suits in equity were also instituted. In fact, until the act 5 Vict. c. 5 (1841), the court of exchequer possessed a triple jurisdiction; but by this statute its equity business was transferred to the court of chancery.

1868. In 1849 the boards of excise, stamps and taxes, were united, as "*the board of commissioners of inland revenue.*" Notwithstanding the abolition of the excise duty upon numerous articles, and the reduction of duty upon various others, of late years, the total excise revenue, so far from having decreased, has progressively advanced (1847 and 1861 excepted) in its aggregate annual amount. Additional excise duties were charged by 17 & 18 Vict. c. 27, July 3, 1854. The excise duties were further modified in 1860–94; see *Revenue*.

EXCLUSION BILL (to exclude the duke of York, afterwards James II., from the throne), was passed by the commons, but rejected by the lords in 1680. The revival of the question led to the dissolution of parliament in 1681.

EXCOMMUNICATION, or separation from Christian communion (*Matt.* xviii. 17; 1 *Cor.* v., &c.), was instituted to preserve the purity of the church. The Roman church excommunicated by *Bell, Book, and Candle* (*which see*). See *Interdict.*

EXECUTIONS, see *Crime*. In the reign of Henry VIII. (38 years) it is said that no less a number than 72,000 criminals were executed. *Stow.* In the ten years between 1820 and 1830, there were executed in England alone 797 criminals; but as our laws became less severe, the number of executions decreased. In the three years ending 1820, the executions in England and Wales amounted to 312; in the three years ending 1830, they were 178; in the three years ending 1840, they were 62. The place of execution in London (formerly generally at Tyburn) was in front of Newgate from 1783 to 1868, when an act was passed directing executions to take place within the walls of prisons. The dissection of the bodies of executed persons was abolished in 1832, see *Death*, 1868.

John Calcraft, born 1800, executioner for London, 1828-1871, died 13 Dec. 1879; his successor, Wm. Marwood, died 4 Sept. 1883; he was succeeded by Berry; said to have resigned March, 1892; Jas. Billington, in 1894.

EXETER (Devonshire), said to have been named *Augusta* from having been occupied by the second Augustan legion commanded by Vespasian: its present name is derived from *Excestre*. It was for a considerable time the capital of the West Saxon kingdom. The BISHOPRIC anciently comprised two sees: Devonshire (founded about 909) and Cornwall. The church of the former was at Crediton, of the latter at Bodmin, and afterwards at St. German's. About 1040 the sees were united. St. Petroc was the first bishop of Cornwall, before 900; Eadulphus, the first bishop of Devonshire, 905; and Leofric, the first bishop of Exeter, in 1049. The cathedral originally belonged to a monastery founded by Athelstan: Edward the Confessor removed the monks to his new abbey of Westminster, and gave their church for a cathedral to the united see, 1049; the see was valued in the king's books at 500*l. per annum*. Present stated income, 4200*l.* Population, 1881, 37,665; 1891, 37,580.

EXETER CHANGE (London), was built about 1680, on part of the site of Exeter house, the palace of Walter Stapleton, bishop of Exeter and lord treasurer in 1319, beheaded by order of the queen-regent, Isabella, in 1326. It was entirely demolished at the period of the Strand improvements, in 1829. The new Exeter Change, built by the marquis of Exeter near its site, opened in 1845, was pulled down in 1862, for the Strand Music-hall, now Gaiety theatre.

EXETER COLLEGE (Oxford) was founded by Walter Stapleton, bishop of Exeter in 1314. The college buildings mainly consist of a quadrangle in the later Gothic style.

EXETER HALL (Strand, London), erected in 1830-1 for the meetings of religious and philanthropic institutions, concerts, oratorios, and musical societies, a large and magnificent apartment with a splendid orchestra and organ, and having rooms attached for committees, &c., opened 29 March, 1831. See under *Music.* Religious services were held here in 1856 by the Rev. C. Spurgeon, and in 1857 by ministers of the church of England, on Sundays.

The Sacred Harmonic Society met here 1831-80; last concert, "Israel in Egypt," 30 April, 1880.
The hall was purchased for the Young Men's Christian Association for 25,000*l.* July 1880; re-opened (jubilee), 29 March, 1881.

EXHIBITION OF 1851 (THE GREAT EXHIBITION). The original idea of a *National* Exhibition* is attributed to Mr. F. Whishaw, secretary of the Society of Arts in 1844. It was not taken up till 1849, when prince Albert, president of the society, said, "Now is the time to prepare for a Great Exhibition, an exhibition worthy of the greatness of this country; not merely national in its scope and benefits, but comprehensive of the whole world; and I offer myself to the public as their leader, if they are willing to assist in the undertaking."

Royal commission appointed . . . 3 Jan. 1850
A subscription list opened, headed by the queen for 1000*l.*
Civic banquets in support of the plan, at London, 21-22 March; and at York . . . 25 Oct. ,,
The building* commenced . . . 26 Sept. ,,
Many persons admitted into it in Jan.; it is virtually transferred to the royal commissioners by the contractors, Messrs. Fox and Henderson, Feb. 1851
Reception of goods began 12 Feb., and the sale of season tickets . . . . 25 Feb. ,,
The Exhibition opened by her majesty . 1 May, ,,
The number of exhibitors exceeded 17,000, of whom 2918 received prize medals and 170 council medals. The articles exhibited in arts, manufactures, and the various produce of countries, defied calculation.
The palace continued open above 23 weeks, altogether 144 days (1 May to 15 Oct.) within which time it was visited by 6,170,000 persons, averaging 43,536 a day, whose admission at the respective prices of one pound, half-a-crown, and one shilling, amounted to 505,107*l.* including season tickets, leaving a surplus, after payment of expenses, of about 150,000*l.*† . . . . . ,,
The greatest number of visitors in one day was 109,760 (8 Oct.); and at one time (2 o'clock, 7 Oct.) there were 93,000; these persons were assembled at one time, not in an open area, like a Roman amphitheatre, but within a windowed and floored and roofed building. There is no like vast assemblage recorded in either ancient or modern annals, as having been gathered together, it may be said, in *one room.*
The Exhibition was closed to the public . 11 Oct. ,,

EXHIBITION OF 1862 (INTERNATIONAL). A proposal in 1858 for another great exhibition, to be held in 1861, was withdrawn in consequence of the war in Italy in 1859, &c. The scheme was revived in April 1860, when the prince consort engaged to guarantee 10,000*l.* if 240,000*l.* should be subscribed for by other persons.

A charter granted to the following commissioners: earl Granville, the marquis of Chandos, C. W. Dilke, jun., and Thomas Fairbairn . 22 Feb. 1861
The guarantee fund amounted to 349,000*l.* in Nov. 1860, and to 452,300*l.* . . . 22 Aug. 1862

* Industrial exhibitions began with the French; *Expositions* having been organised and opened at Paris in 1798, 1801, 1802, 1806, 1819, 1823, 1827, 1834, 1839, 1844, and 1849, the last, being the eleventh, exceeding all the preceding in extent and brilliancy. The first exhibition of the kind in this country was the National Repository, opened under royal patronage in 1828, near Charing-cross. It was not successful. Other exhibitions were opened at Manchester in 1837, at Leeds in 1839, and at Birmingham in 1849. Exhibitions have since been held at Cork, Dublin, Manchester, New York, Paris, Montreal, Florence, Constantinople, Bayonne, Melbourne, Vienna, Philadelphia, and many other places (*which see*).

* The palace, with the exception of the flooring and joists, was entirely of glass and iron. It was designed by Mr. (aft. sir Joseph) Paxton (who died 8 June, 1865), and the contractors were Messrs. Fox and Henderson, to whom it was agreed to pay 79,800*l.*, or 150,000*l.* if the building were permanently retained. It cost 176,030*l.* 13*s.* 8*d.* Its length was 1851 feet, corresponding with the year; the width 408 feet, with an additional projection on the north side, 936 feet long, by 48 wide. The central portion was 120 feet wide and 64 feet high, and the great avenues ran east and west through the building; the transept near the centre was 72 feet wide and 108 feet high. The entire area was 772,784 square feet, or about 19 acres. Four galleries ran lengthways, and others round the transept. The ground-floor and galleries contained 1,000,000 square feet of flooring. There were altogether 4000 tons of iron in the structure, and 17 acres of glass in the roof, besides about 1500 vertical glazed sashes.

† This was placed in the hands of commissioners, who have promoted the South Kensington museum, and in 1876 proposed the establishment of a science library.

‡ The main building occupied about 16 acres of ground, and the annexes 7 acres. The south front was 1150 feet long and 55 feet high, and over the east and

The success of the Exhibition was much impaired by the *decease of the prince consort*, 14 Dec. 1861, and the breaking out of the civil war in the United States of America. The foreign exhibitors in 1851 were 6566; in 1862, 16,456.
Exhibitors at London, in 1851, 14,000; at Paris, in 1855, 24,000; at London, in 1862, 29,000; at Paris, in 1867, 50,000.

EXODUS (Greek, *way out*), a term applied to the departure of the Israelites from Egypt, 1491 B.C.; and described in the book of *Exodus*. Chronologers vary in the date of this event: the LXX. give 1614; Hales, 1648; Wilkinson, 1495; Bunsen, 1320 or 1314.

EX OFFICIO INFORMATIONS are those filed by the attorney-general, *by virtue of his office*, without applying to the court where they are filed for leave, or giving the defendant an opportunity of showing cause why they should not be filed. *Cabinet Lawyer.* They were used by the Liverpool administration about 1817-19. William Hone was tried on criminal information, 18-20 Dec., 1817, and acquitted. The British bank directors were thus tried, 1857.

EXTRADITION TREATIES. The extradition of criminals formed part of the Ashburton treaty (*which see*), 9 Aug. 1842. Between Great Britain and France, 1843. In Dec. 1865, the French government gave notice of withdrawing from it in six months. It was renewed, with modifications, for six months, 21 May, 1866. A new act was passed, 9 Aug. 1870; amended in 1873. New act passed, 6 July, 1895. The treaty of Aug. 1876, amended 13 Feb. 1896. Similar treaties have been concluded with other powers; with Austria, 3 Dec. 1873; Switzerland, 4 April, 1874; Holland, Aug. 1874; with Spain, 1878. Applications for extradition: to England, 38; by England, in 1895, 18; 35 to England in 1896.

In 1866, M. Lamirand, charged with forgery and fraud against the Bank of France, fled to America. He was pursued, and was arrested at Montreal, on 1 Aug., under the governor-general's warrant. On 15 Aug., while his examination was still pending, he petitioned the governor-general not to warrant his surrender before he could apply for a writ of *habeas corpus*, and was assured on 17 Aug. that ample time should be allowed for this purpose. On 22 Aug. he was finally committed; and on 24 Aug. his petition for a writ of *habeas corpus* was presented to judge Drummond, twenty-four hours' notice having been given to the representatives of the crown and the Bank of France. After arguments had been heard and the case adjourned until the following day, he was surreptitiously carried off the same night by train to Quebec, and hurried on board a steamer bound for Europe, by virtue of an extradition warrant, purporting to be signed by the governor-general at Ottawa, on 23 Aug. He was conveyed to France, and on 5 Dec. was tried, found guilty, and condemned to ten years' imprisonment. These circumstances led to much discussion, and the Canadian authorities were censured for irregularity and want of discretion. The discussion ended by Lamirand declining British intervention.

EYLAU (Prussia), where, on 7-8 Feb. 1807, was fought between the French and Russians one of the most bloody contests of the war. Napoleon commanded in person. Both armies by this and other battles were so much reduced, that the French retired to the Vistula, and the Russians on the Pregel.

EYRE (old French for *ire*, to go on), the itinerant court of justices, the justices in eyre, was instituted by Henry II. 1176; and when the forest laws were in force, its chief-justice had great dignity. These justices were to go their circuit every third year, and punish all abuses committed in the king's forests. The last instance of a court being held in any of the forests is said to have been in 1671. *Beatson.*

F.

F'S, Three (that is, "fixity of tenure, fair rents, and free sale"), term much used respecting Irish land question in 1880-1. Sir Stafford Northcote termed them "fraud, force, and folly," and they were much opposed by lord Dufferin and others.

FABII. A noble family at Rome, said to have derived their name from *faba*, a bean, because some of their ancestors cultivated this pulse; or to have descended from Fabius, a son of Hercules. According to the legend, the whole family, on behalf of the state carried on the war against the Veientes. During a march to Rome, they were surprised, and all the grown up males (306) were slain 477 B.C. From a boy detained at Rome, arose the noble Fabii of the following ages. Fabius *Cunctator* (the delayer) kept Hannibal in check for some time without coming to an engagement, 217-216 B.C.

FABLES. "Jotham's fable of the trees (*Judges* ix., about 1209 B.C.) is the oldest extant, and as beautiful as any made since." *Addison.* Nathan's fable of the poor man (2 *Sam.* xii., about 1034 B.C.) is next in antiquity. The earliest collection of fables extant is of eastern origin, and preserved in the Sanscrit. The fables of Vishnoo Sarma, or Pilpay, are the most beautiful, if not the most ancient in the world. *Sir William Jones.* Professor Max Müller traced La Fontaine's fable of the Milkmaid to a very early Sanscrit collection. Æsop's fables (*which see*) supposed to have been written about 565 or 620 B.C., were versified by Babrius, a Greek poet, about 130 B.C. (*Coray*), and turned into prose by Maximus Planudes, a Greek monk, about 1320, who added other fables and appended a worthless life of Æsop. The fables of Phædrus in elegant Latin-iambics (about A.D. 8), of La Fontaine (1700) and of Gay (1727) are justly celebrated.

FACIAL ANGLE (that contained by one line drawn horizontally from the middle of the ear to the edge of the nostrils, and another from the latter point to the ridge of the frontal bone) was invented by Peter Camper to measure the elevation of the forehead. In negroes this angle is about 70°; in Europeans varies from 75° to 85°. Camper died 7 April, 1789. His book on "Characteristic Marks of Countenance" was published in 1791.

FACTIONS of the Circus among the Romans, were parties that fought on chariots in the circus, and who were distinguished by colours, as green, blue, red, and white; Domitian added gold and scarlet, about A.D. 90.

Nika sedition.—In Jan. 532, a conflict took place at Constantinople, lasting five days, when about 30,000 lives were lost, and Justinian was mainly indebted for his life and throne to the heroism of his empress Theodora. The blues and greens united for a day or two against the emperor, taking *Nika!* (overcome) for a watchword. The blues soon turned, and massacred nearly all the greens. The conflict was suppressed by Belisarius with difficulty, and the games were abolished for a time.

FACTORY SYSTEM was gradually developed by Arkwright and others, 1774, *et seq.*, to carry on the cotton manufacture, which has been greatly increased by the invention of machinery. The work had been previously executed by working men in cottages by the hand or stock cards, loom, and spinning wheel. Factories have immensely increased in this country since 1815. The Factory act, regulating the hours of labour, &c., was passed in 1833 and amended 1834 and 1844. Similar acts have been passed since; and an act for the extension of the principles of the Factory acts was passed in 1867 in relation to women and children employed in manual labour; short time on Saturdays was enacted. Other acts were passed in 1870-1878.

The Act of 1878 (like that of 14 July, 1874) relates to sanitary provisions, safety from machinery, hours of employment, meal hours, women and children, holidays, education of children, accidents, &c., passed 27 May, 1878. Consolidating act passed in 1883.

The earl of Shaftesbury, the energetic promoter of this legislation, died 1 Oct. 1885, aged 84.

New Factories and Workshops Act passed 5 Aug. 1891; amendment act passed, 6 July, 1895.

Mr. Alexander Redgrave, chief inspector of factories in 1851, retired, and was succeeded by Mr. F. H. Whymper, Sept. 1891.

FAENZA, central Italy, the ancient Faventia, submitted to the emperor Frederick I., 1162; was taken by Frederick II., 12 April, 1241; held by the pope, 1275; by the Bolognese, 1282; by Cæsar Borgia, 1501; by Venice, 1504; by the papacy, 1509; by the French, 1512. After various changes early in the 16th century it was acquired by the papacy and retained till the annexation by Sardinia, 1859. Faïence pottery owes its name to this place, where it was invented.

FAIRLOP OAK, with a trunk 48 feet in circumference, the growth of five centuries, in Hainault forest, Essex, was blown down in Feb. 1820. Beneath its branches an annual fair was long held on the first Friday in July, which originated with the eccentric Mr. Day, a pump and block maker of Wapping, who, having a small estate in the vicinity, annually repaired here with a party of friends, to dine on beans and bacon.

The National Association for the Preservation of Agriculture and other industries held a meeting in London 8 Dec. 1887.

FAIRS AND WAKES, of Saxon origin, were instituted in Italy, about 500; in England by Alfred, 886. *Spelman.* Wakes were established by order of Gregory VII. in 1078, and termed *Feriæ*, at which the monks celebrated the festival of their patron saint: the vast resort of people occasioned a great demand for goods, wares, &c. Fairs were established in France about 800 by Charlemagne, and encouraged in England about 1071 by William the Conqueror. Many statutes were made for the regulation of fairs (1328—1868). The "Fairs Act," passed 25 May, 1871, provides for the abolition of fairs; in 1872, Charlton and Blackheath fairs, and in 1873 Clapham fair, were abolished as nuisances. See *Frosts.*

An "old English fair" was opened at the Royal Albert Hall by princess Christian, to aid the Chelsea Hospital for Women, 9 June, 1881. See *Markets.*

FALCK LAWS, see *Prussia*, 1873.

FALCONRY OR HAWKING in England cannot be traced with certainty before the reign of king Ethelbert, the Saxon monarch, 858. *Pennant.* The grand seignior at one time kept six thousand falconers in his service. Juliana Berners' book on "Hawkynge and Huntynge" was printed in 1496; see *Angling.* Recent attempts have been made to revive falconry. Hawking was practised in Thrace. *Aristotle.*

FALCZI, on the Pruth, Turkey. Here was concluded a *Peace* between Russia and Turkey, 21 July, 1711, the Russians giving up Azof, and all the possessions on the Black Sea to the Turks. The Russians were saved from imminent destruction by the address of Catherine the empress. In 1712 the war was renewed, and terminated by the peace of Constantinople, 16 April, 1712.

FALERII, a city of the Falisci, an Etruscan people who joined the Veientes against Rome, and were beaten by Cornelius Cossus, 437 B.C. It is recorded that when the city was besieged by Camillus in 394, a schoolmaster offered to betray to him the children of the principal citizens. On his refusal, the citizens from gratitude surrendered. They opposed Rome during the first Punic war; and in 241 the city was taken and destroyed.

FALERNIAN WINE, celebrated by Virgil and Horace, was the produce of Falernus, or, as called by Martial, Mons Massicus, in Campania. Horace in his *Odes* boasts of having drunk Falernian wine that had been, as it were, born with him, or which reckoned its age from the same consuls, 14 B.C.

FALKIRK (Stirlingshire, Scotland), the site of a victory by the English under Edward I. over the Scots, commanded by Wallace, part of whose forces deserted him. It is said from 20,000 to 40,000 Scots were slain, 22 July, 1298. A battle was fought at Falkirk Muir between the royal forces under Hawley, and prince Charles Edward Stuart, in which the former were defeated, 17 Jan. 1746.

FALKLAND ISLANDS, a group in the South Atlantic, belonging to Great Britain, seen by Americus Vespucius, 1502, and visited by Davis, 1592; explored by Hawkins, 1594; taken possession of by France, 1764. The French were expelled by the Spaniards; and in 1771, Spain resigned them to England. Not having been colonised by us, the republic of Buenos Ayres assumed a right to these islands, and a colony from that country settled at Port Louis; but owing to a dispute with America, the settlement was destroyed by the latter in 1831. In 1833 the British flag was hoisted at Port Louis, and a British officer has since resided there. Population in 1888, 1,890. Governors, Wm. C. F. Robinson, 1866; col. George A. K. D'Arcy, 1870; Thos. F. Callaghan, 1876; Thos. Kerr, 1880; Sir Roger T. Goldsworthy, Feb. 1891; Mr. W. Grey-Wilson, March, 1897. Falkland Islands created a crown colony, March, 1892. FAMILY OF LOVE, a society, called also Philadelphians, from the love they professed to bear to all men, assembled at Brew-house yard, Nottingham. Their founder, David George, an Anabaptist, of Holland, propagated his doctrines in Switzerland, where he died in 1556. The tenets of the society were declared impious, and George's body and books ordered to be burned by the hangman. In England a sect with a similar title was repressed by Elizabeth, 1580; but existed in the following century. See *Agapemone.*

In 1861 Pasteur brought forward evidence to show that fermentation depends on the presence of minute organisms in the fermenting fluid, and that the source of all such organisms is the atmosphere. FERRARA, formerly part of the exarchate of Ravenna, under the emperors of the East. It was subdued by the Lombards in the 8th century, and taken from them about 752 by Pepin, who gave it to pope Stephen II. About 1208 it fell into the hands of the house of Este (*which see*), and became the principal seat of the literature and fine arts in Italy. Pope Clement VIII. obtained the sovereignty in 1598, on the death of the duke Alphonso II., the last legitimate male of the Este family. His illegitimate nephew, Cæsar, became duke of Modena. The French under Massena took Ferrara in 1796; but it was restored to the pope in 1814. An Austrian garrison held it from 1849; it retired in June, 1859, and the people rose and declared for annexation to Sardinia, which was accomplished in March, 1860. The centenary of the university, founded in 1392, celebrated 18 April, 1892.

FERRARS' ARREST. In March, 1542, Mr. George Ferrars, a member of parliament, while in attendance on the house was taken in execution by a sheriff's officer for debt, and committed to the Compter prison. The house despatched their serjeant to require his release, which was resisted, and an affray taking place, his mace was broken. The house in a body repaired to the lords to complain, when the contempt was adjudged to be very great, and the punishment of the offenders was referred to the lower house. On another messenger being sent to the sheriffs by the commons, they delivered up the senator, and the civil magistrates and the creditor were committed to the Tower, the inferior officers to Newgate, and an act was passed releasing Mr. Ferrars from liability for the debt. The king, Henry VIII., highly approved of all these proceedings, and the transaction became the basis of that rule of parliament which exempts members from arrest. *Holinshed.*

Soult captured Ferrol, 27 Jan. 1809. An insurrection of about 1500 men in the arsenal here broke out, headed by brigadier Pozas and capt. Montojo, who raised the red flag, 11 Oct.; they dispersed or surrendered when about to be attacked, 17 Oct. 1872.

FIRE-BRIGADE. The "London Fire-engine Establishment," an amalgamation of the engines of the different companies, was established in London in 1832 by Mr. Charles Bell Ford, director of the Sun Fire-office. It then had 80 men and 19 stations. In 1863 it had 130 men and 20 stations. In May, 1862, a commission recommended the establishment of a fire-brigade, which was effected by the Metropolitan Fire-brigade Act, in 1865. The establishment then gave up its plant to the Metropolitan Board of Works. The fire-brigade is supported by a ½*d.* rate, and by contributions from government and from the insurance offices. It came into action, and its energies were successfully tested at the great fire at St. Katharine's docks, 1 Jan. 1866. In 1889, 591 men and 55 land fire-engine stations; 1893, 720 men and 56 (land) stations. Captain Eyre M. Shaw recommends to the London County Council a large increase of the establishment, April, 1889; which was carried into effect in 1890. Annual reviews.

Grent in 1632, one was constructed by John Van der Heyden, about 1663. Bramah's engine was patented in 1793. Mr. John Braithwaite constructed a steam fire-engine in 1830. A trial of steam fire-engines took place at the Crystal Palace, Sydenham, on 1, 2, 3 July, 1863, when prizes were awarded to a large one by Merryweather and a small one by Shand and Mason.

The Royal Society for the Protection of Life from Fire was first established in 1836; its object was not fully attained till 1843, when it was re-organised, beginning with six escape stations in London; in March, 1859, it possessed 67; in 1866, 85. In 1858, 504 fires had been attended, and 57 persons rescued. In 1861 it was stated that 84 lives had been saved by the society's officers. In 1866, 695 fires had been attended, and 78 lives saved. In Aug. 1867, the plant of the society was virtually presented to the Board of Works, in consequence of the passing of the Metropolitan Fire Brigade Act, 1865. FIRST-FRUITS were offerings which made a large part of the revenues of the Hebrew priesthood. First-fruits (called ANNATES, from *annus*=a year), in the Roman church, originally the profits of one year of every vacant bishopric, afterwards of every benefice, were first claimed by pope Clement V. in 1306, and were collected in England in 1316; but chronologers differ on this point. In the 26th of Henry VIII. 1534, the first-fruits were assigned, by parliament, to the king and his successors. Mary gave the Annates to the popes (1555); but Elizabeth resumed them (1559). They were granted, together with the tenths, to the poor clergy, by queen Anne, in 1703. The offices of First-fruits, Tenths, and Queen Anne's Bounty were consolidated by 1 Vict. c. 20, 1838; see *Augmentation of Poor Livings*. Annates were long resisted in France, but not totally suppressed till 1789.

Louis XIV. obliged the Spaniards to lower their flag to the French, 1680. *Hénault.* After an engagement of three hours between Tourville and the Spanish admiral Papachin, the latter yielded by firing a salute of nine guns to the French flag, 2 June, 1688. *Idem;* see *Salute at Sea*, and *Union Jack.*

In 1204, Baldwin IX. became emperor at Constantinople. In 1369, Philip duke of Burgundy married Margaret, the heiress of count Louis II. After this, Flanders was subjected successively to Burgundy (1384), Austria (1477), and Spain (1555). It was ordered to be grown in England, bb statute, 24 Hen. VIII. 1533. For many ages the core was separated from the flax, the bark of the plant, by the hand. A mallet was next used; but the old methods of breaking and scutching the flax yielded to a water-mill which was invented in Scotland about 1750; see *Hemp.* The duty imposed on imported flax, 1842, was repealed 1845. In 1851 chevalier Claussen patented a method of "cottoning" flax.

FLEET PRISON, MARKET, &c. (London), were built over the small river Fleta, now used as a common sewer. In the reign of Henry VII. this river is said to have been navigable to Holborn-bridge.

FLEET PRISON was founded in the first year of Richard I., and was allotted for debtors, 1640; and persons were committed here who had incurred the displeasure of the Star-Chamber, and for contempt of the court of Chancery. It was burnt during the Gordon riots, 7 June, 1780, and rebuilt 1781-2. It was pulled down in 1845 (and the debtors removed to the Queen's Bench prison). The site was sold to the London, Dover, and Chatham railway company for 60,000*l.* on 2 June, 1864. Last vestige removed . . . . Feb. 1868

Pennant says that in his youth he was often accosted with, "Sir, will you please to walk in and be married?" Painted signs, of male and female hands conjoined, with the inscription, "Marriages performed within," were common along the building.

This abuse abolished by the Marriage Act . . 1753

James, many of his nobles, and upwards of 10,000 of his army, were slain; while the English, who were commanded by the earl of Surrey, lost only persons of small note.

FLOGGING by the Jewish law was limited to forty stripes, "lest thy brother should seem vile unto thee," 1451 B.C. (*Deut.* xxv. 3). Wm. Cobbett in 1810, and John Drakard in 1811, were punished for publishing severe censures on flogging in the army. Flogging was made a punishment for attempts at garrotting in 1863; and for juvenile criminals, 1847 and 1850; for burglars carrying revolvers proposed; the bill enacting it was withdrawn 2 Aug. 1889.

FLORENCE (*Florentia*), capital of Tuscany (*which see*), and from 1864 to 1871, of Italy, is said to have been founded by the soldiers of Sylla (80 B.C.), and enlarged by the Roman triumviri. In its palaces, universities, academies, churches, and libraries, are to be found the rarest works of sculpture and painting in the world. The Florentine academy and *Academia della Crusca* (established 1582) were instituted to enrich literature and improve the language of Tuscany; the latter was so named, because it rejects like *bran* all words not purely Tuscan: both are now united under the former name. Population, 1890, 191,453.

FLORES, or Isle of Flowers (one of the Azores, *which see*), discovered by Vanderberg in 1439; and settled by the Portuguese in 1448.

FLORIDA, a peninsula, one of the southern states of North America, first discovered by Sebastian Cabot in 1497. It was visited by Juan Ponce de Leon, the Spanish navigator, April 4, 1512, in a voyage he had undertaken to discover a fountain whose waters had the property of restoring youth to the aged who tasted them! Florida was conquered by the Spaniards under Ferdinand de Soto in 1539; but the settlement was not fully established until 1565. It was plundered by sir Francis Drake in 1585; and by Davis, a buccaneer, in 1665. It was invaded by the British in 1702; and again by gen. Oglethorpe in 1740; ceded to the British crown in 1763; taken by the Spaniards in 1781; and guaranteed to them in 1783. Capital, Tallahassee. Population in 1880, 269,493; 1890, 391,422.

FLOWERS. Many of our present common flowers were introduced into England from the reign of Henry VII. to that of Elizabeth (1485-1603). The art of preserving flowers in sand was discovered in 1633. A mode of preserving them from the effects of frost in winter, and hastening their vegetation in summer, was invented in America, by Geo. Morris, in 1792. A very great number have been introduced from America, Australia, the Cape, &c., during the present century. Many of the dates in the following list, given in botanical works, are doubtful.

FLUORESCENCE. When the invisible chemical rays of the blue end of the solar spectrum are sent through uranium glass or solutions of quinine, horse-chestnut bark, or stramonium datura, they become luminous. This phenomenon was termed "fluorescence" by its discoverer, professor Stokes, in 1852. By means of fluorescence Drs. Bence Jones and Dupré detected the presence of quinoidine in animal tissues; see *Calorescence*.

FLUORINE, a gaseous element, obtained from fluor spar; first collected over mercury by Priestley. Its property of corroding all vessels is so great that it is separated with great difficulty. It was named by Ampère in 1810. Its chemical history was further elucidated by Davy (1809), Berzelius (1824), and succeeding chemists. The corroding property of fluoric acid was employed in the arts in 1760, by Schwankhard of Nuremberg. *Gmelin.*

Fluorine liquefied by M. Moissan and Prof. Dewar at about 210c, May *et seq.*, 1897; paper read at Paris . . . . . 21 Oct. 1897

FLUSHING, a seaport of the Netherlands, on the isle of Walcheren. For the siege, see *Walcheren Expedition*. It was fortified by Napoleon I., but the works were finally dismantled in 1867. The port improved, and new dock opened by the king of Holland, 8 Sept. 1873.

FLUTE. The transverse flute, incorrectly termed the "German" instead of the Swiss flute, was known to the ancients. It was described by Michael Pretorius, of Wolfenbuttel, in 1620, and by Mersenne of Paris, in 1636. It was much improved by the French in the 17th century, by Quantz, Tacet, Florio, Potter, Miller, Nicholson, and others in the 18th. In the present century also the Nicholsons, Boehm of Munich, Godfrey of Paris, Carter, Rockstro, and Rudall and Rose of London, have greatly contributed to the perfection of this instrument. See *Flageolet*.

FLUXIONS, a branch of the higher mathematics, invented by Newton, 1665, similar to the differential calculus described by Leibnitz, 1684. A fierce controversy ensued as to the priority of the discovery. The finest applications of the calculus are by Newton, Euler, La Grange, and La Place. The first elementary work on fluxions in England is a tract of twenty-two pages in *A New Short Treatise of Algebra, together with a Specimen of the Nature and Algorithm of Fluxions*, by John Harris, M.A. London, 1702.

FLYING, ARTIFICIAL. In Greek mythology, Dædalus is said to have attached wings of wax to the body of his son Icarus, who, neglecting the advice of his father, flew so high that the sun melted his wings, and he fell into the Icarian sea. Archytas is said to have made a flying dove, about 400 B.C. Friar Bacon maintained the possibility of the art of flying, and predicted it would be a general practice, 1273. Bishop Wilkins says (1651), it will yet be as usual to hear a man call for his *wings* when he is going on a journey, as it is now to hear him call for his boots! Borelli (about 1670) showed the futility of these speculations. About 1800 sir George Cayley experimented on the subject, and in 1843 Mr. Henson invented a flying machine; but nothing has been devised capable of serving a practical purpose. The motion of birds in relation to aëronautics was much discussed by scientific men in 1867-8. At a meeting of the Aëronautical society, 26 March, 1868, it was stated that a member had actually, by his muscular force, aided by apparatus, risen from the ground and flown horizontally. Dr. James Pettigrew published his elaborate researches on flying, 1867-71. M. Von Groof, a Belgian, "the flying-man," descended from a balloon by means of a parachute resembling wings, in 1874: but was killed by falling through failure of his apparatus at Chelsea, 9 July.

Mr. Simmonds' flying-machine (combining an umbrella and kite), at Chatham, carried sand bags about 100 feet high and fell, 15 Dec. 1875.
Mr. H. C. Linfield tried his steam flying machine on the railway near West Drayton, 29 Aug. 1883.
Mr. Horatio Phillips' aerial machine, weighing 330 lbs., to be sustained in its course by induced currents, tried at Harrow, May, 1893.
A flying machine constructed by Mr. Maxim, tried at Bexley, Kent. It is reported to have conveyed himself and two men with water and fuel a distance of about 500 ft., 31 July, 1894; another trial, 5 July, 1895.
Mr. Maxim, at the society of arts, described his experiments, 28 Nov. 1894.
Herr Otto Lilienthal's experiments with his machine, fairly successful, are described in "Nature," 30 Jan. 1896; he was killed by a fall while experimenting at Rhinow . . 9 Aug. 1896

The use of bells, steam-trumpets, a battery of whistles blown by steam, the transmission of sound through water, the siren, &c., were considered. A fog horn blown by steam is in use at Dungeness lighthouse (1869). For Dr. Tyndall's experiments, see *Acoustics*.

The formation of the Folk-lore society was advocated by Mr. W. J. Thoms in "*Notes and Queries*," 1 Dec. 1877; established in 1878. National congresses are held.

FONTENAILLE, or Fontenay (*Fontanetum*). a village in Burgundy. Near here Charles the Bald and Louis the German totally defeated their brother the emperor Lothaire I. 25 June, 841. This victory, termed "the judgment of God," conduced to the formation of the French monarchy.

FONTENOY, near Tournay, in Belgium, the site of an obstinate sanguinary battle on 30 April (11 May, N.S.), 1745, between the French, commanded by marshal Saxe, and the English, Hanoverians, Dutch, and Austrians, commanded by the duke of Cumberland. The king Louis XV. and the dauphin were present. The success of the British at the commencement is still quoted as an illustration of the extraordinary power of a column; and the advance of the Austrians during several hours at Marengo (14 June, 1800) was compared to it by Bonaparte. The allies lost 12,000 men, and the French nearly an equal number; but the allies were compelled to retire. Marshal Saxe (ill of the disorder of which he afterwards died) was carried about to all the posts in a litter, assuring his troops that the day would be their own.

FONTHILL ABBEY, Wiltshire, founded in 1796, the mansion of William Beckford, author of "Vathek," and son of Alderman Beckford. He died 2 May, 1844. Within this edifice (which alone cost 273,000*l.*) were collected costly articles of virtù and art, and the rarest works of the old masters. The sale of the abbey and its contents to Mr. Farquhar took place in 1822; 7,200 catalogues at a guinea each were sold in a few days. On 21 Dec. 1825, the lofty tower fell, and in consequence the remaining buildings were sold.

FOOD, see *Provisions*. A Food Journal published 1870; continued several years. Sale of Food and Drugs Act passed 11 Aug. 1875. FOOT AND MOUTH DISEASE, see *Cattle*.

FOOTBALL, an old English game, popular in the middle ages, censured and opposed by Edward II., 1314, and Edward III., 1349. Its suppression was attempted by Henry IV., 1401, Henry VIII. and Elizabeth, but the playing of the game continued till about 1650. It has been revived in various forms in the present century by public schools and clubs, such as Sheffield and Hallam, 1857, Blackheath and Richmond, 1858. The Football Association was formed by the "dribbling clubs" in 1858, followed by the Rugby Football Union in 1871. The game is now played in our colonies and the United States; annual matches.

The city of London having been required to provide this market before 1 Jan. 1872, by the Contagious Diseases Act (for Animals), 1869, the Common Council, 7 Nov. 1870, agreed to the expenditure of 160,000*l.* for the purpose. The site chosen, Deptford dockyard, was much opposed. The requisite alterations were made by Mr. Horace Jones, and the market was formally opened by the lord mayor, 28 Dec. 1871; for use on 1 Jan. 1872.

FOREIGN ENLISTMENT ACT, 59 Geo. III. c. 69 (1819), forbids British subjects to enter the service of a foreign state, without licence from the king or privy council, and prohibits the fitting out or equipping ships for any foreign power to be employed against any power with which our government is at peace; see *Trials*, 1862, 1863. In 1606, Englishmen were forbidden to enter foreign service, without taking an oath not to be reconciled to the

pope. The act was suspended in 1835 on behalf of the *British Legion* (*which see*). The act passed 9 Aug. 1870, relates to illegal enlisting, shipbuilding, and expeditions.

An act (18 & 19 Vict. c. 2) for the formation of a foreign legion as a contingent in the Russian war (1855), was passed 23 Dec. 1854.* The queen and prince Albert reviewed 3500 soldiers, principally Swiss and Germans, at Shorncliffe, 9 Aug. 1855. On the peace in 1856, many were sent to the Cape of Good Hope; but not prospering, returned.

FOREIGN MISSIONS, see *Missions*.

FOREIGN OFFICE was established at the re-arrangement of the duties of secretaries of state in 1782. It has the exclusive charge of British interests and subjects in foreign countries. The secretary for foreign affairs negotiates treaties, selects ambassadors, consuls, &c., for foreign countries, and grants passports. The new foreign office building in the Italian style (designed by Sir Gilbert Scott), was begun in 1864. A portion of it was inaugurated by Mr. Disraeli's reception, 25 March, and it was occupied by lord Stanley, 24 June, 1868. See *Administrations* under separate heads, and *Secretaries*.

The Outer-Fern Lighthouse keeper, James Darling, and his heroic daughter Grace, ventured out in a tremendous sea in a coble, and rescued several of the passengers.

The first forger on the bank of England was Richard William Vaughan, once a linen-draper of Stafford. He employed a number of artists on different parts of the notes fabricated. He filled up twenty of the notes and deposited them in the hands of a young lady whom he was on the point of marrying, as a proof of his being a man of substance; no suspicion was entertained. * The endeavour to enlist for this legion, in 1854, in the United States, gave great offence to the American government. Mr. Crampton, our envoy, was dismissed, 28 May, 1856, in spite of all the judicious pacific efforts of lord Clarendon. Lord Napier was sent out as our representative in 1857.

A committee of the house of commons respecting forests, sat in 1863. Motion in parliament to preserve *Epping Forest*, adopted 14 Feb. 1870; and the decision of the Master of the Rolls, 10 Nov. 1874, stopped the enclosures by the lords of manors. FORKS were in use on the Continent in the 13th and 14th centuries. *Voltaire.* This is reasonably disputed. In Fynes Moryson's *Itinerary*, reign of Elizabeth, he says, "At Venice each person was served (besides his knife and spoon) with a fork to hold the meat while he cuts it, for there they deem it ill manners that one should touch it with his hand." Thomas Coryate describes, with much solemnity, the manner of using forks in Italy, and adds, "I myself have thought it good to imitate the Italian fashion since I came home to England," 1608. Two-pronged forks were made at Sheffield soon after. Three-pronged forks are more recent. Silver forks, previously only used by the highest classes, came into more general use in England about 1814.

Mr. G. Smith found a bronze fork with two prongs at Kouyunjik, Assyria, 1873.

FORMOSA, an island in the Pacific, 90 miles from the Chinese coast. The early Spanish and Dutch settlers were expelled by Chinese colonists about 1661. Amoy is the chief port. Savages hold the mountains. Mixed population, above 1,500,000. In May, 1874, the Japanese, with the consent of a Chinese mandarin, chastised the savage tribes here for massacring Japanese sailors on their proposed settlement on the isle. The Chinese threatened war if they did not quit within 90 days, 18 Aug. 1874. By British interposition the Japanese withdrew, an indemnity having been agreed on; treaty between Japan and China signed 31 Oct. 1874. Formosa flourished under the rule of Ting; removed in 1878. The plant of the Woosung railway brought here in 1878. George Psalmanazar published his fabricated description of Formosa in 1704. See *China*, 1884-5.

FORNOVO (Parma, Italy). Near here Charles VIII. of France defeated the Italians, 6 July, 1495.

FORSTER'S ACT, see *Education*, 1870.

FORT DU QUESNE, N. America. Near here general Braddock was surprised by a party of French and Indians, his troops routed and himself killed, 9 July, 1755. The fort was named *Fort Pitt* after its capture by Forbes, 24 Nov. 1758. It is now *Pittsburg*.

FORT ERIE (Upper Canada). This fortress was taken by the American general Browne, 3 June, 1814. After several conflicts it was evacuated by the Americans, 5 Nov. 1814.

FORT GEORGE, Inverness, N.W. Scotland, was erected in 1747, to restrain the Highlanders.—FORT WILLIAM, besieged by them in vain in 1746, is now in ruins.

FORTH, a great river of Scotland, rising in Ben Lomond, and entering the North Sea as an estuary, termed the Firth of Forth. The FORTH AND CLYDE CANAL was commenced 10 July, 1768, under the direction of Mr. Smeaton, and opened, 28 July, 1790. A communication was thus formed between the eastern and western seas on the coast of Scotland.

The FORTH RAILWAY-BRIDGE projected, and a raft launched in June, 1866.
Mr. (afterwards sir T.) Bouch, of Edinburgh, was engaged to prepare plans for a suspension-bridge, 1878.
The Forth bridge company accepted tenders from Wm. Arrol & Co. (1,250,000*l.*) for constructing bridge and railway, Oct. 1879; through Tay-bridge disaster, &c., the scheme was suspended and eventually abandoned by the company, 13 Jan. 1881.

The construction of the present FORTH BRIDGE was undertaken by the company supported by the North British, North Eastern, Great Northern, and Midland railway companies; the act was passed, June, 1882; engineers, Mr. John Fowler and Mr. Benjamin Baker, whose plans were based on the cantilever or bracket principle; Messrs. Wm. Arrol & Co. were the contractors. The rocky islet of Inchgarvie was of great importance in the construction of the bridge; the works began by building the foundations, Jan. 1883.

The last bolt was driven, 6 Nov. 1889; the strength of the bridge was tested by the passage of nearly 2,000 tons, steamed half way across, 21 Jan.; and officially tested for the board of trade, 20 Feb. 1890.

The first train which crossed the entire bridge was driven by the marchioness of Tweeddale, carrying a distinguished company, in five minutes, 24 Jan. 1890.

The prince of Wales after driving in the last rivet, in the presence of the duke of Edinburgh, the duke of Fife, prince George of Wales, the marquis of Tweeddale, the earl of Rosebery, and other distinguished visitors, including M. Eiffel, and other eminent engineers, said "Ladies and gentlemen, I now declare the Forth bridge open," 1.30 P.M. 4 March, 1890.

The ceremony was followed by a banquet in a hall adjoining the works.

The length of the bridge (from North to South Queensferry), with the approaching viaducts, is one mile 1,005 yards; the highest part of the bridge is 361 feet; the clear headway under the centre of the bridge is 152 feet above high water. The greatest number of men employed at one time was 5,000. 56 lives were lost during the construction, in spite of great precautions.

Estimated cost 1,600,000*l.*, actual cost about 2,500,000*l.*

Mr. Matthew William Thompson, chairman of the Forth bridge and Midland railway companies, and Mr. John Fowler, were created baronets, Mr. Benjamin Baker, was made K.C.M.G., and Mr. William Arrol was knighted, 1890.

The bridge was opened for the ordinary railway trains, 2 June, 1890.

The bridge slowly crossed by the queen coming south, 19 June, 1891.

By the fall of scaffolding through high wind, 3 painters killed, 29 Sept. 1891.

The bridge firmly withstood a violent gale, 29 Jan. 1892.

FORTIFICATION. The Phœnicians were the first people to fortify cities. Apollodorus says that Perseus fortified Mycenæ, where statues were afterwards erected to him. The modern system was introduced about 1500. Albert Dürer wrote on fortification in 1527; and great improvements were made by Vauban, who fortified many places in France; he died 1707. The new fortifications of Paris were completed in 1846; see *Paris*. In Aug. 1860, the British parliament passed an act for the expenditure of 2,000,000*l.* in one year upon the fortifications of Portsmouth, Plymouth, Pembroke, and Portland, the Thames, Medway, and Sheerness, Chatham, Dover, and Cork, and on the purchase of a central arsenal establishment; the estimated expense being 9,500,000*l.* A committee to investigate our fortifications was appointed, 16 April, 1868.

FORTUNE-TELLING is traced to the early astrologers, by whom the planets Jupiter and Venus were supposed to betoken happiness. The Sibyllæ were women said to be inspired by Heaven; see *Sibyls* and *Gipsies*. In England the laws against fortune-telling were at one time very severe. A declaration was published in France, 11 Jan. 1680, of exceeding severity against fortune-tellers and poisoners, under which several persons suffered death. *Hénault.* Fortune-tellers, although liable by the acts of 1743 and 1824 to be imprisoned as rogues and vagabonds, still exist in England, see *Palmistry*.

FORTY-SHILLING FREEHOLDERS, see *Freeholders*.

FORUM, at Rome, originally a market-place, became about 472 B.C. the place of assembly of the people in their tribes (the Comitia), and was gradually adorned with temples and public buildings.—Near FORUM TREBRONII, in Mœsia, the Romans were defeated by the Goths, Nov. 251. After a struggle in the morass, the emperor Decius and his son were slain and their bodies not recovered. See *Rome*, 1885.

FOSSALTA, near Bologna, central Italy. Here Enzo or Enrico, titular king of Sardinia, natural son of the emperor Frederick II., was defeated and made prisoner, 26 May, 1249, and retained. He was kept in honourable captivity till his death, 14 March, 1272.

FOTHERINGHAY CASTLE (Northamptonshire), built about 1400. Here Richard III. of England was born in 1450; and here Mary queen of Scots was tried, 11-14 Oct. 1586, and beheaded, 8 Feb. 1587. It was demolished by her son, James I. of England, in 1604.

FOUDROYANT, Nelson's flagship 1798; purchased by Mr. J. R. Cobb, F.S.A., of Brecon, from a German firm, and brought to the Thames, 28 Nov. 1892; proposal to make her a Nelson museum unsuccessful, October, 1893. A company having failed, Mr. J. R. Cobb restored the vessel, 1895-96; it was moored off Woolwich, and open to visitors, 19 June, 1896; wrecked in a gale at Blackpool, crew saved, 16 June, 1897; destroyed in a gale, 28 Nov. 1897; Mr. Cobb died, 6 Dec. 1897.

FOUGHARD, near Dundalk, N. Ireland. Here Edward, brother of Robert Bruce, after invading Ireland in 1315, was defeated by sir John Bermingham, 5 Oct. 1318. Bruce was killed by Roger de Maupis, a burgess of Dundalk.

FOUNDLING HOSPITALS are ancient. A species of foundling hospital was set up at Milan in 787, and in the middle ages most of the principal cities of the continent possessed one. The French government in 1790 declared foundlings to be the "children of the state."

FOUNTAINE COLLECTION of Renaissance works, Faience, Limoges, Raffaelle, and Palissy enamelled ware, &c. (unequalled); and also a fine collection of coins, medals, carved ivory work, &c., formed by sir Andrew Fountaine, in the reigns of Anne and George I.; placed in Narford Hall, Norfolk, about 1730; sold by Christie and Manson for 91,112*l.*, 16-19 June, 1884; by the sale of ancient drawings, on 11 July, the sum was raised to 96,278*l.* Sir Andrew Fountaine died in 1873.

FOUNTAINS. The fountain of Hero of Alexandria was invented about 150 B.C. Among the remarkable fountains at Rome are the Fontana di Trevi, constructed for pope Clement XII. in 1735; the Fontana Paolina, erected for pope Paul V. in 1612; and Fontana dell' Acqua Felice, called also the Fountain of Moses. The fountains in the palace gardens at Versailles, made for Louis XIV., and the Grand Jet d'Eau, at St. Cloud, are exceedingly beautiful. There are above 100 public fountains in Paris, the most striking being the Château d'Eau on the Boulevard St. Martin (by Girard, 1811) and that at the Palais Royal. London is not remarkable for fountains; the largest are in Trafalgar-square, constructed in 1845, after designs by sir Charles Barry. There are beautiful fountains at Chatsworth, in Derbyshire, the seat of the duke of Devonshire. The magnificent fountains at the Crystal Palace, Sydenham, were first publicly exhibited on 18 June, 1856, in the presence of the queen and 20,000 spectators.

The fountain at Park-lane, London, W., the gift of Mrs. Brown, was inaugurated and uncovered, 9 July, 1875. It has statues of Chaucer, Shakspeare, and Milton, the work of Mr. Thomas Croft, and cost 5000*l.*

FOURIERISM, a social system devised by M. Charles Fourier (who died in 1837). The Phalanstery (from *phalanx*), an association of 400 families living in one edifice, was to be so arranged as to give the highest amount of happiness at the lowest cost. The system failed; caused, it is said, by the smallness of the scale on which it was tried.

The *Familistère*, a somewhat similar system, established by M. Godin, a manufacturer of stoves &c., at Guise, N. France, was reported successful in Jan. 1886.

"FOUR MASTERS," a name given to Michael, Conary, and Cucogry O'Clery, and Ferfeasa O'Mulconry, who compiled from original documents the annals of Ireland from 2242 B.C. to A.D. 1616. An edition of these "Annals," printed from autograph MSS., with a translation edited by Dr. John O'Donovan, was published at Dublin in 1851. The "Four Masters" lived in the first half of the 17th century.

FOURTH ESTATE. Thomas Carlyle states that this term was applied to the newspaper press by Edmund Burke when speaking in the House of Commons. Burke died 9 July, 1797.

FOURTH PARTY, a name facetiously given to lord Randolph Churchill, sir Henry Drummond Wolff, Mr. (aft. sir) John Gorst, and a few other conservative members, active opponents of the government, also termed "free lances." The other parties were liberals, conservatives, and home-rulers (1880-5).

FRANCE, the Roman *Gaul* (*which see*). In the 5th century it was conquered by the Franks, a people of Germany, then inhabiting Franconia, where they became known about 240. The country was gradually named *Franken-ric*, Franks' kingdom. For the dynastic changes, see list of sovereigns, *infra.* Previous to the revolution, France was divided into 40 governments. In 1790 it was divided into 83 departments, and subsequently into 130, including Corsica, Geneva, Savoy, and other places, chiefly conquests. In 1815 the departments were reduced to 86; in 1860 they were raised to 89 by the acquisition of Savoy and Nice,* reduced to 86 by the loss of Alsace and Lorraine. The political constitution has been frequently changed since 1789. For details of more important events, see separate articles. The title of king of France, adopted by the English sovereigns from Edwd. 3rd, 1340, was given up by Geo. 3 in 1802. Colonies.

FRANCE, ISLE OF, see *Mauritius*.

FRANCHE COMTÉ, in upper Burgundy, E. France, was conquered by Julius Cæsar, about 45 B.C.; by the Burgundians, early in the fifth century, A.D.; and by the Franks about 534. It was made a county for Hugh the Black in 915, and received its name from having been taken from Renaud III. (1127-48), and restored to him. By marriage with the count's daughter, Beatrice, the emperor Frederick I. acquired the county, 1156. Their descendant, Mary of Burgundy, by marriage with the archduke Maximilian, conveyed it to the house of Austria, 1477. It was conquered by the French, 1668; restored by the treaty of Aix la Chapelle, 2 May, 1668; again conquered; and finally annexed to France by treaty, 1678.

FRANCHISE. A privilege or exemption from ordinary jurisdiction, and anciently an asylum or sanctuary where the person was secure. In Spain, churches and monasteries were, until lately, franchises for criminals, as formerly in England; see *Sanctuaries*. In 1429, the ELECTIVE FRANCHISE for counties was restricted to persons having at least 40*s*. a year in land, and resident; for recent changes, see *Reform*.

FRANCIS' ASSAULT ON THE QUEEN. John Francis, a youth, fired a pistol at queen Victoria as she was riding down Constitution-hill, in an open barouche, accompanied by prince Albert, 30 May, 1842. The queen was uninjured. Previous intimation having reached the palace of the intention of the criminal, her majesty had commanded that none of the ladies of her court should attend her. Francis was condemned to death, 17 June following, but was transported for life. He was liberated on ticket-of-leave in 1867.

FRANCISCANS. Grey or Minor Friars, an order founded by St. Francis d'Assisi, about 1209. Their rules were chastity, poverty, obedience, and very austere regimen. About 1220 they appeared in England, where, at the time of the dissolution of monasteries by Henry VIII., they had fifty-five abbeys or other houses, 1536-38.

FRANCISCO, SAN, the largest city in California, *which see*. The centenary of the foundation of the city by Franscican monks, 8 Oct. 1776, was celebrated in 1876. The city suffered by earthquakes in 1868 and 1872. Mr. William Coleman, an eminent maintainer of public order, died aged about 69, Dec. 1893. Population, 1880, 233,959; 1890, 298,997.

FRANCONIA, or FRANKENLAND (on the Maine), formerly a circle of the German empire, part of Thuringia, was conquered by Thierry, king of the Franks, 530, and colonized. Its count or duke, Conrad, was elected king of Germany, 8 Nov. 911; and his descendant was the emperor Conrad III., elected 1138, and another duke. Franconia was made a distinct circle from Thuringia in 1512. At its subdivision in 1806 various German princes obtained a part; but in 1814 the largest share was awarded to Bavaria.

FRANCO-PRUSSIAN WAR originated in the emperor of the French's jealousy of the greatly increased power of Prussia, through the successful issue of the war with Denmark in 1864, and with Austria in 1866. The German Confederation was thereby annulled, and the North German Confederation established under the supremacy of the king of Prussia, to whose territories were further annexed Hanover, Hesse-Cassel, Nassau, Frankfort, and other provinces. This great augmentation of the power of Prussia was mainly due to the energetic policy of count Bismarck-Schönhausen, prime minister since Sept. 1862.

In a draft treaty, secretly proposed to the Prussian government by the French emperor in 1866: "1. The emperor recognises the acquisitions which Prussia has made in the last war; 2. The king of Prussia promises to facilitate the acquisition of Luxemburg by France; 3. The emperor will not oppose a federal union of the northern and southern states of Germany, excluding Austria; 4. The king of Prussia, in case the emperor should enter or conquer Belgium, will support him in arms against any opposing power; 5. They enter into an alliance offensive and defensive."

[This draft treaty was published in the *Times*, 25 July, 1870. After some discussion, its authenticity was admitted; count Bismarck asserting that it emanated entirely from the French emperor, and that the scheme had never been seriously entertained by himself.]

In March, 1867, a dispute arose through the French emperor's proposal for purchasing Luxemburg from the king of Holland, which was strongly opposed by Prussia, as that province had formed part of the dissolved Germanic Confederation; and the affair was only settled by a conference of the representatives of the great powers in London, at which the perfect neutrality of Luxemburg was determined, together with the withdrawal of the Prussian garrison and the destruction of the fortifications . . . . . 7-11 May, 1867

Prince Leopold of Hohenzollern-Sigmaringen (connected with the Prussian dynasty, and brother of Charles, prince of Roumania), consented to become a candidate for the throne of Spain, 4 July, 1870.

This was denounced by the French government. Threatening speeches were made in the French chamber by the duc de Grammont, the foreign minister, and eventually, after some negotiation and the intervention of Great Britain, prince Leopold, with the consent of his sovereign, declined the proffered crown . . . 12 July, ,,

The submission did not satisfy the French government and nation, and the demand for a guarantee against the repetition of such an acceptance irritated the Prussian government, and led to the termination of the negotiations, the king refusing to receive the count Benedetti, the French minister . . . . . 13 July, 1870

Energetic but fruitless efforts to avert the war were made by earl Granville, the British foreign minister . . . . . about 15 July, ,,

War was announced by the emperor, with the hearty consent of the great majority of the chambers. The left or republican party opposed the war; M. Thiers and a few others only protested against it as premature . . . . 15 July, ,,

[After his surrender on 2 Sept., the emperor told count Bismarck that he did not desire war, but was driven into it by public opinion. He appears to have been greatly deceived as to the numerical strength of his army, and its state of preparation.]

"The greatest national crime that we have had the pain of recording since the days of the first French revolution has been consummated. War is declared—an unjust but premeditated war."—*Times*, 16 July, 1870.

(*For details of the battles see separate articles.*)

French Army, about 300,000:—

1st corps, under marshal MacMahon.
2nd corps, under general Frossard.
3rd corps, under marshal Bazaine.
4th corps, under general Ladmirault.
5th corps, under general De Failly.
6th corps, under marshal Canrobert.
Imperial guard, under general Bourbaki.

Commander-in-chief, the emperor; general Le Bœuf, second; succeeded by marshal Bazaine.

Prussian Army, about 640,000:—

1. Northern, under general Vögel von Falckenstein, about 220,000, defending the Elbe, Hanover, &c.
2. Right, under prince Frederick Charles, about 180,000.
3. Centre, under generals Von Bittenfeld and Von Steinmetz, about 80,000.
4. The left, under the crown prince of Prussia, about 166,000.

Commander-in-chief, king William; second, general Helmuth Karl Bernhard von Moltke (born 26 Oct., 1800; died 24 April, 1891).

The North German army, at the beginning of August, consisted, firstly, of 550,000 line, with 1,200 guns and 53,000 cavalry; secondly, of 187,000 reserve, with 234 guns and 18,000 cavalry; and, thirdly, of 205,000 landwehr or militia, with 10,000 cavalry, making a grand total of 944,000 men, with 1,680 mobilised guns and 103,000 horses.

To these must be added, firstly, the Bavarians, 69,000 line, with 192 guns and 14,800 horses—25,000 reserve with 2,400 horses, and 22,000 landwehr; secondly, the Würtembergers—22,000 line with 54 guns and 6,200 horses, 6,500 reserve, and 6,000 landwehr; and, thirdly, the Badenese—16,000 line with 54 guns, 4,000 reserve, and 9,600 landwehr.

All the German troops taken together as under arms at present, 1,124,000 men. Aug. 1870.

Four weeks previously, on the peace footing, they numbered only 360,000.

The French and Germans in this war were considered to be equally brave and efficient; but the French generals appear to have acted greatly upon impulse. The Germans seem to have been invariably guided by a well matured plan, their tactics mainly consisting in bringing vast masses to bear on the point where they were anxious to prevail. From Saarbrück to Sedan, Moltke appears to have left nothing to chance; and all his arrangements were ably carried out.

The causes of the early ruin of the French army were: "1, the enormous superiority of the Germans in regard to numbers; 2, the absolute unity of their command and concert of operation; 3, their superior mechanism in equipment and supplies; 4, the superior intelligence, steadiness and discipline of the soldiers; 5, superior education of the officers, and the dash and intelligence of the cavalry."—*Quarterly Review.*

The university was founded in 1506, and incorporated with that of Breslau in 1811. Near Frankfort, 12 Aug. 1759, Frederick of Prussia was defeated by the Russians and Austrians, see *Cunnersdorf*. Population, 1890, 55,724.

FRANKING LETTERS, passing letters free of postage, was claimed by parliament about 1660. The privilege was restricted in 1839, and abolished after the introduction of the uniform penny postage, 10 Jan. 1840. The queen was amongst the first to relinquish her privilege.

FRANKLIN, the English freeholder in the middle ages; see "the Franklin's Tale," in Chaucer's Canterbury Tales (written about 1364).

FRANKLIN, SEARCH FOR. Sir John Franklin, with captains Crozier and Fitzjames, in H. M. ships *Erebus* and *Terror* (carrying in all 138 persons), sailed on his third arctic expedition of discovery and survey, from Greenhithe, on 19 May, 1845; see *North-west Passage*. Their last despatches were from the Whalefish islands, dated 12 July, 1845. Their protracted absence caused intense anxiety, and several expeditions were sent from England and elsewhere in search of them, and coals, provisions, clothing, and other necessaries, were deposited in various places in the Arctic seas by our own and by the American government, by lady Franklin, and numerous private persons. The *Truelove*, captain Parker, which arrived at Hull, 4 Oct. 1849, from Davis's Straits, brought intelligence (not afterwards confirmed) that the natives had seen sir John Franklin's ships in the previous March, frozen up by the ice in Prince Regent's inlet. Other accounts were equally illusory. Her majesty's government, on 7 March, 1850, offered a reward of 20,000*l.* to any party of any country, that should render efficient assistance to the crews of the missing ships. Sir John's first winter quarters were found at Beechy island by captains Ommanney and Penny.

[This expedition arrived at Beechy Island 14 Aug. 1852. The *Assistance* and *Pioneer* proceeded through Wellington Channel, and the *Resolute* and *Intrepid* to Melville Island; the *North Star* remaining at Beechy Island.]

LADY FRANKLIN'S EQUIPMENTS.

Lady Franklin, aided by a few friends (and by the "Tasmanian Tribute" of 1500*l.*), equipped four expeditions (Nos. 12, 13, 14, 16).

12. *Prince Albert*, capt. Forsyth, sailed from Aberdeen to Barrow Straits . . . 5 June, 1850

17. The second AMERICAN expedition, the *Advance*, under Dr. Kane . . . . . early in June, ,,

18. The *Phœnix* (with the *Breadalbane* transport), commander Inglefield, accompanied by lieut. Bellot, sailed in May; he returned, bringing despatches from Sir E. Belcher, &c. . . Oct. ,,

The *Investigator* and sir E. Belcher's squadron were safe; but no traces of Franklin's party had been met with. Lieut. Bellot was unfortunately drowned in August while voluntarily conveying despatches for sir E. Belcher. Capt. M'Clure had left the *Herald* (10) at Cape Lisburne, 31 July, 1850. On 8 Oct. the ship was frozen in, and so continued for nine months. On 26 Oct. 1850, while on an excursion party, the captain discovered an entrance into Barrow's Straits, and thus established the existence of a N.E.—N.W. *passage*. In Sept. 1851, the ship was again fixed in ice, and so remained till lieut. Pim and a party from capt. Kellett's ship, the *Resolute* (11), fell in with them in April, 1853. The position of the *Enterprise* (4) was still unknown.

A monument to Bellot's memory was erected at Greenwich. His "Journal" was published in 1854

Dr. Rae, in the spring of 1853, again proceeded towards the magnetic pole; and in July, 1854, he reported to the Admiralty that he had purchased from a party of Esquimaux a number of articles which had belonged to sir J. Franklin and his party—namely, sir John's star or order, part of a watch, silver spoons, and forks with crests, &c. He also reported the statement of the natives, that they had met with a party of white men about four winters previous, and had sold them a seal; and that four months later, in the same season, they had found the bodies of thirty men (some buried), who had evidently perished by starvation; the place appears, from the description, to have been in the neighbourhood of the Great Fish river of Back. Dr. Rae arrived in England on 22 Oct. 1854, with the relics, which have since been deposited in Greenwich hospital. He and his companions were awarded 10,000*l.* for their discovery. Dr. Rae, aged 80, died . . . . . 22 July, 1893

19. The *Phœnix*, *North Star*, and *Talbot*, under the command of capt. Inglefield, sailed in May, and returned in . . . . . Oct. 1854

Sir E. Belcher (No. 11), after mature deliberation, in April, 1854, determined to abandon his ships, and gave orders to that effect to all the captains under his command; and capt. Kellett gave similar orders to capt. M'Clure, of the *Investigator*. The vessels had been abandoned 15 May* when the crews of the *Phœnix* and *Talbot* (under capt. Inglefield) arrived (19). On their return to England all the captains were tried by court martial and honourably acquitted 17-19 Oct. ,,

Capt. Collinson's fate was long uncertain, and another expedition was in contemplation, when intelligence came, in Feb. 1855, that he had met the *Rattlesnake* (16) at Fort Clarence on 21 Aug. 1854, and had sailed immediately, in hopes of getting up with capt. Maguire in the *Plover* (1), which had sailed two days previously. Capt. Collinson having failed in getting through the ice in 1850 with capt. M'Clure, returned to Hong-Kong to winter. In 1851 he passed through Prince of Wales's Straits, and remained in the Arctic regions without obtaining any intelligence of Franklin till July, 1854, when, being once more released from the ice, he sailed for Fort Clarence, where he arrived as above mentioned. Captains Collinson and Maguire arrived in England in . . . . . May, 1855

20. The third AMERICAN expedition in search of Dr Kane, in the *Advance*, consisted of the *Release* and the steamer *Arctic*, the barque *Eringo*, and another vessel under the command of lieut. H. J. Hartstene, accompanied by a brother of Dr. Kane as surgeon . . . 31 May, ,,

[On 17 May, 1855, Dr. Kane and his party quitted the *Advance*, and journeyed over the ice, 1300 miles, to the Danish settlement; on their way home in a Danish vessel, they fell in with lieut. Hartstene, 18 Sept.; and arrived with him at New York, 11 Oct. 1855. Dr. Kane visited England in 1856; he died in 1857.]

The Hudson's Bay Company, under advice of Dr. Rae and sir G. Back, sent out an overland expedition, June 1855, which returned Sept. following. Some more remains of Franklin's party were discovered ,,

21. The 18th British expedition (equipped by lady Franklin and her friends, the government having declined to fit out another)—the *Fox*, screw steamer, under capt. (since sir) F. L. M'Clintock, R.N. (*see* No. 11)—sailed from Aberdeen 1 July, 1857; returned . . . . 22 Sept. 1859

On 6 May, 1859, lieut. Hobson found at Point Victory, near Cape Victoria, besides a cairn, a tin case, containing a paper, signed 25 April, 1848, by capt. Fitzjames, which certified that the ships *Erebus* and *Terror*, on 12 Sept. 1846, were beset in lat. 70° 50′ N., and long. 98° 23′ W.; that sir John Franklin died 11 June, 1847; and that the ships were deserted 22 April, 1848. Captain M'Clintock continued the search, and discovered skeletons and other relics. His Journal was published in Dec. 1859; and on 28 May, 1860, gold medals were given to him and to lady Franklin by the Royal Geographical Society.

Mr. Hall, the arctic explorer, reported, in Aug. 1865, circumstances that led him to hope that capt. Crozier and others were surviving.

A national monument by Noble, set up in Waterloo-place, was inaugurated, 15 Nov. 1866. It is inscribed to "FRANKLIN the great navigator and

* Capt. Kellett's ship, the *Resolute*, was found adrift 1000 miles distant from where she was left, by a Mr. George Henry, commanding an American whaler, who brought her to New York. The British government having abandoned their claim on the vessel, it was bought by order of the American congress, thoroughly repaired and equipped, and entrusted to capt. H. J. Hartstene, to be presented to queen Victoria. It arrived at Southampton, 12 Dec. 1856; was visited by her majesty on the 16th; and formally surrendered on the 30th. When the ship was broken up a desk was made of the wood, and presented by queen Victoria to the president of the United States, 29 Nov. 1880.

FREDERICKSBURG (Virginia, N. America). On 10 Dec. 1862, general Burnside and the federal army of the Potomac crossed the small deep river Rappahannock. On 11 Dec. Fredericksburg was bombarded by the federals and destroyed. On the 13th commenced a series of desperate unsuccessful attacks on the confederate works, defended by generals Lee, Jackson, Longstreet, and others. General Hooker crossed the river with the reserves, and joined in the conflict, in vain. On 15 and 16 Dec. the federal army recrossed the Rappahannock. The battle was one of the most severe in the war.

FREDERICKSHALD (Norway). Charles XII. of Sweden was killed by a cannon-shot before its walls, while examining the works. His hand was on his sword, and a prayer-book in his pocket, 11 Dec. 1718.

FREE CHURCH OF ENGLAND (Evangelical). An Episcopal Church founded in 1844, and enrolled in her majesty's High Court of Chancery in 1863.

The bishops are Benjamin Price (bishop primus, 1863), who died at Ilfracombe 6 Jan. 1896; Frederick Newman, at Ashford, Kent; and a missionary bishop, Henry Orion Meyers, at Hounslow.

This church grew out of the Oxford tractarian movement of 1830. The first church was planted at Bridgetown, Devon, by the rev. James Shore, M.A., curate of the parish; it was built by the duke of Somerset, and opened in 1844. Two other churches were established in the same year—one at Exeter, and the other at Ilfracombe. But it was not till 1849 that much progress was made, when an impetus was given to the movement by the late bishop of Exeter's (Philpott) prosecution of Mr. Shore, for preaching in his diocese without his licence. The work spread, and the organization was enrolled under a deed poll as an "Episcopal Church." But as "Consecration" could not be obtained a bishop president was elected till 1876, when the secession of the right rev. bishop Cummins from the "Protestant Episcopal Church of America" (the first bishops of which church were consecrated by the archbishop of Canterbury at Lambeth Palace chapel, in 1787), afforded an opportunity, which was embraced, of obtaining episcopal consecration for the bishops of the Free Church of England in the Canterbury line of episcopal succession.

The services of the F. C. E. are conducted exactly as those of the evangelical section of the national church, excepting the omission of some words in the offices which express doctrines opposed to the Protestant Reformation.

A Free Church congress met at Manchester, 10 Nov. 1892; at Birmingham, 26 March, 1895; Nottingham, 10 March, 1896; Bristol, 8 March, 1898. Nonconformists, with the exception of Unitarians, are admitted to the congress. Annual meetings.

FREE CHURCH OF SCOTLAND was formed by an act of secession of nearly half the body from the national church of Scotland, headed by Dr. Thos. Chalmers and other eminent ministers, 18 May, 1843. The difference arose on the question of the right of patrons to nominate to livings; see *Patronage.* The Free Church claims for the parishioners the right of a veto. Much distress was endured the first year by the ministers of the new church, although 366,719*l.* 14*s.* 3*d.* had been subscribed. In 1853 there were 850 congregations; in 1873, 954. A large college was founded in 1846. In 1856 the sustentation fund amounted to 108,638*l.* from which was paid the sum of 138*l.* each to 700 ministers.

FREEMASONRY. Writers on masonry, themselves masons, affirm that it has had a being "ever since symmetry began, and harmony displayed her charms." It is traced by some to the building of Solomon's temple; and it is said the architects from the African coast, Mahometans, brought it into Spain, about the 9th century. A modern speculative cosmopolitan freemasonry with some analogies has essential differences from some early secret societies, and is not earlier than the seventeenth century. In 1717, the grand lodge of England was established; that of Ireland in 1730; and that of Scotland in 1736. Freemasons were excommunicated by the pope in 1738; again condemned, 30 Sept. 1865. Freemasons' Hall, Great Queen-street, London, built 1771; rebuilt, and consecrated 14 April, 1869. Partly burnt, 3 May, 1883. The charity instituted, 1788. The duke of Sussex and the earl of Zetland were each twenty-five years grand-master of England. Earl de Grey, afterwards marquis of Ripon, was installed grand-master of the English freemasons in room of the earl of Zetland, 14 May, 1870. The marquis (on becoming a Romanist) resigned 1 Sept. 1874. He was succeeded by the prince of Wales; installed in the Royal Albert Hall, 28 April, 1875. The duke of Leinster, grand-master for Ireland for 60 years, died 10 Oct. 1874; succeeded by the duke of Abercorn. The prince of Wales was installed at Edinburgh as patron of the freemasons of Scotland, 12 Oct. 1870. As grand-master past and present of the mark masons, London, 8 Dec. 1883. Installed as Grand Master of the Grand Lodge, 1 July, 1886; re-elected, 2 March, 1898, Prince Leopold installed as master of the "lodge of antiquity" (at one time held by sir Christopher Wren), 25 June, 1879.

FREE TRADE principles, advocated by Adam Smith in his "Wealth of Nations" (1776), triumphed in England when the corn laws were abolished in 1846, and the commercial treaty with France was adopted in 1860. Richard Cobden, who was very instrumental in passing these measures, and termed "Apostle of Free Trade," died 2 April, 1865. Since 1830 the exports have been tripled. See *French Treaty*. An agitation for free trade has begun in the United States. A reform league was formed at Boston, 20 April, 1869; and the movement became active in New York in Nov., and has since continued. A free-trade budget was brought in by the ministry in Sydney in 1873. A new free-trade league was inaugurated in London in Dec. 1873; and one at Melbourne, Australia, Sept. 1876. Free trade warmly advocated in New South Wales, supported in New Zealand; opposed in Canada and in Victoria, Australia, 1877-80. Much agitation against free-trade in 1880-2. FRENCH EXHIBITION, at Earl's Court, West Brompton, London, W., was opened by the lord mayor Isaacs, 17 May, closed 1 Nov. 1890.

The exhibition principally consisted of objects which appeared in the Universal Exhibition at Paris, 1889. It included works of art, manufactures, books, panoramas of parts of Paris, and a hypodrome. In the "Wild East grounds" appeared Algerian Arabs, with their families and steeds; a chariot drawn by three African lions was driven round the arena

FRENCH LANGUAGE is mainly based on the rude Latin of the western nations subjugated by the Romans. German was introduced by the Franks in the 8th century. In the 9th the Gallo-Romanic dialect became divided into the *Langue d'oc* of the south and the *Langue d'oil* of the north. The dialect of the Isle of France became predominant in the 12th century. The French language as written by Froissart assimilates more to the modern French, and its development was almost completed when the Académie Française (established by Richelieu in 1634) published a dictionary of the language in 1674. The French language, laws, and customs were introduced into England by William I., 1066. Law pleadings were changed from French to English in the reign of Edward III., 1362. *Stow.*

FRENCH TREATY, the term given to the treaty of commerce between Great Britain and France, signed 23 Jan. 1860, at Paris, by lord Cowley and Richard Cobden and by the ministers MM. Baroche and Rouher. The beneficial results of this treaty compensated for the depression of trade occasioned by the civil war in North America (1861-5). The French assembly determined that on 15 March, 1871, this treaty should cease in 12 months from that date. A fresh treaty was signed at Paris 29 Jan. 1873. Free trade was somewhat restricted, but the new French navigation law was relaxed. Negotiations for a new treaty began in London, 26 May, 1881. See *France*, 1881-2.

FRESCO PAINTINGS are executed on plaster while fresh. Very ancient ones exist in Egypt, Italy, and England, and modern ones in the British houses of parliament, at Berlin, and other places. The fresco paintings by Giotto and others at the Campo Santo, a cemetery at Pisa, executed in the 13th century, are justly celebrated. See *Stereochromy*.

FRIENDLY ISLES, in the Southern Pacific, consist of a group of more than 180 islands, the largest of which is Tonga-taboo, the sacred isle, 130 sq. m. These islands were discovered by Tasman, in 1643; visited by Wallis, who called them Keppel Isles, 1767; and by captain Cook, who named them on account of the then friendly disposition of the natives, 1777.

The isles were visited by missionaries in 1797; of whom the Wesleyans were most successful in conversions, 1820, *et seq.*
Many chiefs submitted to king George I. in 1845. He set up a constitution and summoned a parliament of 40 members in 1862. He concluded a treaty with Germany, 1 Nov. 1876; and with Great Britain, 29 Nov. 1879. His chief adviser, the rev. Shirley Baker, who had, it is stated, usurped and abused much power, was expelled by sir John B. Thurston, the British high commissioner of Fiji, and replaced by Mr. Basil Thomson, who published an account of the affair in 1895.
King George I. died, aged upwards of 90, 19 Feb. 1893; and was succeeded by his great-grandson, Jioaji Tubou II., born 18 June, 1874.

In London, the Defoe Friendly Society dates from 1687; the Norman, 1703; the Lintot, 1708.

An example of fraud, credulity, and mismanagement was given on investigation by the registrar-general into the affairs of the "Independent Mutual Brethren Friendly Society," founded in 1873, and broken up in 1886. Members, 2,225,000; capital, about 16,000,000*l.*; return, July, 1891.

FRIESLAND: EAST (N. Germany), the ancient Frisia, formerly governed by its own counts. On the death of its prince Charles Edward, in 1744, it became subject to the king of Prussia; Hanover disputed its possession, but Prussia prevailed. It was annexed to Holland by Bonaparte, in 1806, to the French empire, 1810; and awarded to Hanover in 1815. The English language is said to be mainly derived from the old Frisian dialect.—FRIESLAND, WEST, in Holland, was part of Charlemagne's empire in 800. It passed under the counts of Holland about 936, and was one of the seven provinces which renounced the Spanish yoke in 1580. The term *Chevaux de Frise* (or *Cheval de Frise*, a *Friesland Horse*) is derived from Friesland, where it was invented.

FRIULI (Venetia), made a duchy by Alboin the Lombard, when he established his kingdom about 570. It was conquered by Charlemagne. Henri, a Frenchman, made duke, was assassinated in 799, which was the fate of duke Berengarius, king of Italy and emperor, in 924. The emperor Conrad gave the duchy to his chancellor Poppo, patriarch of Aquileia, in the 11th century; it was conquered by Venice in 1420; annexed to Austria, 1797; to France, 1805; to Austria, 1814; to Italy, 1866.

FROBISHER'S STRAITS, discovered by sir Martin Frobisher, who tried to find a north-west passage to China, and after exploring the coast of New Greenland, entered this strait, 11 Aug. 1576. He returned to England, bringing with him a quantity of black ore, supposed to contain gold, which induced queen Elizabeth to patronise a second voyage. This led to a third fruitless expedition. He was mortally wounded at Brest, Nov. 1594.

FUENTES DE ONORO (central Spain). On 2 May, 1811, Massena crossed the Agueda with 40,000 infantry, 5000 horse, and about 30 pieces of artillery, to relieve Almeida. He expected every day to be superseded in his command, and wished to make a last effort for his own military character. Wellington could muster no more than 32,000 men, of which only 1200 were cavalry. He however determined to fight rather than give up the blockade of Almeida. After much fighting, on 3 May, night came on and stopped the conflict. Next day Massena was joined by Bessières with a body of the Imperial guard; and on 5 May, made his grand attack. In all the war there was not a more dangerous hour for England. The fight lasted until evening, when the lower part of the town was abandoned by both parties—the British maintaining the chapel and crags, and the French retiring a cannon-shot from the stream. *Napier.*

GABELLE (from *Gabe*, a gift), a term applied to various taxes, but afterwards restricted to the duty upon salt, first imposed by Philip the Fair on the French in 1286. *Duruy.* Our Edward III. termed Philip of Valois, who exacted the tax rigorously, the author of the *Salic* law (from *sal*, salt), 1340. The assessments were unequal, being very heavy in some provinces and light in others; owing to exemptions purchased from the sovereigns. The tax produced 38 millions of francs in the reign of Louis XVI. It was a grievous burden, and tended to hasten the revolution, during which it was abolished (1790).

GAGGING ACT, properly so called, meant to protect the king and government from the harangues of seditious meetings, was enacted 8 Dec. 1795, when the popular mind was much excited. In Dec. 1819, soon after the Manchester affray, an act was passed for restraining public meetings and cheap periodical publications; it was popularly called "gagging bill." See *Six Acts*. Statutes coercing popular assemblies, particularly in Ireland, have been also so designated. See *Germany*, 1879. The terms "gagging" and "guillotining" were applied to Mr. Gladstone's resolutions for restricting (by the closure) the discussion on the Irish Home Rule bill, 30 June, 21 Aug. 1893. Mr. W. H. GARDENERS' CHRONICLE, a weekly paper, long edited by Dr. John Lindley, first appeared, 2 Jan. 1841.

GARDENING. The first garden, Eden, planted by God. *Gen.* ii. The Scriptures abound with allusions to gardens, particularly the Song of Solomon and the prophets; and Christ's agony took place in a garden. Xenophon describes the gardens at Sardis; and Epicurus and Plato taught in gardens. Theophrastus's History of Plants was written about 322 B.C. Horace, Virgil, and Ovid derive many images from the garden (50 B.C. to A.D. 50); and Pliny's Tusculan villa is circumstantially described (about A.D. 100). The Romans introduced gardening into Britain, the religious orders maintained it, and its cultivation increased in the 16th century, when many Flemings came here to escape the persecutions of Philip II. Miller's dictionary was published in 1724; the Horticultural Society (*which see*) was established in 1804; Loudon's Encyclopædia of Gardening was first published in 1822, and his Encyclopædia of Plants in 1829; an act for the protection of gardens and ornamental grounds in cities was passed in 1863. GARTER, ORDER OF THE. Edward III., when at war with France and eager to draw the best soldiers of Europe into his interest, projected the revival of king Arthur's round table, and proclaimed a solemn tilting On New Year's day 1343-4, he published letters of protection for the safe coming and returning of such foreign knights as would venture their reputation at the jousts and tournaments about to be held. These took place 23rd April, 1344. A table was erected in Windsor castle of 200 feet diameter, and the knights were entertained at the king's expense. In 1346 Edward gave his garter for the signal of a battle that had been crowned with success (supposed to be Cressy), and being victorious on sea and land, and having David, king of Scotland, a prisoner, he, in memory of these exploits, is said to have instituted this order, 23 April, 1349. *See below.*

Edward III. gave the garter pre-eminence among the ensigns of the order; it is of blue velvet bordered with gold, with the inscription in old French—"*Honi soit qui mal y pense*" (Evil be to him who evil thinks) The knights are installed at Windsor, and styled *Equites aureæ Periscelidis*, knights of the golden garter. *Beatson.*
The order until king Edward VI.'s time was called the order of St. George, the patron saint of England. His figure on horseback, presented as holding a spear, and killing the dragon, was first worn by the knights of the institution. It is suspended by a blue ribbon across the body from the shoulder.

GASTEIN (Salzburg, Austria). The long discussion between Austria and Prussia respecting the disposal of the duchies conquered from Denmark, was closed by a provisional convention signed here by their ministers (Blum for Austria and Bismarck for Prussia) 14 Aug. 1865. This convention was severely censured by the other powers and abrogated in 1866.

Austria was to have the temporary government of Holstein, and Prussia that of Sleswig; the establishment of a German fleet was proposed, with Kiel as a Federal narbour, held by Prussia; Lauenburg was absolutely ceded to Prussia, and the king was to pay Austria as a compensation 2,500,000 Danish dollars.

GATESHEAD, a borough in Durham, on the Tyne, opposite Newcastle. At Gateshead-fell, William I. defeated Edgar Atheling and his Scotch auxiliaries in 1068. Gateshead was made a parliamentary borough by the reform act in 1832. Returns one member (1885). Population, 1881, 65,803; 1891, 85,709.

Between twelve and one o'clock, 5, 6 Oct. 1854, a fire broke out in a worsted manufactory here, which set fire to a bond warehouse containing a great quantity of nitre, sulphur, &c., causing a terrific explosion, felt at nearly twenty miles' distance, and totally destroying many buildings, and burying many persons in the ruins. At the moment of the explosion, large masses of blazing materials flew over the Tyne and set fire to many warehouses in Newcastle. About fifty lives were lost, and very many persons were seriously wounded. The damage was estimated at about a million pounds.

GATLING GUN OR BATTERY. An American invention exhibited at Paris in 1867. It is intended to discharge at once a number of projectiles smaller than the shells of field guns, and it has as many locks as barrels. It was tried at Shoeburyness and rejected as inferior to a field gun firing shrapnel. A powder to be used in the Gatling, invented by M. Pertuiset, was tried in London, Aug. 1870.

GAUGAMELA, see *Arbela.*

GAUGES (in railways). Much discussion (termed "the battle of the gauges") began among engineers about 1833. Mr. I. M. Brunel approved of the broad gauge, adopted on the Great Western Railway; and Mr. R. Stephenson, Joseph Locke, and others, chose the narrow. A 2 foot gauge was recommended in Feb. 1870, having been successful on the Festiniog railway, Wales; with Robt. Fairlie's "bogie" engine was much adopted at home and abroad. About 200 miles of the S.W. lines of the Great Western were altered from the broad to the narrow gauge in a few days, June, 1874, and on 20-23 May, 1892, the broad gauge was totally superseded on the Great Western.

GAUGING, measuring the contents of any vessel of capacity, with respect to wine and other liquids, was established by a law, 27 Edw. III. 1352.

GAUL AND GAULS. Gallia, the ancient name of France and Belgium. The Gauls termed by the Greeks Galatæ, by the Romans, Galli or Celtæ, came originally from Asia, and invading Eastern Europe, were driven westward, and settled in Spain (in Galicia), North Italy (Gallia Cisalpina), France and Belgium (Gallia Transalpina), and the British isles (the lands of the Cymry or Gaels).

GENEVA CONVENTION, for the succour of the wounded in time of active warfare. Having been a witness of the horrors of the battle-field of Solferino, 24 June, 1859, M. Henri Dunant, a Swiss, published his experiences, which induced the *Société Génévoise d'Utilité Publique* in Feb. 1863 to discuss the question whether relief societies might not be formed in time of peace to help the wounded in time of war by means of qualified volunteers. At an international conference held 26 Oct. 1863, fourteen governments, including Great Britain, France, Austria, Prussia, Italy, and Russia, were represented by delegates. The propositions then drawn up were accepted as an international code by a congress which met at Geneva, 8 Aug. 1864, and on 22 Aug. a convention was signed by twelve of the delegates, and it was eventually adopted by all civilised powers except the United States. International conferences were held at Paris in 1867 and at Berlin in 1869 for further developing in a practical manner the objects of the Geneva conference. The International Society (termed "the Red Cross

Society"), established in consequence of these proceedings was very energetic in relieving the wounded and sick during the Franco-Prussian war in 1870, its flag being recognised as neutral. GENS-D'ARMES were anciently the king's horse-guards only, but afterwards the king's *gardes-du-corps;* the musqueteers and light horse were reckoned among them. There was also a company of gentlemen (whose number was about 250) bearing this name. Scots guards were about the persons of the kings of France from the time of St. Louis, who reigned in 1226. They were organised as a royal corps by Charles VII. about 1441 ; the younger sons of Scottish nobles being usually the captains. The name gens-d'armes was afterwards given to the police; but becoming obnoxious, was changed to "municipal guard" in 1830.

GENTLEMAN (from *gentilis*, of a *gens*, a race or clan). The Gauls observing that during the empire of the Romans, the *scutarii* and *gentiles* had the best appointments of all the soldiers, applied to them the terms *écuyers* and *gentilshommes.* This distinction of gentlemen was much in use in England, and was given to the well-descended about 1430. *Sidney.* Gentlemen by blood were those who could show four descents from a gentleman who had been created by the king by letters patent.

GENTLEMEN-AT-ARMS (formerly styled the Band of Gentlemen Pensioners) is the oldest corps in England, with the exception of the Yeomen of the Guard. The band was instituted by Henry VIII. in 1509, and was originally composed entirely of gentlemen of noble blood, whom he named his pensioners or spears. William IV. commanded that it should be called his majesty's honourable corps of gentlemen-at-arms, 7 March, 1834.

GEOGRAPHY. The first geographical records are in the Pentateuch, and in the book of Joshua. Homer describes the shield of Achilles as representing the earth surrounded by the sea, and also the countries of Greece, islands of the Archipelago, and site of Troy. *Iliad.* The priests taught that the temple of Apollo at Delphos was the centre of the world. Anaximander of Miletus was the inventor of geographical maps, about 568 B.C. Hipparchus attempted to reduce geography to a mathematical basis, about 135 B.C. Strabo, the great Greek geographer, lived 71-14 B.C. Ptolemy flourished about 139 A.D. The science was brought to Europe by the Moors of Barbary and Spain, about 1240. *Lenglet.* Maps and charts were introduced into England by Bartholomew Columbus to illustrate his brother's theory respecting a western continent, 1489. Geography is now divided into mathematical, physical, and political, and its study has been greatly promoted during the present century by expeditions at the expense of various governments and societies. The *Royal Geographical Society* of London was established in 1830; that of Paris in 1821. The Geographical Society's exhibition opened by the marquis of Lorne, 9 Dec. 1885. The society issued a circular for promoting a more uniform spelling of geographical names, Dec. 1891. The society instituted courses of lectures, Nov. 1892. Proposal that ladies be admitted as fellows; approved by letter-votes, 30 June ; rejected by special meeting (172–158), 3 July, 1893. See *Africa, North-East and West Passage, &c.*

GEOLOGY, the science of the earth, is said to have been cultivated in China before the Christian era, and occupied the attention of Aristotle, Theophrastus, Pliny, Avicenna, and the Arabian writers.

In 1574 Mercati wrote concerning the fossils in the pope's museum: Cesalpino Majoli, and others (1597), Steno (1669), Scilla (1670), Quirini (1676), Plot and Lister (1678), Leibnitz (1680) recorded observations, and put forth theories on the various changes in the crust of the earth.

Hooke (1668), in his work on Earthquakes, said that fossils, "as monuments of nature, were more certain tokens of antiquity than coins or medals, and though difficult, it would not be impossible *to raise a chronology out of them.*"

Burnet's "Theory of the Earth" appeared in 1690, Whiston's in 1696; Hutton's "Theory of the Earth" in 1795.

Buffon's geological views (1749) were censured by the Sorbonne in 1751, and recanted in consequence. The principle he renounced was that the present condition of the earth is due to secondary causes, and that these same causes will produce further changes. His more eminent fellow-labourers and successors were Gesner (1758), Michell (1760), Raspe (1762-73), Pallas and Horace B. de Saussure (1793-1800).

Werner (1775) ascribed all rocks to an *aqueous* origin, and even denied the existence of volcanoes in primitive geological times, and had many followers, Kirwan, De Luc, &c.—James Hutton (1788) supported by Playfair (1801) warmly opposed Werner's views, and asserted that the principal changes in the earth's crust are due to the energy of *fire*. The rival parties were hence termed Neptunists and Vulcanists.

Mr. aft. sir A. Geikie and other eminent modern geologists, ascribed the origin of the landscape features of the earth chiefly to denudation by the action of water 1865 *et seq*, Sir A. Geikie's "Founders of Geology" [Jean Étienne Guettard, Desmaret, and others in the 18th century], published 1897.

William Smith, the father of British geology (who had walked over a large part of England) drew up a Tabular View of British Strata, in 1799, and published it and his Geological Map of England and Wales, 1812-15; died 28 Aug. 1839. The Rev. Adam Sedgwick, another father, died 27 Jan. 1873, aged 87. Sir Charles Lyell, died 22 Feb. 1875.

The rev. Wm. Buckland, D.D., born 1784. Reader in geology, Oxford, 1818; published "Reliquiæ Diluvanæ," the results of his examination of the fossil bones of large mammals, elephants, tigers, hyenas, &c., discovered in the Kirkdale cave, Pickering, Yorkshire, in 1821. "Geology and Mineralogy," in relation to natural Theology (Bridgewater Treatise), 1836. Dean of Westminster, 1846; died Aug. 1856.

In 1803 the Royal Institution possessed the best geological collection in London, collected by H. Davy, C. Hatchett, and others; the proposal of sir John St. Aubyn, sir Abraham Hume, and the right hon. C. F. Greville, to aid the government in establishing a school of mines there in 1804-7, was declined, 13 Nov. 1807.

In 1807 the *Geological Society of London* was established. By collecting a great mass of new facts, it greatly tended to check the disposition to theorise, and led to the introduction of views midway between those of Werner and Hutton.

The Geological Society of Dublin, 1832; of Edinburgh, 1834; of France, 1830; of Germany, 1848.

In 1835 Mr. (afterwards sir Henry) De la Beche suggested the establishment of the present *Museum of Geology*, which began at Craig's-court, and which was removed to its present position in Jermyn-street. To him are also due the valuable geological maps formed on the ordnance survey. The building was erected by Mr. Pennethorne, and formally opened by the prince consort, 14 May, 1851. Attached to the Museum are the Mining Records office, a lecture theatre, laboratories, &c. Sir H. De la Beche, the first director, died 13 April, 1855; succeeded by sir Roderick Murchison, who died 22 Oct. 1871; succeeded by professor (afterwards sir) A. C. Ramsay, March, 1872, died 9 Dec. 1891; by Archibald Geikie, 1881, knt., 1891.

A great many maps have been published, with memoirs. The survey of England on the scale of an inch to a mile, was completed in Jan. 1884. Some maps have been made on a scale of six inches to a mile. The surveys of Scotland and Ireland are in progress (1889).

New geological map of England and Wales, 4 miles to the inch, published by government, 1898.

A similar institution was established at Calcutta by the E. I. Company in 1840.

International geological congress originated at the Buffalo meeting of the American association for the advancement of science in 1876; met at Paris 1878; Bologna, 26 Sept. 1881; Berlin, 29 Sept. 1885; London, 17 Sept. 1888; Washington, 1891; Zurich, 29 Aug. 1894; St. Petersburg, 1897.

The English standard works on geology at the present time are those of Lyell, Murchison, Phillips, De la Beche, Mantell, Ansted, and Geikie.

Cuvier and Brongniart's work on Geology of Paris, 1808, *et seq.*

The strata composing the earth's crust may be divided into two great classes:

I. Those generally attributed to the agency of water;

II. To the action of fire: which may be subdivided as follows:—

Aqueous formations, stratified, rarely crystalline:—
Sedimentary or fossiliferous rocks.
Metamorphic or unfossiliferous.

Igneous formations, unstratified, crystalline:—
Volcanic, as basalt, &c.
Plutonic, as granite, &c.

Fossiliferous, or Sedimentary, rocks are divided into three great series:—

The Palæozoic (most ancient forms of life) or Primary.
The Mesozoic (middle life period), or Secondary.
The Neozoic or Cainozoic (more recent forms of life), or Tertiary.

GEOMETRY, so termed from its original application to measuring the earth, is ascribed to the Egyptians; the annual inundations of the Nile having given rise to it by carrying away the landmarks and boundaries.

GEORGE. A gold coin current at 6*s.* 8*d.* in the reign of Henry VIII. *Leake.*

GEORGE, ST., the tutelary saint of England, and adopted as patron of the order of the garter by Edward III. His day is 23 April; see *Garter*, and *Knighthood.*

St. George was a tribune in the reign of Diocletian, and being a man of great courage, was a favourite; but complaining to the emperor of his severities towards the Christians, and arguing in their defence, he was put in prison, and beheaded, 23 April, 290.—On that day, in 1192, Richard I. defeated Saladin.
St. George's, Hanover-square, returns one M.P., by act passed 1885. Population, 1881, 149,748; 1891, 134,122; see *Fires*, 18 Nov. 1896.
St. George's in the East returns 1 member by the act of 1885. Population, 1881, 47,157; 1891, 45,546; see *Trials*, April, 1896.
The *Order of the Sons of St. George*, established at Philadelphia as a society to succour emigrants (see under *Emigration*). It gradually acquired political influence, and many branches were formed in order to counteract the dominant aggressive policy of the Irish party. It works in unison with the "British American association" which was formed to promote naturalization—its organ being the *British American*, a weekly newspaper, Dec. 1887.

GEORGES' CONSPIRACY, in France. General Moreau, general Pichegru, Georges Cadoudal, who was commonly known by the name of Georges, and others, were arrested at Paris, charged with a conspiracy against the life of Bonaparte, and for the restoration of Louis XVIII., Feb. 1804. Pichegru was found strangled in prison, 6 April. Twelve of the conspirators, including Georges, were executed 25 June, and others imprisoned. Moreau was exiled, and went to America. In 1813 he was killed before Dresden (*which see*).

GEORGIA, the ancient Iberia, now a province of S. Russia, near the Caucasus, submitted to Alexander about 331 B.C., but threw off the yoke of his successors. It was subjugated to Rome by Pompey, 65 B.C., but retained its own sovereigns. Christianity was introduced into it in the 3rd century. In the 8th century, after a severe struggle, Georgia was subdued by the Arab caliphs; by the Turkish sultan Alp-Arslan, 1068; and by the Tartar hordes, 1235. From the 14th to the 18th centuries, Georgia was successively held by the Persian and Turkish monarchs. In 1740 Nadir Shah established part of Georgia as a principality, of which the last ruler Heraclius, surrendered his territories to the czar in 1799; and in 1802 Georgia was declared to be a Russian province.—Georgia, in North America, was settled by gen. Oglethorpe, in 1732. Separating from the congress of America, it surrendered to the British, Dec. 1778; and its possession was of vast importance to the royalists in the war. Count d'Estaing joined the American general Lincoln, and made a desperate attack on Georgia, which failed, and the French fleet returned home; the colony was given up to the Union by the British in 1783. It seceded from the Union, by ordinance, 18 Jan. 1861, and was conquered by Sherman in 1864-5, and readmitted as a state Jan. 1868. A ridiculous negro insurrection suppressed Aug. 1875. Population in 1880, 1,542,180; 1890, 1,837,353; Atlanta, 65,533; Savannah, 43,189. See *United States.*

GERBEROI (Normandy, N. France). Here William the Conqueror was wounded in battle by his son Robert, who had joined the French king Philip I., 1078.

GERM THEORY OF DISEASE supposes "that many diseases are due to the presence and propagation in the animal system of minute organisms [termed *microbes*] having no part or share in its normal economy." *Maclagan*, 1876. See *Animalcules* and *Bacteria*. Dr. Cohn, of Breslau, whose work was published in 1872, classifies bacteria as—I. Sphœro or micrococci; II. Micro-bacteria, or bacteria proper (rod-shaped); III. Desmo-bacteria, the same but longer; IV. Spiro-bacteria, spiral-shaped or curly. Translation of his work, 1881. See *Cholera*.

The doctrine of *contagium animatum* was held in the middle ages and put forth in the 16th century, but contagious organisms were not discovered till the 19th by professors Pasteur, Tyndall, Dr. Wm. Budd, and others, 1875 *et seq.* At the British Association, 14 Sept. 1870, professor Huxley expressed his concurrence with the "germ theory." See under *Dust* and *Vivisection*, 1882.
Dr. Robert Koch is said to have identified the microscopical germs of cattle disease, of consumption, of cholera, and other diseases, 1879 *et seq.*, discredited in England, May, June, 1885. See *Tuberculosis*.
Dr. E. Klein in Feb. 1885 reported his investigations on the relation of bacteria to cholera. At the Royal Institution on May 27, 1887, he demonstrated the propagation of scarlet fever by microbes in cow's milk.
Numerous specimens of these germs were exhibited at the Royal Institution in illustration of professor Tyndall's discourse on "Living contagia," 16 Jan. 1885.
By taking means to exclude these germs from wounds, &c., sir Joseph Lister introduced anti-septic surgery with great success, in which carbolic acid is largely used, 1864 *et seq.*; the protection of wounds from air is not now considered necessary.
"Louis Pasteur," by M. Radot, his son-in-law, gives an account of Pasteur's success in mitigating the virulence of some diseases by inoculation. A translation by lady Claud Hamilton was published in Feb. 1885. M. Pasteur's 70th birthday celebrated in Paris, &c. 27 Dec. 1892. He died, 28 Sept. 1895; see *Pasteur Institute*.
M. Engelmann demonstrated the action of microbes in the development of vegetable cells from carbonic acid and moisture in the atmosphere.
For Pasteur institute see *Hydrophobia*.
Professors Behring and Kisasato of Berlin announce their method of treating tetanus and diphtheria, Jan. 1891.

GERMAN LANGUAGE has two great branches: *hoch* and *platt Deutsch*, high and low German. The former became the literary language, principally through its use by Luther in his translation of the Bible and in other works, 1522-34. The latter is that spoken by the lower classes. There are many dialects: the satirical epic in low German, "Reineke Fuchs," appeared in 1498; see *Reynard*.

GERMANY (*Germania, Alemania*), anciently, as now, divided into independent states. The Germans long withstood the attempts of the Romans to subdue them; and although that people conquered some parts of the country, they were expelled before the close of the 3rd century. In the 5th century the Huns and other tribes prevailed over the greater portion of Germany. In the latter part of the 8th century, Charlemagne subdued the Saxons and other tribes, and was crowned emperor at Rome, 25 Dec. 800. A list of his successors is given in another page. At the extinction of his family, the empire became elective, 911, and was subsequently obtained by members of the house of Hapsburg (from 1437 till 1804). Germany was divided into circles, 1501-12. The confederation of the Rhine was formed 12 July, 1806; the Germanic confederation, 8 June, 1815; and the North German confederation, 18 Aug. 1866; the treaty ratified, 8 Sept. 1866. GLASGOW, BISHOPRIC OF. Kennet, in his *Antiquities*, says it was founded by St. Kentigern, *alias* Mungo, in 560; Dr. Heylin, speaking of the see of St. Asaph, in Wales, says that *that* see was founded by St. Kentigern, a Scot, then bishop of Glasgow, in 583. This prelacy became archiepiscopal in 1491, ceased at the Revolution, and is now a post-revolution bishopric. The cathedral, commenced in 1121, has a noble crypt; see *Bishops*.

GLASITES (in Scotland) and SANDEMANIANS (in England). In 1727, John Glas, a minister of the church of Scotland, published "The Testimony of the King of Martyrs, concerning his Kingdom (*John* xviii. 36)," in which he opposed national churches, and described the original constitution of the Christian church, its doctrines, ordinances, officers, and discipline, as given in the New Testament. Having been deposed in 1728, he and others established several churches formed upon the primitive models. The publication of a series of letters on Hervey's "Theron and Aspasio," by Robert Sandeman, in 1757, led to the establishment of churches in London and other places in England, and also in North America.

GLASS. The Egyptians are said to have known the art of making glass 1150 B.C. The discovery of glass took place in Syria. *Pliny*. Glass-houses were erected in Tyre. It was in use among the Romans in the time of Tiberius; and we know, from the ruins of Pompeii, that windows were formed of glass before 79.

GLASTONBURY (Somerset), traditionally said to have been the residence of Joseph of Arimathea, and the site of the first Christian church in Britain, about 60. A church was built here by Ina about 708. The town and abbey were burnt, 1184, and an earthquake did great damage in 1275. Richard Whiting, the last abbot, who had 100 monks and 400 domestics, was hanged on Tor-hill in his pontificals for refusing to take the oath of supremacy to Henry VIII., 14 Nov. 1539. The monastery was suppressed 1540. Visit of pan-anglican bishops, 3 Aug. 1897. See *Lake Dwellings*, 1892.

GLENALMOND, Perthshire. Trinity College here, projected in 1841, was opened in 1847. It was founded principally by the exertions of Mr. W. E. Gladstone and Mr. Hope Scott, aided by dean Ramsay, the duke of Buccleuch, the marquis of Lothian, and other gentlemen, to support the Scottish episcopal church. The site was given by Mr. George Patton, afterwards lord Glenalmond, 1846. The foundation-stone of a new wing was laid by Mr. W. E. Gladstone, 1 Oct. 1891.

GLENCOE MASSACRE of the Macdonalds, a Jacobite clan, for not surrendering before 1 Jan. 1692, the time stated in king William's proclamation. Sir John Dalrymple, master (afterwards earl) of Stair, their enemy, obtained a decree "to extirpate that set of thieves," which the king is said to have signed without perusing. Every man under 70 was to be slain. This mandate was treacherously executed by 120 soldiers of a Campbell regiment, hospitably received by the Highlanders, 13 Feb. 1692. About 60 men were slain; and many women and children, turned out naked in a freezing night, perished. This excited great indignation; and an inquiry was set on foot, May, 1695, but no capital punishment followed.

GLENDALOUGH, or "Seven Churches," an ancient Irish bishopric, said to have been founded by St. Keven in 498; united with Dublin, 1214.

GLOBE. The globular form of the earth, the five zones, some of the principal circles of the sphere, the opacity of the moon, and the true causes of lunar eclipses, were taught, and an eclipse predicted, by Thales of Miletus, about 640 B.C. Pythagoras demonstrated, from the varying altitudes of the stars by change of place, that the earth must be round; that there might be antipodes on the opposite part of the globe; that Venus was the morning and evening star; that the universe consisted of twelve spheres—the sphere of the earth, the sphere of the water, the sphere of the air, the sphere of fire, the spheres of the moon, the sun; Venus, Mercury, Mars, Jupiter, Saturn, and the spheres of the stars; about 506 B.C.—Aristarchus of Samos maintained that the earth turned on its own axis, and revolved about the sun, which doctrine was held by his contemporaries as so absurd, that the philosopher nearly lost his life, 280 B.C.; see *Circumnavigators*.

To determine the figure of the earth, a degree of latitude has been measured in different parts of the world; by Bouguer and La Condamine in Peru, and by Maupertuis and others in Lapland, 1735.

Estimated density 5·6 that of water; weight, 6,000,000,000,000,000,000,000 tons.—*Proctor*, 1875.

France and Spain measured by Mechain, Delambre, Biot, and Arago, between 1792 and 1821.

Measurements made in India by col. (afterwards sir George) Everest, published in 1830.

Experiments made by pendulums to demonstrate the rotation of the earth by Foucault in 1851; and to determine its density by Maskelyne, Bailly, and others; and in 1826, 1828, and 1854, by Mr. (aft. sir) G. B. Airy, the astronomer royal.

ARTIFICIAL GLOBES. It is said that a celestial globe was brought to Greece from Egypt, 368 B.C., and that Archimedes constructed a planetarium about 212 B.C.

The globe of Gottorp, a concave sphere, eleven feet in diameter, containing a table and seats for twelve persons, and the inside representing the visible surface of the heavens, the stars and constellations, all distinguished according to their respective magnitudes, and being turned by means of curious mechanism, their true position, rising and setting, are shown. The outside is a terrestrial globe. The machine, called the globe of Gottorp, from the original one of that name, which, at the expense of Frederick II. duke of Holstein, was erected at Gottorp, under the direction of Adam Olearius, and was planned after a design found among the papers of the celebrated Tycho Brahe. Frederick IV. of Denmark presented it to Peter the Great in 1713. It was nearly destroyed by fire in 1757; but it was afterwards reconstructed. *Coxe.*

The globe at Pembroke-hall, Cambridge, erected by Dr. Long (master, 1733), eighteen feet in diameter.

In 1851 Mr. Abrahams erected in Leicester-square, for Mr. Wyld, a globe 60 feet 4 inches in diameter, lit from the centre by day, and by gas at night. It was closed in July, 1861; the models were sold, and the building eventually taken down.

Mr. James Wyld, geographer to the queen, died 17 April, 1887.

GLOBE THEATRE, BANKSIDE (London), was built by agreement dated 22nd Nov. 1593, and licensed to Shakespeare and others; see *Theatres*, and *Shakespeare's Theatre*.—The Globe "Theatre," erected on the site of Lyon's-inn, Strand, was opened 28 Nov. 1868, Mr. Sefton Parry, manager.—The *Globe* evening newspaper; formerly whig, now conservative; established 1803.

GLOIRE, French steam frigate, see *Navy, French*.

GLORY, the nimbus drawn by painters round the heads of saints, angels, and holy men, and the circle of rays on images, adopted from the Cæsars and their flatterers, were used in the 1st century. The doxology, "*Gloria Patri*," is very ancient, and originally without the clause "as it was in the beginning," &c. In the Greek it began with "*doxa*," *glory*.

GLOUCESTER (Roman *Glevum*), submitted to the Romans about 45, and to the Saxons 577. The statutes of Gloucester, passed at a parliament held by Edward I. 1278, relate to actions at law. This city was incorporated by Henry III.; and was fortified by a strong wall, which was demolished after the Restoration, in 1660, by order of Charles II., as a punishment for the successful resistance of the city to Charles I., under col. Massey, Aug., Sept. 1643. The Gloucester and Berkeley canal was completed in April, 1827. Gross bribery took place here at the election for the parliament in 1859.—The BISHOPRIC was one of the six erected by Henry VIII. in 1541, and was formerly part of Worcester. It was united to Bristol in 1836, but in 1884 an act was passed to provide for their again becoming separate bishoprics. The bishopric of Bristol reconstituted 7 July, 1897. The church, which belonged to the abbey, and its revenues, were appropriated to the maintenance of the see. The abbey, which was founded by king Wulphere about 700, was burnt in 1102, and again in 1122. In it are the tombs of Robert, duke of Normandy, and Edward II. In the king's books, this bishopric is valued at 315*l.* 17*s.* 2*d.* per annum. Present income, 5000*l.* An act was passed in 1884 to provide for the disunion of the sees of Gloucester and Bristol. Restoration of the cathedral proceeding, 1893-7; the lady chapel reopened 29 Sept. 1897. Population, 1881, 36,542; 1891, 39,444.

Epidemic of smallpox Jan.–July, 1896 (443 deaths), stamped out by the vaccination committee, 27 April, *et seq.* 1896–97.

GLOVES. Woodstock and Worcester leather gloves are of ancient celebrity. In the middle ages, the giving a glove was a ceremony of investiture in bestowing lands and dignities; and two bishops were put in possession of their sees by each receiving a glove, 1002. In England, in the reign of Edward II. the deprivation of gloves was a ceremony of degradation. The Glovers' company of London was incorporated in 1556. Embroidered gloves are presented to judges at maiden assizes. The importation of foreign gloves was not permitted till 1825. "Gloves and their Annals," by S. W. Beck, published in 1883.

GLUCINUM (from *glukus*, sweet). In 1798 Vauquelin discovered the earth *glucina* (so termed from the sweet taste of its salts). It is found in the beryl and other crystals. From glucina Wöhler and Bussy obtained the rare metal glucinum in 1828. *Gmelin.*

GLUCOSE, see *Sugar*.

GLUTEN, an ingredient of grain, particularly wheat, termed the vegeto-animal principle (containing nitrogen). Its discovery is attributed to Beccaria in the 18th century.

GLYCERINE, discovered by Scheele, about 1779, and termed by him the "sweet principle of fats," and further studied by Chevreul, termed the

"father of the fatty acids." It is obtained pure by saponifying olive oil or animal fat with oxide of lead, or litharge. Glycerine is now much employed in medicine and the arts; mixed with vaccine, March, 1898.

GLYOXYLINE (invented by Mr. (aft. sir) F. A. Abel, the chemist of the war department, in 1867), an explosive mixture of gun-cotton, pulp and saltpetre saturated with nitro-glycerine. It was abandoned for compressed gun-cotton.

GNOMIUM, a new element recently discovered by Gerhard, Kruss, and F. W. Schmidt (1889).

This house was purchased by Louis XIV. about 1662, for a manufactory of works for adorning palaces (under the direction of Colbert), especially tapestry, designs for which were drawn by Le Brun, about 1666. "GOD SAVE THE KING." This melody is said to have been composed by John Bull, Mus.D., in 1606, for a dinner given to James I. at Merchant Taylors' Hall; others ascribe it to Henry Carey, author of "Sally in our alley," who died, 4 Oct. 1743. It was much sung 1745-6. It has been claimed by the French. The controversy on the subject is summed up in Chappell's "Popular Music of the Olden Times" (1859). GOLDEN FLEECE (see *Argonauts*). Philip the Good, duke of Burgundy, in 1429, at his marriage, instituted the military order of "*Toison d'or*" or "golden fleece;" it was said on account of the profit he made by wool. The number of knights was thirty-one. The king of Spain, as duke of Burgundy, afterwards became grand master of the order. The knights wore a scarlet cloak lined with ermine, with a collar opened, and the duke's cipher, in the form of a B, to signify Burgundy, together with flints striking fire, with the motto "*Ante ferit, quam flamma micat.*" At the end of the collar hung a golden fleece, with this device, "*Pretium non vile laborum.*" The order afterwards became common to all the princes of the house of Austria, as descendants of Mary, daughter of Charles the Bold, last duke of Burgundy, who married Maximilian of Austria in 1477, and now belongs to both Austria and Spain, in conformity with a treaty made 30 April, 1725. The prince of Wales, the duke of York and other royal princes are knights (1895). For the legend of the Golden Fleece, see *Argonauts*.

It was taken by the English admiral Holmes in 1663; seized by the French, 1677; and ceded to them by the treaty of Nimeguen in 1678; taken by the British in 1758, 1779, 1800, and 1804; ceded to France, 1814. Governor Wall was hanged in London, 28 Jan. 1802, for the murder of sergeant Armstrong, committed while governor at Goree in 1782.

GORGET, the ancient breast-plate, was very large, varying in size and weight. The present diminutive breast-plate came into use about 1660, see *Armour*.

GORHAM CASE, see *Trials*, 1849-50.

GORILLA, a powerful ape of W. Africa, about five feet seven inches high. It is a match for the lion, and attacks the elephant with a club. It is considered to be identical with the hairy people called *Gorullai* by the navigator Hanno, in his *Periplus*, about 400 B.C. In 1847 a sketch of a gorilla's cranium was sent to professor Owen by Dr. Savage, then at the Gaboon river, and preserved specimens have been brought to Europe, and a living one died on its voyage to France. In 1851 professor Owen described specimens to the Zoological Society; in 1859 he gave a summary of our knowledge of this creature at the Royal Institution,

London; and in 1861 several skins and skulls were there exhibited by M. Du Chaillu, who stated that he killed 21 of them in his travels in Central Africa. The gorilla was not known to Cuvier.

A young gorilla landed at Liverpool, 21 June, 1876; went to Berlin; was exhibited at Westminster aquarium, 23 July; died at Berlin, 13 Nov. 1877; another brought to the Crystal palace, England, soon died, Aug. 1879.
An African gorilla landed at Liverpool, Sept. 1881.
Another Sept. 1885.
One placed in the zoological gardens, London, Oct.; died 9 Dec. 1887.
A large one brought from the French Congo to the gardens, 6 March, 1896.
Johanna, the "educated" gorilla, performs at Olympia, 27 Dec. 1897.

GOSPELLERS, a name given to the followers of Wickliffe, who attacked the errors of popery, about 1377. Wickliffe opposed the authority of the pope, the temporal jurisdiction of bishops, &c., and is called the father of the Reformation.

GOSPELS (Saxon *god-spell*, good story). Matthew's and Mark's are conjectured to have been written between A.D. 38 and 65; Luke's 55 or 65; John's, about 97. Irenæus in the 2nd century refers to each of the gospels by name. Dr. Robert Bray was one of the authors of the Society for the Propagation of the Gospel in Foreign Countries, incorporated in 1701. A body termed "Bray's Associates," still exists; its object being to assist in forming and supporting clerical parochial libraries.

GOSPORT (Hampshire), contains the Royal Clarence victualling yard. The great Haslar hospital, near Gosport, was built in 1762.

GOTHARD, see *Gotthard* and *Alps*.

GOTHENBURG SYSTEM (in Sweden and Norway, about 1871). By this alcoholic drinks are dispensed by persons deriving no profit from the sale. It was advocated in England by Mr. Chamberlain, M.P., and much discussed, 1876–7. The bishop of Chester introduced a bill for establishing the system, read first time, 2 March, 1893; rejected by the lords, 6 June, 1893. The system advocated at a meeting at the Duke of Westminster's, 6 July, 1894. Much controversy ensued, 1894-95. See the bishop's letter, in *Times*, 15 Jan. 1895.

GOTHIC ARCHITECTURE began about the 9th century after Christ, and spread over Europe. Its great feature is the pointed arch; hence it has been suggested to call it the *pointed style*. "Gothic" was originally a term of reproach given to this style by the renaissance architects of the 16th century. Its invention has been claimed for several nations, particularly for the Saracens. The following list is from Godwin's Chronological Table of English Architecture:—

Anglo-Roman—B.C. 55 to about A.D. 250—St. Martin's church, Canterbury.
Anglo-Saxon—A.D. 800 to 1066—Earl's Barton church; St. Peter's, Lincolnshire.
Gothic Anglo-Roman—A.D. 1066 to 1135—Rochester cathedral nave; St. Bartholomew's, Smithfield; St. Cross, Hants, &c.
Early English, or Pointed—A.D. 1135 to 1272—Temple church, London; parts of Winchester, Wells, Salisbury, and Durham cathedrals, and Westminster Abbey.
Pointed, called Pure Gothic—A.D. 1272 to 1377—Exeter cathedral, Waltham Cross, &c., St. Stephen's, Westminster.
Florid Pointed—A.D. 1377 to 1509—Westminster Hall; King's College, Cambridge; St. George's Chapel, Windsor; Henry VII.'s Chapel, Westminster.
Elizabethan—A.D. 1509 to 1625—Northumberland House, Strand, pulled down 1874; part of Windsor Castle; Hatfield House, Schools at Oxford.
Revival of Grecian architecture about 1625. Banqueting House, Whitehall, &c.
The revival of Gothic architecture commenced about 1825, mainly through the exertions of A. W. Pugin. The controversy as to its expediency was rife in 1860-1.

GOTHLAND, an isle in the Baltic sea, was conquered by the Teutonic knights, 1397-8; given up to the Danes, 1524; to Sweden, 1645; conquered by the Danes, 1677, and restored to Sweden, 1679. Mariestad almost entirely destroyed by fire, 5 Dec. 1895.

GOTHS, a warlike nation that inhabited the country between the Caspian, Pontus, Euxine, and Baltic seas. They entered Mœsia, took Philippopolis, massacring thousands of its inhabitants; defeated and killed the emperor Decius, 251; but were defeated at Naissus by Claudius, hence surnamed Gothicus, 320,000 being slain, 269. Aurelian ceded Dacia to them in 272; but they long troubled the empire. After the destruction of the Roman western empire by the Heruli, the *Ostrogoths*, under Theoderic, became masters of the greater part of Italy, where they retained their dominion till 553, when they were finally conquered by Narses, Justinian's general. The *Visigoths* settled in Spain, and founded a kingdom, which continued until the country was subdued by the Saracens.

GOTTHARD, ST., near the river Raab, Hungary. Here the Turks, under the grand vizier Kupriuli, were totally defeated by the Imperialists and their allies, commanded by Montecuculi, 1 Aug. 1664. Peace followed this great victory. See *Alps*.

GÖTTINGEN (Hanover), a member of the Hanseatic league about 1360. The university "Georgia Augusta," founded by George II. of England in 1734, was opened 1737. It was seized by the French, 1760, and held till 1762. In 1837 several of the most able professors were dismissed for their political opinions. Population, 1890, 23,693.

"GOVERNOUR, The," a moral and educational work, full of anecdotes, by sir Thomas Elyot, first published in 1531; an annotated edition with a glossary by Mr. H. H. S. Croft was published in 1880.

GOWRIE CONSPIRACY. John Ruthven, earl of Gowrie, in 1600, reckoning on the support of the burghs and the kirk, conspired to dethrone James VI. of Scotland, and seize the government. For this purpose the king was decoyed into Gowrie's house in Perth, on 5 Aug. 1600. The plot was frustrated, and the earl and his brother, Alexander, were slain on the spot. At the time, many persons believed that the young men were rather the victims than the authors of a plot. Their father, William,

was treacherously executed in 1584 for his share in the raid of Ruthven, in 1582; and he and his father, Patrick, were among the assassins of Rizzio, 9 March, 1566.

GRAAL, Holy (Sangreal). The publication of Tennyson's poem "Holy Grail," Dec. 1869, led to much discussion. Tennyson treats it as the cup in which Christ drank at the Last Supper. The mediæval romances treat it as the dish which held the paschal-lamb. The word is probably old French, *gréal*, from the old Latin *gradalis*, a dish.

GRACE, a title assumed by Henry IV. of England, on his accession, in 1399. *Excellent Grace* was assumed by Henry VI. about 1425. Till the time of James I. 1603, the king was addressed by that title, but afterwards by the title of *Majesty* only. "Your Grace" is the manner of addressing an archbishop and a duke in this realm.—The term "*Grace of God*" is said to have been taken by bishops at Ephesus, 431 (probably from 1 *Cor.* xv. 10), by the Carlovingian princes in the 9th century, by popes in the 13th century; and about 1440 it was assumed by kings as signifying their divine right. "*Dei gratia*" was put on his great seal by William II. of England, and on his gold coin by Edward III. The king of Prussia's saying, that he would reign "by the grace of God," gave much offence, 18 Oct. 1861.

GRACE AT MEAT. The ancient Greeks would not partake of any meat until they had first offered part of it, as the first fruits, to their gods. The short prayer said before, and by some persons after meat, in Christian countries, is in conformity with Christ's example, *John* vi. 11, &c.

GRÆCIA MAGNA, colonies planted by the Greeks, 974-748 B.C.; see *Italy*.

GRAFFITI, a term given to the scribblings found on the walls of Pompeii and other Roman ruins; selections were published by Wordsworth in 1837, and by Garrucci in 1856.

Lords Hertford, duke of Ancaster, Thomas Townshend, &c.
Lord Camden, *lord chancellor*, succeeded by Charles Yorke (created lord Morden), died (it is said by his own hand) 20 Jan. 1770.

GRAHAM'S DIKE (Scotland), a wall built in 209 by Severus Septimus, the Roman emperor, or, as others say, by Antoninus Pius. It reached from the Firth of Forth to the Clyde. Buchanan relates that there were considerable remains of this wall in his time, and vestiges of it are still to be seen.

GRAIN. Henry III. is said to have ordered a grain of wheat gathered from the middle of the ear to be the original standard of weight: 12 grains to be a pennyweight; 12 pennyweights one ounce, and 12 ounces a pound Troy. *Lawson*.
An act for the safe carriage of grain (43 & 44 Vict. c. 43), passed 7 Sept. 1880.

GRAMMARIANS. A society of grammarians was formed at Rome so early as 276 B.C. *Blair*. Apollodorus of Athens, Varro, Cicero, Messala, Julius Cæsar, Nicias, Ælius Donatus, Remmius, Palemon, Tyrannion of Pontus, Athenæus, and other distinguished men, were of this class. A Greek grammar was printed at Milan in 1476; Lily's Latin grammar (Brevis Institutio), 1513; Lindley Murray's English Grammar, 1795; Cobbett's English Grammar, 1818.—Harris's Hermes was published in 1750, Horne Tooke's "Epea Pteroenta," or the "Diversions of Purley," in 1786, treatises on the philosophy of language and grammar. Cobbett declared Mr. Canning to have been the only purely grammatical orator of his time; and Dr. Parr, speaking of a speech of Mr. Pitt's, said, "We threw our whole grammatical mind upon it, and could not discover one error." The science of grammar has been recently much studied with excellent results.

GRANADA, a city, S. Spain, was founded by the Moors in the 8th century, and formed at first part of the kingdom of Cordova. In 1236, Mohammed-al-Hamar made it the capital of his new kingdom of Granada, which was highly prosperous till its subjugation by the "great captain," Gonsalvo de Cordova, 2 Jan. 1492. In 1609 and 1610 the industrious Moors were expelled from Spain, by the bigoted Philip III., to the lasting injury of his country. Granada was taken by marshal Soult in 1810, and held till 1812. See *New Granada*. Population, 1887: province, 484,638; city, 73,006.

In the *province* of Granada, five towns were destroyed, 914 persons killed, with an immense loss of property, through the earthquakes of 25 Dec. *et seq.* 1884.

GRANARIES were formed by Joseph in Egypt, 1715 B.C. (*Genesis* xli. 48.) There were three hundred and twenty-seven granaries in Rome. *Univ. Hist.* Twelve new granaries were built at Bridewell to hold 6000 quarters of corn, and two store houses for sea-coal to hold 4000 loads, thereby to prevent the sudden dearness of these articles by great increase of inhabitants, 7 James I. 1610. *Stow*.

GRANICUS (a river N.W. Asia Minor), near which, on 22 May, 334 B.C., Alexander the Great signally defeated the Persians. The Macedonian troops (30,000 foot and 5000 horse) crossed the Granicus in the face of the Persian army (600,000 foot and 20,000 horse). *Justin*. The victors lost fifty-five foot soldiers and sixty horse. Sardis capitulated, Miletus and Halicarnassus were taken by storm, and other great towns submitted to the conqueror.

GRAPES. Previously to the reign of Edward VI. grapes were brought to England in large quantities from Flanders, where they were first cultivated about 1276. The vine was introduced into England in 1552; being first planted at Bloxhall, in Suffolk. In the gardens of Hampton-court palace is a vine, stated to surpass any in Europe; it is 72 feet by 20, and has in one season produced 2272 bunches of grapes, weighing 18 cwt.; the stem is 13 inches in girth; it was planted in 1769. *Leigh*.

In 1809 sir Humphry Davy investigated into the relations of three forms of carbon, the diamond, graphite, and charcoal. A rude kind of black lead pencil is mentioned by Gesner in 1565. Interesting results of sir B. C. Brodie's researches on graphite appeared in the International Exhibition of 1862. Fresh discoveries were made in the nearly exhausted Borrowdale mines, Cumberland, in 1875.

GRATTAN'S PARLIAMENT, a name popularly given to the Irish parliament, after it had been declared independent, mainly by the exertions of Henry Grattan, by an act passed in England, May, 1782. It came to an end by the passing of the Act of Union, 2 July, 1800. In 1806, Grattan said of his parliament "I have a parental recollection. I sat by her cradle; I followed her hearse." Grattan strongly urged the passing of an act for Catholic emancipation till his death 4 June, 1820.

GRAVELINES (N. France). Here the Spaniards, aided by an English fleet, defeated the French on 13 July, 1558.

GRAVITATION, as a supposed innate power, was noticed by the Greeks, and also by Seneca, who speaks of the moon attracting the waters, about 38. Kepler investigated the subject about 1615, and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galileo at Florence, about 1633; but the great law on this subject, laid down by Newton in his "Principia," in 1687, is said to have been proved by him in 1670. The fall of an apple from a tree in 1666 is said to have directed his attention to the subject.

Newton says, "I do not anywhere take on me to define the kind or manner of any action, the causes or physical reasons thereof, or attribute forces in a true and physical sense to certain centres, when I speak of them as attracting, or endued with attractive powers."

On 15 July, 1867, M. Chasles laid before the Paris Academy of Sciences some letters alleged to be from Newton to Pascal and others tending to show that to Pascal was due the theory of gravitation. The authenticity of these letters was authoritatively denied, and their forgery and his own delusion were acknowledged by M. Chasles before the academy 13 Sept. 1869.

GREECE, anciently termed Hellas. The name of Græcia first occurs in the writings of Aristotle (B.C. 384-322). Greece was so called from an ancient king, Græcus, and Hellas from another king, Hellen, the son of Deucalion. From Hellen's sons, Dorus and Æolus, came the Dorians and Æolians; another son Xuthus was father of Achæus and Ion, the progenitors of the Achæans and Ionians. Homer calls the inhabitants indifferently Myrmidons, Hellenes, and Achaians. They were also termed Danai, from Danaus, king of Argos, 1474 B.C. Greece anciently consisted of the peninsula of the Peloponnesus, Greece outside of the Peloponnesus, Thessaly, and the islands. The principal states of Greece were Athens, Sparta, Corinth, Thebes, Arcadia, and afterwards Macedon (*all which see*). The limits of Modern Greece are much more confined. Greece became subject to the Turkish empire in the 15th century. The population of the kingdom, established in 1829, 96,810; in 1861, 1,096,810, with the Ionian isles (added in 1864), about 1,348,522 in 1870, 1,457,894; in 1879, 1,979,147; in 1889, 2,187,208; 1896 2,430,807. The early history is mythic, and the dates *purely conjectural*.

GREEK EMPIRE, see *Eastern Empire.*

GREEK FIRE, a combustible composition (now unknown, but thought to have been principally naphtha), thrown from engines, said to have been invented by Callinicus, an engineer of Heliopolis, in Syria, in the 7th century, to destroy the Saracens' ships, which was effected by the general of the fleet of Constantine Pogonatus, and 30,000 men were killed. A so-called "Greek fire," probably a solution of phosphorus in bi-sulphide of carbon, was employed at the siege of Charleston, U.S., in Sept. 1863.

GREEK LANGUAGE. The study was revived in western Europe about 1450; in France, 1473; William Grocyn, or Grokeyn, an English professor of this language, introduced it at Oxford, about 1491, where he taught Erasmus, who himself

taught it at Cambridge in 1510. *Wood's Athen. Oxon.* England has produced many eminent Greek scholars, of whom may be mentioned Richard Bentley, died 1742; professor Richard Porson, died 1808; Dr. Samuel Parr, died 1825; and Dr. Charles Burney, died 1817. "Society for promoting Hellenic Studies," formed 16 June, 1879. Modern Greek literature is now cultivated. See *Aristotelian* and *Egyptian Exploration*.

GREENBACKS, a name given, from the predominating colour of the ink, to notes, for a dollar and upwards, first issued by the United States government, in 1862. Notes for lower sums (even 3 cents) were termed "fractional currency." For *Greenbackers* see *United States*, 1878.

GREEN-BAG INQUIRY took its name from a *Green Bag*, full of documents of alleged seditions, laid before parliament by lord Sidmouth, 3 Feb. 1817. Secret committees presented their reports, 19 Feb.; and bills were brought in on the 21st to suspend the Habeas Corpus act, and prohibit seditious meetings then frequent.

GREENLAND, an extensive Danish colony in North America, discovered by Icelanders, under Eric Raude, about 980, and named from its verdure. It was visited by Frobisher in 1576, and by John Davis, 1585. The first ship from England to Greenland was sent for the whale-fishery by the Muscovy company, 2 James I. 1604. In a voyage performed in 1630, eight men were left behind by accident, who suffered incredible hardships till the following year, when the company's ships brought them home. *Tindal.* The Greenland Fishing company was incorporated in 1693.—Hans Egede, a Danish missionary, founded a new colony, called *Godhaab*, or Good Hope, in 1720-3; and other missionary stations have been since established. Scoresby surveyed Greenland in 1821; and captain Graah, by order of the king of Denmark, in 1829-30. Population in 1878, about 9408; in 1888, 10,221. Nordenskjöld and others advanced into the interior, and found nothing but mountainous ice and snow, July-Sept. 1883.

Dr. Fridtjof Nansen, Mr. Sverdrup, and two other Norwegians and two Lapps wearing snow shoes crossed Greenland from E. to W., amid great hardships, 17 July *et seq.* 1888, and arrived at Copenhagen, 21 May, 1889. Important results to be published.

Dr. Nansen described his journey across Greenland at a meeting of the Royal Geographical society, 24 June, 1889.

His first crossing of Greenland was published in Dec. 1890.

Lieut. Peary reports at Philadelphia the results of his exploration of N. Greenland, 1 Nov. 1892; his book published, Nov. 1893; other explorations and discoveries in 1893, 1895, and 1896.

GREENOCK (W. Scotland). Charters were granted, in 1635 to John Shaw, and 1670 to his son sir John, of the barony of Greenock. It was a fishing station till 1697, when the Scottish Indian and African company resolved to erect salt-works in the Firth, and thus drew the attention of sir John Shaw, its superior, to its maritime advantages. It was made a burgh of barony in 1757, and a parliamentary burgh in 1832. The erection of the new quay was entrusted, about 1773, to James Watt, who was born here in 1736. The East India harbour was built 1805-19, and Victoria harbour 1846-50. James Watt docks opened by provost Shankland, 5 Aug. 1886. End of strike of iron shipbuilders (8 weeks), 24 Aug. 1891. GREEN PARK (near Buckingham palace, London) forms a part of the ground enclosed by Henry VIII. in 1530, and is united to St. James's and Hyde-parks by the road named Constitution-hill. Over the arch at the entrance, the Wellington statue was placed in 1846. On the north side was a reservoir of the Chelsea water-works, filled up in 1856.

GREENWICH (Kent), anciently Grenawic, an ancient manor, near which the Danes murdered the archbishop Elphege, 1012. The *Hospital* stands on the site of a royal residence erected in the reign of Edward I. and much enlarged by his successors. Here were born Henry VIII., his daughters Mary and Elizabeth, and here his son Edward VI. died. Charles II. intended to build a new palace here, but erected one wing only. Greenwich returns one M.P. by act of 1885. Population, 1881, 131,233; 1891, 134,184.

SECOND GRENVILLE ADMINISTRATION, formed after the death of Mr. Pitt, on 23 Jan. 1806. From the ability of many of its members, their friends said it contained "*all the talents, wisdom, and ability of the country*," a term applied to it derisively by its opponents. The death of Mr. Fox, 13 Sept. 1806, led to changes, and eventually the cabinet resigned, 25 March, 1807:—

GRESHAM COLLEGE (London), established by sir Thomas Gresham in 1575, founder of the Royal Exchange. He left a portion of his property in trust to the city and the Mercers' company to endow this college for lectures in divinity, astronomy, music, geometry, civil law, physic, and rhetoric; he died 21 Nov. 1579. The lectures commenced in Gresham's house, near Broad-street, June, 1597 (where the founders of the Royal Society first met in 1645). The buildings were pulled down in 1768, and the Excise office erected on its site, the property having been acquired by the crown for an annuity of 500*l.* The lectures were then read in a room over the Royal Exchange for many years. On the rebuilding of the exchange, the Gresham committee erected the present building in Basinghall-street, which was designed by G. Smith, and opened for lectures, 2 Nov. 1843. It cost above 7000*l.* In 1871 the college acquired a valuable collection of books and pictures, bequeathed by Mrs.

Hollier. Changes respecting the lectures were advocated in 1875, and some made in 1876.

GRETNA GREEN (Dumfries, S. Scotland, near the border). Here runaway marriages were contracted for many years, as Scotch law ruled that an acknowledgment before witnesses made a legal marriage. John Paisley, a tobacconist, and termed a blacksmith, who officiated from 1760, died in 1814. His first residence was at Megg's Hill, on the common or green betwixt Gretna and Springfield, to the last of which villages he removed in 1782. A man named Elliot was afterwards the principal officiating person. The General Assembly, in 1826, in vain attempted to suppress this system; but an act of parliament, passed in 1856, made these marriages illegal after that year, unless one of the persons married had lived in Scotland 21 days.

GRIQUALAND WEST and EAST, two districts in British South Africa, containing diamond fields. The first diamond was discovered in West Griqualand in March, 1867, and caused a great influx of immigrants from all nations, and the formation of many settlements. Diamonds to the value of 12,000,000*l.* were found there between 1871 and 1880, and about 15,000,000*l.* between 1883 and 1887. The district was annexed to Cape Colony 27 Oct. 1871, and incorporated with it in 1880. Kimberley, the capital, was founded in 1871; population in 1890, about 6,000 Europeans and 10,000 natives. GRIQUALAND EAST, between the Kaffir border and Southern Natal, was annexed to Cape Colony in 1875; population in 1888, 98,000.

By a tremendous explosion of stored dynamite near Kimberley, only two men were killed . Jan. 1884

GROCERS anciently meant "ingrossers or monopolisers," as appears by a statute 37 Edw. III. 1363: "Les marchauntz nomez engrossent totes maners de merchandises vendables." The Grocers' company, one of the twelve chief companies of London, was established in 1345, and incorporated in 1429.

GUADALOUPE, a West India Island, discovered by Columbus in 1493. The French took possession of it in 1635, and colonised it in 1664. Taken by the English in 1759, and restored in 1763. Again taken by the English in 1779, 1794, and 1810. The allies, in order to allure the Swedes into the coalition against France, gave them this island. It was, however, by the consent of Sweden, restored to France at the peace in 1814. It was again taken by the British, 10 Aug. 1815, and restored to the French, July 1816.

GUANO or HUANO (the Peruvian term for manure), the excrement of sea-birds that swarm on the coasts of Peru and Bolivia, and of Africa and Australia. It is mentioned by Herrera in 1601, and Garcilasso stated that the birds were protected by the incas. Humboldt was one of the first by whom it was brought to Europe, in order to ascertain its value in agriculture. The importation of guano into the United Kingdom appears to have commenced in 1839. 283,000 tons were imported in 1845 (of which 207,679 tons came from the western coast of Africa); 243,016 tons in 1851 (of which 6522 tons came from Western Australia); 131,358 tons in 1864; 237,393 tons in 1865; 135,697 tons in 1866; 280,311 in 1870; 114,454 in 1875; 152,989 in 1877; 177,793 in 1878; 74,221 in 1883; 21,175 in 1887; 1888, 24,432; 1889, 28,604; 1890, 27,095; 1893, 18,311; 1896, 20,214.

GUELPHS AND GHIBELINES, names given to the papal and imperial factions who destroyed the peace of Italy from the 12th to the end of the 15th century (the invasion of Charles VIII. of France in 1495). The origin of the names is ascribed to the contest for the imperial crown between Conrad of Hohenstaufen, duke of Swabia, lord of Wiblingen (hence *Ghibelin*), and Henry nephew of Welf, or Guelf, duke of Bavaria, in 1138. The former was successful; but the popes and several Italian cities took the side of his rival. *Hie Guelf* and *Hie Gibelin* are said to have been used as war-cries in 1140, at a battle before Weinsberg, in Würtemberg, when Guelf of Bavaria was defeated by the emperor Conrad IV. who came to help the

rival duke Leopold.* The Ghibelines were almost totally expelled from Italy in 1267, when Conradin, the last of the Hohenstaufens, was beheaded by Charles of Anjou. Guelph (of uncertain origin), is the popular name of the present royal family of England; see *Brunswick*.

The GUELPH EXHIBITION of pictures and objects of interest connected with the Royal House of Guelph, was opened in the New Gallery, Regent street, 31 Dec. 1890; closed, 9 April, 1891. The queen contributed greatly to the exhibition, and gave it its name.

GUIDE-BOOKS for travellers are an English invention. Paterson's "British Itinerary," appeared in 1776; the last edition in 1840; when it was superseded by railway guides. Galignani's "Picture of Paris," 1814. Murray's "Handbook for Travellers on the Continent," the parent of the series, appeared in 1836. The publication of Carl and Fritz Bædeker's foreign guide-books began in 1828 with a handbook for the Rhine in German-French. This was followed by German handbooks for other parts of the continent, which owed much to Murray's handbooks, and included much original matter. The first English editions appeared in 1860. New editions of the illustrated guide-books, price 1*s.* each, published by Messrs. Ward, Lock, and Co., were issued in 1894-8. See *Murray*.

GUIDES, a corps in the French army, especially charged with the protection of the person of the general, was formed by Bessières, under the direction of Bonaparte, who had been nearly carried off by the enemy, 30 May, 1796. Several squadrons of "guides" were formed in 1848, to guard the ministers. They formed a portion of the imperial guard till Sept. 1870.

GUIENNE, a French province, was part of the dominions of Henry II. in right of his wife Eleanor, 1152. Philip of France seized it in 1293, which led to war. It was alternately held by England and France till 1453, when John Talbot, earl of Shrewsbury, in vain attempted to retake it from the latter.

GUILDHALL (London) was built in 1411. When it was rebuilt (in 1669), after the great fire of 1666, no part of the ancient building remained, except the interior of the porch and the walls of the hall. The front was erected in 1789; and a new roof built, 1864-5. Beneath the west window are the colossal figures of Gog and Magog, said to represent a Saxon and an ancient Briton; replaced older ones, 1708; renewed, 1837. The hall can contain 7000 persons. Here were entertained the allied sovereigns in 1814, and Napoleon III., 19 April, 1855; and here the city industrial exhibition was held, 6 March, 1866, and the International Botanical banquet, 22 May, 1866. A memorial window, the gift of the cotton workers of Lancashire, to commemorate the munificence of the metropolis towards them in the famine of 1862-4, was uncovered, 15 July, 1868. The prince consort memorial window was unveiled in the presence of prince Arthur, 3 Nov. 1870. A library existed in the Guildhall in 1426, from which books were taken by the protector Somerset in the reign of Edward VI. A new library was founded, 2 June, 1824. This library is open to the public. The new handsome building by Horace Jones was opened by the lord chancellor Selborne, 5 Nov. 1872; see *London*. GUILLOTINE, an instrument for causing immediate and painless death, named after its supposed inventor, a physician named Joseph Ignatius Guillotin. In 1866 M. Dubois, of Amiens, stated that the idea only was due to Guillotin, who at a meeting of the legislative assembly in 1789 expressed an opinion that capital punishment should be the same for all classes. Accordingly, at the request of the assembly, M. Louis, secretary of the "Académie de Chirurgie," submitted to it on 20 March, 1792, a mode of capital punishment, "sure, quick, and uniform," which he had invented. The first person executed by it was a highway robber named Pelletier, on 25 April; and Dangremont was its first political victim, 21 Aug. following. Guillotin died in 1814. The guillotine at Paris was burnt by the communist insurgents, 7 April, 1871. A similar instrument (called the *Mannaia*) is said to have been used in Italy, at Halifax in England (see *Halifax*), and in Scotland, there called the Maiden and the Widow. See *Gagging*.

GULLIVER'S TRAVELS, by Dean Swift, first published 1726-7.

GUN, see *Artillery*, *Cannon*, *Fire-arms*.—GUN-CLUB, for pigeon-shooting, founded by sir Gilbert East, in 1862, had 200 members, noblemen and gentlemen, in July, 1867.

GUN-COTTON, a highly explosive substance, invented by professor Schönbein, of Basel, and made known in 1846. It is purified cotton, steeped in a mixture of equal parts of nitric acid and sulphuric acid, and afterwards dried, retaining the appearance of cotton wool. See *Collodion*. Its nature was known to Braconnot and Pelouze.

The diet of Frankfort voted, 3 Oct. 1846, a recompense of 100,000 florins to professor Schönbein and Dr. Bœttger, as the inventors of the cotton powder, provided the authorities of Mayence, after seeing it tried, pronounced it superior to gunpowder as an explosive.
Improvements were made in the manufacture of gun-cotton by an Austrian officer, Baron von Lenk, about 1852, and it was tried by a part of the Austrian army in 1855, but did not obtain favour.
In 1862 details of the manufacture were communicated by the Austrian government to our own government, and Mr. (late sir Frederick) Abel, our war-office chemist, was directed to experiment on the constitution and desirability of gun-cotton. The British Association also appointed a scientific committee to consider its merits. A complete decision was not arrived at.
The first trial of English-made gun-cotton was made in the spring of 1864, at the manufactory at Stowmarket, Suffolk, by Messrs. Prentice.
There was manufactured, by a company, the "patent safety gun-cotton," according to Mr. Abel's patent (including the pulping, compressing, and wet processes), based on researches commenced in 1866. The cotton was said to be explosive by detonation, and not by ignition. A great explosion took place at Stowmarket; 24 persons were killed (including A. E. H. and W. R. Prentice, managers); about 60 were dreadfully wounded, and nearly the whole town was destroyed as if by a bombardment, 11 Aug. 1871.
The verdict at the inquest attributed the explosion to the culpable "addition of sulphuric acid to the gun-cotton subsequent to its passing the tests required by government," 6 Sept. 1871.
A government commission, appointed in Sept. to consider the manufacture and use of gun-cotton, reported in favour of both, with special regard to compressed gun-cotton, 13 Dec. 1871.
Another report recommended this gun-cotton to be stored wet, with drying apparatus near; and to be kept in slighter boxes, 25 July, 1872.
Mr. E. O. Brown, of the war department, Woolwich, discovers that wet gun-cotton can be exploded by concussion by a detonating fuse, about Nov. 1872.
It is used as an explosive agent in mining, &c.
GUN-CLOTH, made on a similar principle, was patented by Mr. W. A. Dixon, about 1866.
COTTON-GUNPOWDER, patented by Mr. R. Punshon, 1871.
A modified form was tried and reported successful, near Faversham, 3 Feb. 1875. See *Ivory*.

GUN LICENCE ACT, passed 9 Aug. 1870; annual licence, 10*s.* Licences issued: year 1876-7, 77,068; 1877-8, 75,571; 1880-1, 72,834; 1881-2, 74,063. See under *Game Laws*, 1883.

GUNPOWDER. The invention of gunpowder is generally ascribed to Bertholdus or Michael Schwartz, a Cordelier monk of Goslar, south of Brunswick, in Germany, about 1320. But many writers maintain that it was known much earlier in various parts of the world. Some say that the Chinese and Hindoos possessed it centuries before. Its composition, moreover, is expressly mentioned by Roger Bacon, in his treatise *De Nullitate Magiæ*. He died in 1292 or 1294. Various substitutes for gunpowder have been recently invented, such as the white gunpowder of Mr. Horsley and Dr. Ehrhardt, and gun-paper by Mr. Hochstödten. A new gunpowder by M. Newmayer, of Toya, near Leipsic, was discussed in Nov. 1866. "Pellet gun-

powder" was ordered to be used in gun-charges in the army, March, 1868. An act to amend the law concerning the making, keeping, and carriage of gunpowder, &c. was passed 28 Aug. 1860, and other acts since. See *Birmingham*, 1870. In May, 1872, a company was formed to manufacture Mr. R. Punshon's patent cotton-gunpowder, asserted to be very safe and controllable. The manufacture of the new German "brown" or "cocoa" powder, set up at Chilworth in Surrey, 1886. See *Chronoscope*.

The use of gunpowder was denounced by Ariosto, 1516; by Jean Marot, 1532; by Cervantes, 1604; termed "villanous salt-petre" by Shakspeare, about 1598.

ENGLISH WAR GUNPOWDER: 75 parts nitrate of potash (saltpetre); 10 sulphur; 15 carbon. These proportions may be slightly varied.

W. Hunter, after a careful examination of the question, in 1847, thus states the result:—"July and August, 1346, may be safely assumed to be the time when the explosive force of gunpowder was first brought to bear on the military operations of the English nation."

Hall & Co., at Plumstead, near Woolwich; 13 persons perished, and the shock was felt at 50 miles' distance, 1 Oct. 1864. Searching inquiries were made into the circumstances, and new regulations for the keeping and transmission of powder issued in November; see *Dartford*.

Mr. Gale, a blind gentleman of Plymouth, on 22 June, 1865, patented his method of rendering *gunpowder uninflammable* by combining with it finely powdered glass, which can be readily separated by a sieve when the powder is required for use. Successful public experiments were made.

Mr. Gale exhibited his process before the queen at Windsor, 10 Nov. 1865, and it was severely tested at a martello tower, near Hastings, 20 June, 1866. The attainment of perfect security was still doubtful. Gale's Protected Gunpowder Company was formed, Oct. 1865, and wound up, March, 1867.

Sir F. A. Abel, in a discourse at the Royal Institution, 31 Jan. 1890 (*Proceedings*, vol. XIII.), explained and illustrated the merits and demerits of "smokeless explosives." Smokeless gunpowder much used in the autumn manœuvres, 1890.

GUNPOWDER PLOT, for springing a mine under the houses of parliament, and destroying the king, lords, and commons—there assembled, was discovered on 4 Nov. 1605. It was projected by Robert Catesby early in 1604, and several Roman Catholics of rank were in the plot. Guy Faux was detected in the vaults under the house of lords, hired for the purpose, preparing the train for being fired on the next day. Catesby and Percy (of the family of Northumberland) were killed at Holbeach house, whither they had fled, 8 Nov.; and Guy Faux, sir Everard Digby, Rookwood, Winter, and others, were executed, 30, 31 Jan. 1606. Henry Garnet, a Jesuit, suffered as an accomplice, 3 May following. An anonymous letter sent to lord Monteagle led to the discovery. It contained the following words, "Though there be no appearance of any stir, yet I say they shall receive a terrible blow this parliament, and yet they shall not see who hurts them." The vault called Guy Faux cellar, in which the conspirators lodged the barrels of gunpowder, remained till 1825, when it was converted into offices. "What Gunpowder plot really was," an answer to Father Gerard (who expressed his belief that the story of the plot was fabricated by lord Salisbury, the minister of James I., for his own purposes), by prof. S. K. Gardiner, published, July, 1897.

GYMNASIUM, a place where the Greeks performed public exercises, and where philosophers, poets, and rhetoricians repeated their compositions. In wrestling and boxing the athletes were often naked (*gymnos*), whence the name. A London gymnastic society, formed in 1826, did not flourish. In 1862, M. Ravenstein set up another gymnastic association. The German Gymnastic Institution, in St. Pancras-road, London, was opened on 29 Jan. 1865, and a large and perfect gymnasium at Liverpool was inaugurated by lord Stanley, 6 Nov. 1865. A London athletic club existed in Nov. 1866. Since then gymnastics have been much cultivated. An international athletic congress opened in Paris, 16 June, 1894.

GYPSIES, GIPSIES, or EGYPTIANS (French, *Bohémiens ;* Italian, *Zingari ;* Spanish, *Gitanos ;* German, *Zigeuner*) ; vagrants, supposed to be descendants of low-caste Hindoos expelled by Timour, about 1399. They appeared in Germany and Italy early in the 15th century, and at Paris in 1427. In England an act was made against their itinerancy, in 1530 ; and in the reign of Charles I. thirteen persons were executed at one assizes for having associated with gypsies for about a month. The gypsy settlement at Norwood was broken up, and they were treated as vagrants, May, 1797. There were in Spain alone, previously to 1800, more than 120,000 gypsies, and many communities of them yet exist in England. Notwithstanding their intercourse with other nations, their manners, customs, visage, and appearance are almost wholly unchanged, and their pretended knowledge of futurity gives them power over the superstitious. Esther Faa was crowned queen of the gypsies at Blyth, on 18 Nov. 1860. The Bible has been translated into gypsy dialects. Gypsy parliaments are occasionally held. George Smith, king of the gypsies, Falcoln hall, Edinburgh, protested against the Movable Dwellings bill, 10 Jan. 1891. The Gypsy Lore society, founded in 1888, had 70 members in 1891, and published a journal.

GEORGE BORROW fraternised with the gypsies and wrote several works describing his adventures, especially "The Zincali" (1841) ; "The Bible in Spain" (1842) ; "Lavengro" (1850) ; and a "Dictionary of the Gypsy Language" (1874). He was born in 1803, and died in Aug. 1881.

GYROSCOPE (from *gyrere*, to revolve), the name of a rotatory apparatus invented by Fessel of Cologne (1852), and improved by professor Wheatstone and M. Foucault of Paris. It is similar in principle to the rotatory apparatus of Bohnenberger of Tübingen (born 1765, died 1831).—The gyroscope, by exhibiting the combined effects of the centrifugal and centripetal forces, and of the cessation of either, illustrates the great law of gravitation.

HABEAS CORPUS. The subjects' *Writ of Right*, passed "for the better securing the liberty of the subject," 31 Charles II. c. 2, 27 May, 1679. If any person be imprisoned by the order of any court, or of the queen herself, he may have a writ of habeas corpus, to bring him before the court of queen's bench or common pleas, which shall determine whether his committal be just. This act (founded on the old common law) is next in importance to *Magna Charta*. The *Habeas Corpus* act can be suspended by parliament for a specified time when the emergency is extreme. In such a case the nation parts with a portion of its liberty to secure its own permanent welfare, and suspected persons may then be arrested without cause or purpose being assigned. *Blackstone.*

The constitution of the United States provides that "the privilege of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it;" but does not specify the department of the government having the power of suspension. A series of contests on this subject between the legal and military authorities began in Maryland, May, 1861

In consequence of the affair of John Anderson (see *Slavery in England*, note), an act was passed in 1862, enacting that no writ of *Habeas Corpus* should issue out of England into any colony, &c., having a court with authority to grant such writ.

HAMPTON COURT PALACE (Middlesex), built by cardinal Wolsey on the site of the manor-house of the knights-hospitallers, and in 1525 presented to Henry VIII.; perhaps the most splendid offering ever made by a subject to a sovereign. Here Edward VI. was born, 12 Oct. 1537; here his mother, Jane Seymour, died, 24 Oct. following; and here Mary, Elizabeth, Charles, and others of our sovereigns resided. Much was pulled down, and the grand inner court built by William III. in 1694, when the gardens, occupying 40 acres, were laid out. The vine was planted 1769. Here was held, 14-16-18 Jan. 1604, the CONFERENCE between the Puritans and the Established church clergy, which led to a new translation of the Bible; see *Conference*. An alarming fire in apartments over the picture gallery extinguished; one woman suffocated, 14 Dec. 1882.

HANAPER OFFICE (of the court of chancery), where writs relating to the business of the subject, and their returns, were anciently kept *in hanaperio* (in a wicker hamper); and those relating to the crown, *in parva baga* (a little bag). Hence the names *Hanaper* and *Petty Bag Office*. The office was abolished in 1842.

HANAU (Hesse-Cassel), incorporated 1303. Here a division of the combined armies of Austria and Bavaria, of 30,000 men, under general Wrede, encountered the French, 70,000 strong, under Napoleon I., on their retreat from Leipsic, 30 Oct. 1813. Both armies suffered severely, but the allies most, and were compelled to retire. The county of Hanau was made a principality in 1803; seized by the French in 1806; incorporated with the duchy of Frankfort in 1809; restored to Hesse in 1813; which was annexed to Prussia in 1866.

The receipts amounted to about 33,000*l.*, from which there were deducted 18,000*l.* for expenses; of the residue (15,000*l.*), two parts accrued to the Crystal Palace Company, and one part to the Sacred Harmonic Society. Handel's harpsichord, original scores of his oratorios, and other interesting relics, were exhibited.

Hanging in chains (pirates, murderers, and others), an old custom, was abolished in 1834; see *Death.*

HANGO BAY (Finland). On 5 June, 1855, a boat commanded by lieut. Geneste left the British steamer *Cossack* with a flag of truce to land some Russian prisoners. They were fired on by a body of riflemen, and five were killed, several wounded, and the rest made prisoners. The Russian account, asserting the irregularity to have been on the side of the English, was not substantiated.

HANSARD'S DEBATES and UNION, see *Reporting*.

HANSE TOWNS. The Hanseatic league (from *hansa*, association), formed by port towns in Germany against the piracies of the Swedes and Danes: began about 1140; the league signed 1241. At first it consisted only of towns situate on the coasts of the Baltic sea, but in 1370 it was composed of sixty-six cities and forty-four confederates. The league proclaimed war against Waldemar, king of Denmark, about the year 1348, and against Eric in 1428, with forty ships and 12,000 regular troops, besides seamen. On this several princes ordered the merchants of their respective kingdoms to withdraw their effects. The Thirty years' war in Germany (1618-48) broke up the strength of the association, and in 1630 the only towns retaining the name were Lübeck, Hamburg, and Bremen. The league suffered also by the rise of the commerce of the Low Countries in the 15th century. Their privileges by treaty in England were abolished by Elizabeth in 1578.

Rodolph, count of Hapsburg, became archduke of Austria, and emperor of Germany, 1273; see *Austria*, and *Germany*.

HARLAW (Aberdeenshire), the site of a desperate indecisive battle between the earl of Mar, with the royal army, and Donald, the lord of the Isles, who aimed at independence, 24 July, 1411. This conflict was very disastrous to the nobility, some houses losing all their males.

HARLEIAN LIBRARY, containing 7000 manuscripts, besides rare printed books, collected by Robert Harley, afterwards earl of Oxford and Mortimer, 1705, *et seq.*, is now in the British Museum. A large portion of his life and wealth was spent on the collection. He died 21 May, 1724. The Harleian Miscellany, a selection from the MSS. and Tracts of his library, was published in 1744 and 1808.

HARLEIAN SOCIETY, founded in 1869 for the publication of heraldic visitations, &c.

HARLEY ADMINISTRATION, see *Oxford*.

HARLEY STREET, London, W. At No. 139, the house inhabited by Mr. Henriques, the decomposed body of a woman, stabbed in the breast and covered with chloride of lime, was found 3 June; verdict of coroner's inquest, wilful murder by person unknown, 14 June, 1880.

HARMONICA, or musical glasses (tuned by regulating the amount of water, and played by a moistened finger on the rim), were played on by Gluck in London, 23 April, 1746; "arranged" by Puckeridge and Delaval, and improved by Dr. Franklin in 1760; Mozart, Beethoven, and others composed for this instrument: see *Copophone*. "HARMONICON," an excellent musical periodical, edited by W. Ayrton, Jan. 1823—Sept. 1833.

HARMONICHORD, a keyed instrument, in which sounds are produced by friction, invented by Th. Kauffmann in 1810.

HARMONISTS, a sect, founded in Würtemberg by George and Frederick Rapp, about 1780. Not much is known of their tenets, but they held their property in common, and considered marriage a civil contract. They emigrated to America, and built New Harmony in Indiana in 1815. Robert Owen purchased this town about 1823; but failed in his scheme at establishing a "social" community and returned to England: see *Socialists*. The Harmonists removed to Pittsburg in Pennsylvania in 1822.

HARMONIUM, a keyed instrument, resembling the accordion, the tones being generated by the action of wind upon metallic reeds. The Chinese were well acquainted with the effects produced by vibrating tongues of metal. M. Biot stated, in 1810, that they were used musically by M. Grenié; and in 1827-29, free reed stops were employed in organs at Beauvais and Paris. The best known harmoniums in England are those of Alexandre and Debain, the latter claiming to be the original maker of the French instrument. In 1841, Mr. W. E. Evans, of Cheltenham, produced his English harmonium, then termed the Organ-Harmonica, and by successive improvements he produced a fine instrument, with diapason quality, and great rapidity of speech, without loss of power.

HARMONY, the combination of musical notes of different pitch, appears not to have been practised by the Greeks.

Hucbald, a Flemish monk, published combinations in his "Enchiridion Musicæ," 9th century.
Harmony greatly promoted by Palestrina, and especially by Monteverde.
Jean de Muris wrote "Ars Contrapuncti" in 14th century.
Francis of Cologne described "descant," 1600.
Beethoven greatly enlarged the range of harmonic bases.

HARNESS, chariots and the leathern dressings used for horses to draw them, are said to have been the invention of Erichthonius of Athens, who was made a constellation after his death, under the name of *Boötes* (Greek for ploughman), about 1487 B.C.

HARO, CRY OF (*Clameur de Haro*), traditionally derived from Raoul, or Rollo, of Normandy, ancestor of our Norman princes of England. Rollo administered justice so well, that injured persons uttered the cry "*Ha Rou! Ha Rou! A mon aide, mon prince, on me fait tort.*" The cry was raised in a church in Jersey in 1859.

HARP. Invented by Jubal, 3875 B.C. (*Gen.* iv. 21). David played the harp before Saul, 1063 B.C. (1 *Sam.* xvi. 23.) The Cimbri, or English Saxons, had this instrument. The celebrated Welsh harp was strung with gut; and the Irish harp, like the more ancient harps, with wire. Erard's improved harps were first patented in 1795.

One of the most ancient harps existing is that of Brian Boroimhe, monarch of Ireland: it was given by his son Donagh to pope John XVIII., together with the crown and other regalia of his father, in order to obtain absolution for the murder of his brother Teig. Adrian IV. alleged this as being one of his principal titles to the kingdom of Ireland in his bull transferring it to Henry II. This harp was given by Leo X. to Henry VIII., who presented it to the first earl of Clanricarde: it then came into possession of the family of De Burgh; next into that of MacMahon of Clenagh, county of Clare; afterwards into that of MacNamara of Limerick; and was at length deposited by the right hon. William Conyngham in the College Museum, Dublin, in 1782.

The *claviharp*, fitted like the pianoforte with a keyboard, and played like the pianoforte, was introduced into Brussels and Antwerp by Mdlle. Dratz, and played on by her at Prince's Hall, London, 13 March, 1888.

HARPER'S FERRY (Virginia), see *United States*, 1859-62.

HARPSICHORD, see *Pianoforte*, note.

HARRISON'S TIME-PIECE, made by John Harrison, of Foulby, near Pontefract. In 1714, the government offered rewards for methods of determining the longitude at sea; to obviate the irregularities in the rate of clocks by variations of temperature, Harrison invented the method of compensation, before 1720. He came to London, and produced his first time-piece in 1735; his second in 1739; his third in 1758; and his fourth, which procured him the reward of 20,000*l.* offered by the Board of longitude, a few years after. He obtained 10,000*l.* of his reward in 1764, and other sums, more than 24,000*l.* in all, for further improvements in following years. He was born, May, 1693, and died in 1776.

In the patent museum at South Kensington is an eight-day clock made by Harrison in 1715. It strikes the hour, indicates the day of the month, and with one exception (the escapement) its wheels are entirely made of wood. The clock was going in 1871.

HARROGATE (Yorkshire). The first or old spa in Knaresborough forest was discovered by capt. Slingsby in 1571: a dome was erected over the well by lord Rosslyn in 1786. Two other chalybeate springs are the Alum well and the Towit spa. The sulphureous well was discovered in 1783. The theatre was erected in 1788. The Bath hospital was erected by subscription in 1825. Population, 1881, 9,482; 1891, 13,917.

HARROW-ON-THE-HILL SCHOOL (Middlesex), founded and endowed by John Lyon in 1571. To encourage archery, the founder instituted a prize of a silver arrow to be shot for annually on the 4th of August; but the custom has been abolished. Lord Palmerston, sir R. Peel, the statesman, and lord Byron, the poet, were educated here. The school building suffered by fire, 22 Oct. 1838. The school arrangements were modified by the public schools act, 1868. Visit of the prince and princess of Wales, speech day, 7 July, 1894. Charles II. called Harrow church "the visible church." Fire, 8, 9 Feb. 1896.

HARTLEPOOL, E. Durham, an ancient seaport, said to have been burnt by the Danes, 800, fortified by the Bruces and others, and chartered by John. The foundation of West Hartlepool, with its harbour, docks, churches, &c., is due to the sagacity, skill, and energy of Mr. Ralph Ward Jackson. The work began in 1844, and the harbour was opened 1 June, 1847. The population, about 400 in 1840, was 16,993 in 1881; and 21,521 in 1891. West Hartlepool, 1881, 29,448; 1891, 42,492. Mr. R. W. Jackson, first M.P. for "The Hartlepools" in 1868-74, died 6 Aug. 1880, much honoured at home and abroad.

HARTLEY COAL MINE (Northumberland). On 16 Jan. 1862, one of the iron beams, about 20 tons weight, at the mouth of the ventilating shaft, broke and fell, destroyed the brattice, divided the shaft, and carried down sufficient timber to kill five men who were ascending the shaft, and buried alive 202 persons, men and boys. Several days elapsed before the bodies could be removed. Much sympathy was shown by the queen and the public, and about 70,000*l.* were collected for the bereaved families. The coroner's verdict asserted the necessity of two shafts to coal mines, and recommended that the beams of colliery engines should be of malleable instead of cast iron.

HARTWELL (Buckinghamshire), the retreat of Louis XVIII., king of France, 1807-14. He landed in England at Yarmouth, 6 Oct. 1807, took up his residence at Gosfield-hall, in Essex, and afterwards came to Hartwell, as the count de Lille. His consort died here in 1810. On his restoration, he embarked at Dover for France, 24 April, 1814. See *France*.

HARUSPICES, priests or soothsayers, of Etruscan origin, who foretold events from observing entrails of animals. They were introduced to Rome by Romulus (about 750 B.C.), and abolished by Constantine, A.D. 337, at which time they were seventy in number.

HARVARD COLLEGE, Cambridge (Massachusetts, North America), was founded by the general court at Boston, on 28 Oct. 1636. It derived its name from John Harvard, of Emmanuel College, Cambridge, who bequeathed to it his library and a sum of money in 1638. 250th anniversary of its foundation kept 6-8 Nov. 1886.

HARVEIAN ORATION. William Harvey bequeathed his property to the Royal College of Physicians. The annual delivery of the oration began in 1656. See under *Blood*.

HARWICH, a sea-port, Essex, a Roman station, and the Saxon Harewic; chartered by Edwd. 2nd; absorbed into Essex, 1885.

Near here Alfred defeated the Danish fleet.

Parkeston, the new port near Harwich, was constructed in 1882.

HASTINGS, a cinque-port, Sussex; said to owe its name to the Danish pirate Hastinge, who built forts here, about 893; but Mr. Kemble thinks it was the seat of a Saxon tribe named Hastingas. At Senlac, now Battle, near Hastings, more than 30,000 were slain in the conflict between Harold II. of England and William duke of Normandy, the former losing his life and kingdom, 14 Oct. 1066, his birthday. He and his two brothers were interred at Waltham abbey, Essex. The new town, St. Leonard's-on-sea, was begun in 1828. A new pier here was inaugurated by earl Granville, 5 Aug. 1872. New town-hall opened by the mayor, 7 Sept. 1881. Convalescent home and Alexandra Park opened by the prince of Wales, 26 June, 1882. Marine parade much damaged by high tide, 24 Nov. 1882. HASTINGS' TRIAL. Warren Hastings, governor-general of India, was tried by the peers of Great Britain for high crimes and misdemeanours. Among other charges was his acceptance of a present of 100,000*l.* from the nabob of Oude; see *Chunar, Treaty of.* The trial occupied 145 days, and lasted seven years and three months; commencing 13 Feb. 1788, terminating in his acquittal, 23 April, 1795. Mr. Sheridan's speech on the impeachment excited great admiration.

Hastings was born in 1732; went to India as a writer in 1750; became governor-general of Bengal in 1772; of India, 1773; governed ably, but, it is said, unscrupulously and tyrannically, till he resigned in 1785. The expenses of his trial (70,000*l.*) were paid by the East India Company; and a pension was granted to him. He died a privy-councillor in 1818.

A stamp-duty laid upon hats in 1784, and in 1796, was repealed in 1811. Silk hats began to supersede beaver about 1820.

Before the Spaniards fully conquered it, they are said to have destroyed, in battle or cold blood, three million of its inhabitants, including women and children, 1495. The island now comprises the Dominican republic (*which see*) in the east, and the republic of Hayti in the west. The population of Hayti in 1887 was about 550,000; 1894, about 1,000,000; capital, Port-au-Prince, 1894, about 34,000.

HEAD ACT, see *Ireland*, 1465.

HEALTH, General Board of, was appointed by the act for the promotion of the public health, passed in 1848. This board was reconstructed in Aug. 1854, and sir Benjamin Hall was placed at its head, with a salary of 2000*l.*; succeeded by W. F. Cowper, Aug. 1855, and by Ch. B. Adderley in 1858. In 1858 this board was incorporated into the privy council establishment; Dr. Simon being retained as medical officer. See *Hygiene*, *Hygeiopolis*, *Sanitation*, *Exhibitions*, *Public Health*, &c.

HEARTH, or Chimney, Tax, on every fire-place or hearth in England, was imposed by Charles II. in 1662, when it produced about 200,000*l.* a year. It was abolished by William and Mary at the Revolution in 1689; imposed again, and again abolished.

HEAT (called by French chemists Caloric). Little progress had been made in the study of the phenomena of heat till about 1757, when Joseph Black put forward his theory of latent heat (heat, he said, being absorbed by melting ice), and of specific heat. Cavendish, Lavoisier, and others, continued Black's researches. Sir John Leslie put forth his views on radiant heat in 1804. Count Rumford put forth the theory that heat consists in motion among the particles of matter, which view he supported by experiments on friction (recorded in 1802). This theory (now called the dynamical or mechanical theory of heat, and used to explain all the phenomena of physics and chemistry) has been further substantiated by the independent researches of Dr. J. Meyer of Heilbronn and of Mr. James P. Joule of Manchester, who assert that heat is the equivalent of work done. Mr. Joule, in his papers published 1841–2, laid the foundation of the science of thermo-dynamics, on which he worked till his death, 11 Oct. 1889. The Joule Memorial fund proposed, 30 Nov. 1889, was instituted by the Royal Society, Jan. 1890. In 1854, Sir William Thomson, of Glasgow, published his researches on the dynamical power of the sun's rays. Thermo-electricity, produced by heating pieces of copper and bismuth soldered together, was discovered by Seebeck in 1823. A powerful thermo-electric battery was constructed by Marcus of Vienna, in 1865. Professor Tyndall's "Heat, a Mode of Motion," first published Feb. 1863, third edition, 1868, sixth edition, 1880. The researches of philosophers are still devoted to this subject; see *Boiling Calorescence*. Greatest heat in the hot summer of 1868: at Nottingham, in sun, 122·4; in shade, 92·2, 22 July, 1 p.m.: 14 Aug. 1876, 95·7 in the shade; 147 in sun; 26 June, 1878, 95 in the shade.

Sir George Cayley invented a heated-air engine in 1807, and Mr. Stirling applied it to raising water in Ayrshire in 1818. One invented by Mr. Wenham was described in 1873. Improvements have been made by C. Wm. Siemens. Coal gas is generally employed.—See *Gas Engines*.

Captain John Ericsson constructed a ship, in which caloric, or heat, was the motive power. On 4 Jan. 1853, it sailed down the bay of New York, at the rate of 14 miles an hour, it is said at a cost of 80 per cent. less than steam. Although caloric engines were not successful, capt. Ericsson continued his experiments, and patented an improved engine in 1856. In 1868 he proposed condensation of the sun's rays, and their employment as a motive power; in March, 1889, he exhibited his apparatus in New York shortly before his death, aged 86.

A portable heat radiator, a small vessel containing burnt charcoal, used by the peasantry of Kashmir; adopted by lord Dundonald in his "Instra," and recommended by him for the troops (*Times*), and developed, 13 Dec. 1897.

HEBREWS; see *Jews*. The Epistle to the Hebrews ascribed to St. Paul is dated 64. The chief classic authors of all nations, except Greece, have been translated into Hebrew.

HEBRIDES (the *Ebudæ* of Ptolemy and the *Hebudes* of Pliny), western isles of Scotland, long subject to Norway; ceded to Scotland in 1264; and

HEBRON (in Palestine). Here Abraham resided, 1860 B.C.; and here David was made king of Judah, 1048 B.C. On 7 April, 1862, the prince of Wales visited the reputed cave of Machpelah, near Hebron, said to contain the remains of Abraham and his descendants.

HECATOMB, an ancient sacrifice of a hundred oxen, particularly observed by the Lacedæmonians when they possessed a hundred cities. The sacrifice was subsequently reduced to twenty-three oxen, and goats and lambs were substituted.

HECLA, MOUNT (Iceland). Its first recorded eruption is 1004. About twenty-two eruptions have taken place, according to Olasson and Paulson. Great convulsions of this mountain occurred in 1766, since when a visit to the top in summer is not attended with great difficulty. Perhaps the most awful volcanic eruption on record took place in 1784–5, when rivers were dried up, and many villages overwhelmed or destroyed. The mount was in a state of violent eruption from 2 Sept. 1845, to April, 1846. Three new craters were formed, from which pillars of fire rose to the height of 14,000 English feet. The lava formed several hills, and pieces of pumice stone and scoriæ of 2 cwt. were thrown to a distance of a league and a half; the ice and snow which had covered the mountain for centuries melted into prodigious floods.

HEGIRA, ERA OF THE, dates from the flight (Arabic *hejra*) of Mahomet, from Mecca to Medina, on the night of Thursday, 15 July, 622. The era commences on the 16th. Some compute this era from the 15th, but Cantemir proves that the 16th was the first day. 33 of its lunar years are equal to 32 of those of the vulgar era.

HEIDELBERG (Germany) was the capital of the Palatinate, 1362–1719. The protestant electoral house becoming extinct in 1693, a war ensued, in which the castle was ruined, and the elector removed his residence to Mannheim. It was annexed to Baden in 1802. Here was the celebrated tun, constructed in 1343, when it contained twenty-one pipes of wine. Another was made in 1664, which held 600 hogsheads. It was destroyed by the French in 1688; but a larger one, fabricated in 1751, which held 800 hogsheads, and was formerly kept full of the best Rhenish wine, is said to be mouldering in a damp vault, empty, since 1769. Population, 1890, 31,737.

The anniversary of the foundation of the university in 1386 was enthusiastically celebrated early in August, 1886.

HELDER POINT (Holland). The fort and the Dutch fleet lying in the Texel surrendered to the British under the duke of York and sir Ralph Abercromby, for the prince of Orange, after a conflict. 540 British were killed, 30 Aug. 1799. The place was left in Oct.; see *Bergen*.

HELENA, ST., an island in the South Atlantic Ocean, discovered by the Portuguese under Juan de Nova Castilla, on St. Helena's day, 21 May, 1502. The Dutch afterwards held it until 1600, when they were expelled by the English. The British East India Company settled here in 1651; and the island was alternately possessed by the English and Dutch until 1673, when Charles II., on 12 Dec., assigned it to the company once more. St. Helena was the place of Napoleon's captivity, 16 Oct. 1815; and here he died, 5 May, 1821. His remains were removed in 1840, and interred at the Hôtel des Invalides, Paris; see *France*, 1840. HELIOGRAPHY (from *helios*, the sun).

A system of telegraphing by mirrors flashing the rays of the sun, said to have been employed by the ancients in the time of Alexander, about 333 B.C.
A portable heliograph, invented by Mr. H. Mance, of the Persian telegraph department, was announced in 1875. It was employed in India, 1877–78; and in the Afghan and Zulu campaigns, 1879–80. See also *Photography*.

HELIOMETER, an instrument for measuring the diameters of the sun, moon, planets, and stars, invented by Savary, in 1743; applied by M. Bouguer, in 1744. A fine heliometer, by Repsold of Hamburg, was set up at the Radcliffe observatory, Oct. 1849.

HELIOPOLIS; see *Baalbec* (in Syria). The name was also given to a city in Lower Egypt (the biblical On or Bethshemesh) in the earliest known times, a chief seat of the worship of the sun. It suffered much by the Persian invasion, 525 B.C., and was in ruins in the time of Strabo, who died about A.D. 24.

HELIOSCOPE (a peculiar sort of telescope, prepared for observing the sun so as not to affect the eye), was invented by Christopher Scheiner in 1625.

HELIOSTAT, an instrument invented to make a sunbeam stationary, or apparently stationary, invented by s'Gravesande about 1719, and greatly improved by Malus and others. One constructed by MM. Foucault and Duboscq was exhibited at Paris in Oct. 1862.

HELLAS, in Thessaly, the home of the Hellenes and the Greek race, which supplanted the Pelasgians from the 15th to the 11th century B.C., derived its name from Hellen, king of Phthiotis, about 1600 B.C. The Hellenes separated into the Dorians, Æolians, Ionians, and Achaians. The present king of Greece is called "king of the *Hellenes:*" see *Greece.*

HELLENIC SOCIETY, to promote Hellenic studies, formed at a meeting, 16 June, 1879, by Mr. C. T. Newton and others. Journal published 1881, *et seq.*

HELLESPONT (now the Strait of the Dardanelles) was named after Helle, daughter of Athamas, king of Thebes, who was drowned here. According to the legendary story of the loves of Hero of Sestus, and Leander of Abydos, Leander was drowned in a tempestuous night as he was swimming across the Hellespont (about one mile), and Hero, in despair, threw herself into the sea, dated seventh century B.C. Lord Byron and lieut. Ekenhead also swam across, 3 May, 1810. See *Xerxes.*

HELL-FIRE CLUBS. Three of these associations were suppressed, 1721. They met at Somerset-house, and at houses in Westminster and in Conduit-street.

HELLHOFFITE, a new, powerful and safe explosive, composed of nitrates, &c., invented by Hellhoff and Gruson of St. Petersburg, announced August, 1885.

HELMETS, among the Romans, were provided with a vizor of grated bars, to raise above the eyes, and beaver to lower for eating; the Greek helmet was round, the Roman square. Richard I. of England wore a plain round helmet; but most of the English kings had crowns above their helmets. Alexander III. of Scotland, 1249, had a flat helmet, with a square grated vizor, and the helmet of Robert I. was surmounted by a crown, 1306. *Gwillim.*

HELOTS, *captives*, derived by some from the Greek *helein*, to take; by others from Helos, a city which the Spartans hated for refusing to pay tribute. The Spartans, it is said, ruined the city, reduced the Helots to slavery, and called all their slaves and prisoners of war *Helotæ*, 700 B.C. The number of the Helots was much enlarged by the conquest of Messenia, 668 B.C.; and is considered to have formed four-fifths of the inhabitants of Sparta. In the Peloponnesian war the Helots behaved with uncommon bravery, and were rewarded with liberty, 431 B.C.; but the sudden disappearance of 2000 manumitted slaves was attributed to Lacedæmonian treachery. *Herodotus.* The connection between the Helots and Helos, is now considered mythical.

HELVETIAN REPUBLIC. Switzerland having been conquered by the French in 1797, a republic was established April, 1798, with this title; see *Switzerland.*

HELVETII, a Celto-Germanic people, who inhabited part of what is now called Switzerland. They joined the Cimbri, were with them when the Romans were defeated near Geneva, and the consul Longinus killed, 107 B.C., and when they themselves were defeated by Marius and Catulus, 101. Invading Gaul, 61 B.C., they were defeated and massacred by Julius Cæsar, 58 B.C., near Geneva.

"Bounties were paid to encourage its cultivation in 1783; and every exertion should be made by the government and legislature to accomplish such a national good. In 1785 there were imported from Russia, in British ships, 17,695 tons of hemp and flax." *Sir John Sinclair.* The importation of hemp and flax in 1870, was 3,510,178 cwt.; in 1877, 3,502,447 cwt.; in 1879, 2,943,738 cwt.; in 1883, 3,082,109 cwt.; in 1887, 3,105,169 cwt.; in 1890, 3,777,364 cwt.; 1893, 1,665,920 cwt. The cultivation of flax was revived at the dearth of cotton during the American civil war, 1861-4.

HENOTICON (from the Greek *henotes*, unity), an edict of union for reconciling the Eutychians with the church, issued by the emperor Zeno at the instance of Acacius, patriarch of Constantinople, 482. It was zealously opposed by the popes of Rome, and was annulled by Justin I. in 518. The orthodox party triumphed, and many heretic bishops were expelled from their sees.

HEPTARCHY (or government of seven rulers) in England was gradually formed from 455, when Hengist became king of Kent. It terminated in 828, when Egbert became sole monarch of England. There were at first nine or ten Saxon kingdoms, but Middlesex soon ceased to exist, and Bernicia and Deira were generally governed by one ruler, as Northumbria: see *Britain.*

HERACLEA, see *Pandosia.*

Marks of honour were used in the first ages. *Nisbet.* The Phrygians had a sow; the Thracians, Mars; the Romans, an eagle; the Goths, a bear; the Flemings, a bull; the Saxons, a horse; and the ancient French a lion, and afterwards the fleur-de-lis (*which see*). Heraldry, as an art, is ascribed first to Charlemagne, about 800; and next to Frederick Barbarossa, about 1152; it began and grew with the feudal law. *Mackenzie.* The great English works on Heraldry are those of Barcham or Barkham, published by Gwillim (1610), Edmondson (1780), and Burke's "Armory" (1842; new ed. 1883, contains a history and the arms of above 66,000 British families, &c.). See *Blazonry*, *Crests*, and *Armorial Bearings.*

HERALDS' VISITATIONS were occasionally held in former times, at which the landed gentry were required to attend to prove their pedigrees, which were then entered in a book. The last is said to have been held in 1687. Some of the records have been printed.

A heraldic exhibition to which the queen contributed was opened in Edinburgh, July—August, 1891. The Treatise by the Rev. J. Woodward and the late G. Burnett was completed in two vols. . 1892

It was conquered by Persia, early in the 16th century; by the Afghans, in 1715; by Nadir Shah, 1731; recovered by the Afghans, 1749. The Persians, baffled in an attempt in 1838; took it 25 Oct. 1856, in violation of the treaty of 1853; and war ensued between Great Britain and Persia. Peace was made in April, 1857; and Herat was restored 27 July following. It was seized again by Dost Mahommed, 26 May, 1863; taken by Yakoob Khan, rebelling against his father, 6 May, 1871. HERCULANEUM, an ancient city of Campania, overwhelmed, together with Pompeii, by an eruption of lava from Vesuvius, 23 or 24 Aug. 79. Successive eruptions laid them still deeper under the surface, and all traces of them were lost until excavations began in 1711; and in 1713 many antiquities were found. In 1738 excavations were resumed, and works of art, monuments, and memorials of civilized life were discovered. 150 rolls of MSS. papyri were found in a chest, in 1754; and many antiquities were purchased by sir William Hamilton, and sold to the British Museum, where they are deposited; but the principal relics are preserved in the museum of Portici. The "Antichità di Ercolano," 8 vols. folio, were published by the Neapolitan government, 1757-92.

HEREDITY. The transmission of qualities of like kind of those of the parents has been specially studied by Mr. Francis Galton, F.R.S. who published "Hereditary Genius," 1869, and "Records of Family Faculties," containing tabular forms to be filled up, in order to obtain authentic data for his new science of "Eugenics." Money prizes, 5*l*. and upwards, were offered for the best records. His "Inquiries into Human Faculty" was published in 1883, and "Natural Inheritance" in 1889.

Dr. August Weismann, in his "Studies in the Theory of Descent," English translation, 1882, and in his "Essays on Heredity," &c., 1889, set forth his reasons for opposing the theory, and referred to his researches on the lowest forms of animal life, *protozoa*, &c., and to Darwin's principle of natural selection, which he considers as the only possible theory for explaining the difficulties connected with metamorphoses of species. Much controversy ensued, in which the late prof. G. J. Romanes took a leading part.

HEREFORD was made the seat of a bishopric about 676, Putta being first bishop. The cathedral was founded by a nobleman named Milfride, in honour of Ethelbert, king of the East Saxons, who was treacherously slain by his intended mother-in-law, the queen of Mercia. HERETICS (from the Greek *hairesis*, choice). Paul says, "After the way they call *heresy*, so worship I the God of my fathers," 60 (*Acts* xxiv. 14). Heresy was unknown to the Greek and Roman religions. Simon Magus is said to have broached the Gnostic heresy about 41. This was followed by the Manichees, Nestorians, Arians, &c.; see *Inquisition*. It is stated that the promulgation of laws for prosecuting heretics was begun by the emperor Frederick II. in 1220; and immediately adopted by pope Honorius III.

Epiphanius chosen bishop of Constantius in Cyprus, 367, wrote "Panarium," a discourse against heresies, died 402
Thirty heretics came from Germany to England to propagate their opinions, and were branded in the forehead, whipped, and thrust naked into the streets in the depth of winter, where, none daring to relieve them, they died of hunger and cold (*Speed*) 1160
Laws against heretics repealed, 25 Henry VIII. 1534-5

HESSE (W. Germany), the seat of the Catti, formed part of the empire of Charlemagne; from the rulers of it in his time, the present are descended. It was joined to Thuringia till about 1263, when Henry I. (son of a duke of Brabant and Sophia, daughter of the landgrave of Thuringia) became landgrave of Hesse. The most remarkable of his successors was Philip the Magnanimous (1509), an eminent warrior and energetic supporter of the Reformation, who signed the Augsburg Confession in 1530 and the League of Smalcald in 1531. At his death, in 1567, Hesse was divided into Hesse-Cassel and Hesse-Darmstadt, under his sons William and George, and their descendants played an eminent part in the convulsions of Germany during the 17th and 18th centuries.* In 1803 Hesse-Cassel became an electorate, and in 1806 Hesse-Darmstadt a grand duchy; which titles were retained in 1814. In 1807 Hesse-Cassel was incorporated with the kingdom of Westphalia, but in 1813 the electorate was re-established. Capital, Darmstadt. Population (1875), grand duchy, 884,218; (1885), 956,611; (1890), 993,659.

1821. William II.; born 28 July, 1777; died 20 Nov. 1847
1847. Frederic William; born 20 Aug. 1802.
The elector, in 1850, remodelled the constitution given in 1831 (by which the chamber had the exclusive right of voting the taxes), and did not convene the chamber until the usual time for closing the session had arrived, when his demand for money for 1851 was laid before it. The chamber called for a regular budget, that it might discuss its items. The elector dissolved the chamber, and declared his dominions in a state of siege, 7 Sept. 1850.
He fled to Hanover, and subsequently to Frankfort; and on 14 Oct. he formally applied to the Frankfort diet for assistance to re-establish his authority in Hesse. On 6 Nov. an Austro-Bavarian force of 10,000 men entered Hesse-Cassel, under the command of Prince Thurn-und-Taxis, who fixed his head-quarters in Hanau; and on the next day a Prussian force entered Cassel. The elector returned to his capital, the taxes having been collected under threats of imprisonment, 27 Dec. 1850.
The constitution of 1831 was abolished, and a new one established, 1852.

* Six thousand Hessian troops arrived in England, in consequence of an invasion being expected in 1756. The sum of 471,000*l.* three per cent. stock was transferred to the landgrave of Hesse, for Hessian auxiliaries lost in the American war, at 30*l.* per man, Nov. 1786. The Hessian soldiers were again brought to this realm at the close of the last century, and served in Ireland during the rebellion in 1798.

The conflict was soon resumed, and continued till, by law of 20 Sept. 1866, Hesse-Cassel was annexed to Prussia, 8 Oct. 1866.

HIEROGLYPHICS, literally sacred sculptures or engravings, the representation of objects to express language, used by the ancient Egyptians, Mexicans, and other nations. The Egyptians used about 1700 hieroglyphs, engraved on stone, painted on wood, and written on papyri. They were either phonetic or ideographic. Their invention is mythically ascribed to Annotes. See "Book of the Dead," in article *Death.* Young, Champollion, Rosellini, Lepsius, Brugsch, Mariette, Chabas, Birch, and others (in the present century) have much elucidated Egyptian hieroglyphics; see *Rosetta Stone.* A. Erman's "Egyptian Grammar," English translation by J. H. Breasted, published about July, 1894.

HIGH AND LOW CHURCH, sections in the Church of England became prominent in the reign of Elizabeth. High church principles were maintained by Abp. Whitgift, and set forth by Richard Hooker "the judicious" in his Ecclesiastical Polity, 1593-7. They were opposed by the Puritans. The contest, hot in the reign of Anne, has continued since. Dr. Sacheverell, preacher at St. Saviour's, Southwark, was prosecuted for two seditious sermons preached (14 Aug. and 9 Nov. 1709) to create apprehension for the safety of the church, and to excite hostility against dissenters. His friends were called High Church and his opponents Low Church, or moderate men, 1720. The queen favoured Sacheverell, and presented him with the rectory of St. Andrew's, Holborn. He died in 1724.

HIGH COMMISSION, COURT OF, an ecclesiastical court, erected by 1 Eliz. c. 1, 1559, by which all spiritual jurisdiction was vested in the crown. It originally had no power to fine or imprison; but under Charles I. and archbishop

HIGHNESS. The title of *Highness* was given to Henry VII.; and this, and sometimes *Your Grace*, was the manner of addressing Henry VIII.; but about the close of the reign of the latter, the titles of "Highness" and "Your Grace" were absorbed in that of "Majesty." Louis XIII. of France gave the title of Highness to the prince of Orange, in 1644; this prince had previously only the distinction of Excellency. Louis XIV. gave the princes of Orange the title of High and Mighty Lords, 1644. *Hénault.*

HIGH TREASON. To regulate the trials for this crime the statute, so favourable to liberty, the 25th of Edward III., 1352, was enacted, by which two living witnesses are required. By an act passed 19 April, 1821, this provision was extended to Ireland, parliament having refused to sanction the sentence of death against the duke of Somerset. In 1800 it was enacted that when the overt act was a direct attempt on the life of the sovereign, the trial should be conducted in the same manner as in the case of an indictment for murder. The trial of John Horne Tooke and others for constructive high treason failed, see *Horne Tooke*, Nov., Dec. 1794. See *Treason.*

The last two cases of execution for high treason:—

I. William Cundell *alias* Connell, and John Smith; tried on a special commission, 6 Feb. 1812, being two of fourteen British subjects taken in the enemy's service in the isles of France and Bourbon. Mr. Abbot, afterwards lord Tenterden and chief justice, and sir Vicary Gibbs, attorney-general, conducted the prosecution, and Mr. Brougham, aft. lord Brougham, defended the prisoners. The defence was, that they had assumed the French uniform to aid their escape to England. They were hanged and beheaded on the lodge of Horsemonger-lane gaol on 16 March, 1812.

All the other convicts were pardoned, upon condition of serving in colonies beyond the seas.

This event was anticipated by geologists, and through scientific precautions no loss of life ensued.

Whilst exploring the Nanga Parbat region, Mr. A. F. Mummery and 2 Gurkhas were killed by an avalanche, mid. Aug. 1895.

HISTOLOGY (from *histos*, a web), the science which treats of the tissues which enter into the formation of animals and vegetables; mainly prosecuted by the aid of the microscope. Schwann, Valentin, Kölliker, Quekett, and Robin are celebrated for their researches. Professor Quekett's "Lectures on Histology" were published in 1852 and 1854. Important "Atlas of Histology," by Drs. E. Klein and E. N. Smith, published in 1880; "Elements of Histology," by Dr. E. Klein, third edition published in 1884.

HISTORY. The Bible, the Parian Chronicle, the histories of Herodotus, "the father of history," and Ctesias, and the poems of Homer, are the foundations of early *ancient* history. Later ancient history is considered as ending with the destruction of the Roman empire in Italy, 476. *Modern* history dates from the age of Charlemagne, about 800. There was not a professorship of modern history in either of our universities until the years 1724 and 1736, when Regius professorships were established by George I. and George II. At Oxford professor E. A. Freeman, appointed 1884, died 16 March, 1892, succeeded by Mr. J. A. Froude, April, 1892; died, 20 Oct. 1894; succeeded by Mr. F. York Powell, Dec. 1894. The castle of Jerablus, a mound and ruins, 20 miles below Beredjik on the Euphrates; was visited by Henry Maundrell, 1699; by Dr. Pococke, 1745; and by J. H. Skene and Mr. Geo. Smith (died 1876), who agreed in considering the remains to be those of Carchemish, the ancient capital of the Hittites, captured and annexed by Sargon, king of Assyria (about 721 B.C.) when the nation was thoroughly subdued. The site had been held successively by Hittites, Assyrians, Babylonians, Greeks, Romans, and Arabs.

A rich harvest may be expected from its exploration.

Captain C. R. Conder's discovery of a key to the language of Hittite inscriptions on bas-reliefs, gems, &c., some of which were discovered by Burckhardt, 1808, and re-discovered by Mr. Palmer in 1870, announced 26 Feb. 1887; they consist of invocations, hymns, &c. to the sun, &c. His "Altaic Hieroglyphs and Hittite Inscriptions" published 1887.

Prof. A. Sayce, in 1879, considered the Hittites to have been in very early times the predominant power in Asia Minor and N. Syria. The investigations of Messrs. Ramsay, Hogarth and Headlam, in 1890, supported by the English Asia Minor Exploration Fund, led to many discoveries which are described in the *Times* of 25 July, 1891. HOLSTEIN AND SCHLESWIG (N.W. Germany), duchies once belonging to Denmark. The country, inhabited by Saxons, was subdued by Charlemagne in the beginning of the 9th century, and afterwards formed part of the duchy of Saxony. In 1106 or 1110, Adolphus of Schauenberg became count of Holstein: his descendants ruled till 1459, when Adolphus VII. died without issue, and the states of Holstein and Schleswig elected Christian, king of Denmark, his nephew, as their duke, through fear of his arms. In 1544, his grandson, Christian II., divided his states amongst his brothers, with the condition that the duchies should remain subject to Denmark. The eldest branch of the family reigned in Denmark till the decease of Frederick VII., 15 Nov., 1863. From a younger branch (the dukes of Holstein-Gottorp) descended through marriage, the kings of Sweden from 1751–1818, and the reigning family in Russia since 1762, when the duke, as the husband of Anne, became czar. In 1773, Catherine II. of Russia ceded Holstein-Gottorp to Denmark in exchange for Oldenburg, &c. The duchies were occupied by the Swedes in 1813, but restored to Denmark in 1814, and on 28 May, 1831, constituent assemblies were granted to them. Since 1844 disputes have been rife between the duchies and Denmark, and in 1848 the states-general of the duchies voted their annexation to the German confederacy, in which they were supported by Prussia; war ensued, which lasted till 1850, when they submitted to Denmark. The agitation in the duchies, encouraged by Prussia, revived in 1857. The Germans in Schleswig desired it to be made a member of the German confederation, like Holstein; but both duchies demanded a local government more independent of Denmark, which changes were resisted by that power. For the events of the war of 1864, see *Denmark*. By the convention signed at Gastein (*which see*), 14 Aug. 1865, the government of Holstein was left with Austria, and that of Schleswig with Prussia. The whole of Holstein and part of Schleswig were ceded to Prussia by the treaty of Prague, signed 23 Aug. 1866. Population in 1860, 1,004,473. The 5th clause, directing North Schleswig to be given to Denmark if the people voted for it, was not acted on, although claimed; and was abrogated, Feb. 1879.

HOLY ALLIANCE was ratified at Paris, 26 Sept. 1815, between the emperors of Russia (its originator) and Austria, and the king of Prussia, by which they ostensibly bound themselves, among other things, to be governed by Christian principles in all their political transactions, with a view to perpetuating the peace they had achieved. The compact was severely censured in this country as opposed to rational liberty.

HOLY MAID OF KENT. Elizabeth Barton was incited by the Roman Catholic party to oppose the Reformation by pretending to inspirations from heaven. She foretold the speedy and violent death of Henry VIII. if he divorced Catherine of Spain, and married Anne Boleyn, and direful calamities to the nation. She and her confederates were executed at Tyburn, 5 May, 1534.

HOLYOKE, Massachusetts, U.S. A Roman Catholic church here took fire; a panic ensued; and about 80 were burnt or trampled to death, 26, 27 May, 1875.

HOLY PLACES IN PALESTINE. These places have been a source of contention between the Greek and Latin churches for several centuries. In the reign of Francis I. they were placed under Latin monks, protected by the French government; but the Greeks from time to time obtained firmans from the Porte invalidating the rights of the Latins, who were at last (in 1757) expelled from the sacred buildings, which were committed to the care of the Greeks by a hatti-scheriff, or imperial ordinance.

The holy sepulchre partially destroyed by fire and rebuilt by the Greeks, who claim additional privileges, and cause fresh dissensions . . . 1808
The Russian and French governments sent envoys (M. Dashkoff and M. Marcellus) to adjust the dispute; an arrangement prevented by the Greek revolution 1821
The subject again agitated, and the Porte proposed that a mixed commission should adjudicate on the rival claims. M. Titoff, the Russian envoy, acting on behalf of the Greeks, and M. Lavalette, the French envoy, on that of the Latins, took up the question very warmly 1850
A firman issued by the Porte, confirming and consolidating the rights previously granted to the Greek Christians, and declaring that the Latins had no right to claim exclusive possession of certain holy places specified, but permitting them to possess a key of the church at Bethlehem, &c., as in former times . . . . . 9 March, 1852
The French government acquiesced with much dissatisfaction; but the Russian envoy still desired the key to be withheld from the Latin monks. M. D'Ozeroff made a formal declaration of the right of Russia to protect the orthodox in virtue of the treaty of Kainardji in 1774, and demanded that the firman of 9 March, 1852, should be read at Jerusalem, although it militated against his pretensions, which was accordingly done. The dispute still continued, the Porte being exposed to the attacks of both the Russian and French governments . . . . . March, 1853
Prince Menschikoff arrives at Constantinople as envoy extraordinary, and in addition to the claims respecting the holy places, made demands respecting the protection of the Greek Christians in Turkey which led to the war of 1854-6. (See *Russo-Turkish War*) . . . . . 28 Feb. ,,

HOLY ROMAN EMPIRE. The German empire received this title under the emperor Otho I. the great, crowned at Rome by pope John XII., 2 Feb. 962. See *Rome*, and *Germany.*

HOLY ROOD or CROSS. A festival instituted on account of the recovery of a large piece of the cross by the emperor Heraclius, after it had been taken away, on the plundering of Jerusalem, about 615. The feast of the invention (or finding) of the Cross is on 3 May; that of the exaltation of the Cross, 14 Sept. At Boxley abbey, in Kent, was a crucifix, called the *Rood of Grace;* at the dissolution it was broken in pieces as an imposture by Hilsey, bishop of Rochester, at St. Paul's cross, London, 1536.

HOLYROOD PALACE (Edinburgh), formerly an abbey, was for several centuries the residence of the monarchs of Scotland. The abbey, of which some vestiges remain, was founded by David I. in 1128, and in the burial-place within its walls are interred several of his successors. The palace is a large quadrangular edifice of hewn stone, with a court within surrounded by piazzas. In the north-west tower is the bed-chamber which was occupied by queen Mary; and from an adjoining cabinet to it David Rizzio, her favourite, was dragged forth and murdered, 9 March, 1566. The north-west towers were built by James V., and the remaining part of the palace was added during the reign of Charles II. Mr. Pinkerton states that the palace was burnt in 1650, and rebuilt in 1659. Great improvements were made in 1857. The queen held her court here, 30 Aug. 1850.

HOLY SEPULCHRE, a Byzantine church in modern Jerusalem. Fergusson, Robinson, and others, consider the true site of the holy sepulchre to be the mosque of Omar, the "dome of the Rock." The question is still undecided. The order of the Holy Sepulchre was founded by Godfrey of Bouillon, 1099; revived by pope Alexander VI. 1496; re-organised, 1847 and 1868.

HOME SECRETARY, see *Secretaries*, and all the administrations under the name of their premier. New Home Office, Westminster, occupied 6 Aug. 1875.

"HOME, SWEET HOME." The words are attributed to John Howard Payne, an American actor, who died in 1852; the music is said to be Sicilian, but it is probably by sir Henry Bishop, who introduced the song into Clari, or the Maid of Milan, in 1823.

HOMER'S ILIAD AND ODYSSEY, the earliest and most perfect epic poems in the world. The first begins with the wrath of Achilles, and ends with the funeral of Hector; the second recounts the voyages and adventures of Odusses or Ulysses, after the destruction of Troy. Various dates are assigned to these works, from 962 to 915 B.C.

F. A. Wolf, in his Prolegomena, in 1795, argued that the Homeric poems were composed of independent epic songs, collected and arranged by Peisistratus about 550 B.C. This theory occasioned much controversy between scholars and poets; Mr. Andrew Lang, in "Homer and the Epic," vigorously defends "the one author theory," March, 1893.

The first English version of the Iliad, by Arthur Hall, appeared in 1581. The present text is attributed to the time of Pericles, who died B.C. 429. The most celebrated versions of Homer's works are Chapman's, 1616; Hobbes', 1675; Pope's, 1715-25; Cowper's, 1791. The translation of the Iliad by the earl of Derby (1864) is much commended.

HOMICIDE is said to have been tried at Athens by the Areopagites. Among the Jews, wilful murder was capital; but for chance-medley the offender was to flee to one of the cities of refuge, and there continue till the death of the high-priest, 1451 B.C. (*Num.* xxxv.). 9 Geo. IV. c. 31 (1828), distinguishes between justifiable homicide and homicide in its various degrees of guilt, and circumstances of provocation and wilfulness; see *Murder*.

Animals have been tried and punished for killing human beings. A bull was hanged for homicide near the abbey of Beauprès . . . May, 1499

HOMILDON HILL (Northumberland), where the Scots, headed by the earl of Douglas, were defeated by the Percies (among them Hotspur), 14 Sept. 1402. Douglas and the earls of Angus, Murray, Orkney, and the earl of Fife, son of the duke of Albany, and nephew of the Scottish king, with many of the nobility and gentry, were taken prisoners.

HOMILIES in early Christian times were discourses delivered by the bishop or presbyter, in a homely manner, for the common people. Charlemagne's "Homilarium" was issued 809. The Book of Homilies drawn up by abp. Cranmer, and published 1547, and another prepared by an order of convocation, 1563, were ordered to be read in those churches that had not a minister able to compose proper discourses.

HOMŒOPATHY, a hypothesis promulgated in his "Organon of Medicine," 1810, and in other works, by Dr. Samuel Hahnemann, of Leipsic (died 2 July, 1843), according to which every medicine has a specific power of inducing a certain diseased state of the system (*similia similibus curantur*, likes are cured by likes); and if such medicine be given to a person suffering under the disease which it has a tendency to induce, such disease disappears, because two similar diseased actions cannot simultaneously subsist in the same organ. *Brande*. Infinitesimal doses of medicine, such as the millionth of a grain of aloes, have been employed, it is said, with efficacy. The system requires the patient to regulate his diet and habits carefully. It has led to a more accurate study of the materia medica. Introduced into England, 1827. The Hahnemann hospital was opened in Bloomsbury-square, 16 Sept. 1850. "The World's Convention of Homœopathic Physicians" opened at Philadelphia, 26 June, 1876, London School of Homœopathy, founded 15 Dec. 1876. Congress, Liverpool, 14 Sept. 1877; Southport, 22 Sept. 1892; London, 3 June, 1898. Fifth quinquennial international congress at

Queen's hall London, 4 Aug, 1896. Under the heading *Odium Medicum*, many controversial letters from allopaths and homœopaths appeared in the *Times*, Jan. 1888.

HOMOUSION AND HOMOIOUSION (*Greek*, same essence, and similar essence or being), terms employed with respect to the nature of the Father and the Son in the Trinity. The orthodox party adopted the former term as a party cry at the council of Nice, 325; the Arians adopted the latter at Seleucia, 359.

HOPS are said to have been introduced into England from Flanders in the early part of the 16th century, and to have been much cultivated in Kent by Reginald Scot in the 16th century. In the year ending 5 Jan. 1853, there were 46,157⅜ acres under hops in England and Wales, chiefly in Herefordshire, Kent, and Worcestershire, which paid 447,144*l.* duty; the quantity yielded was 51,102,494 lbs., whereof 955,855 lbs. were exported; average acreage in England, 59,833, 1885–96. HORN BOOKS used in education in England from early times to the 18th century, were tablets on which were inscribed the alphabet, the nine digits, etc., protected by a thin plate of transparent horn. Great variety of forms, now very rare. Four were exhibited at the Caxton exhibition, 1877, and nine at the loan exhibition of the Horner's company, 1882. Mr. Andrew Tuer's handsome and exhaustive "History of the Horn

book," dedicated to the queen by command, was published, May, 1896.

HORN; HORNPIPE. The horn is thought to be, next to the reed, the earliest wind instrument, and has been found among most savage nations. It was first made of horn, hence the name; afterwards of brass, with keys, for the semi-tones, in the last century.—The dance called the Hornpipe is supposed to be so named from its having been performed to the Welsh *pib-corn*, that is hornpipe, about 1300. *Spencer.* Many hornpipes were composed in the 18th century. The "College hornpipe" was very popular.

HORSE. The people of Thessaly were excellent equestrians, and probably first among the Greeks who broke them in for service in war; whence probably arose the fable that Thessaly was originally inhabited by centaurs. "Solomon had 40,000 stalls of horses for his chariots, and 12,000 horsemen," 1014 B.C. 1 *Kings* iv. 26. The Greeks and Romans had some covering to secure their horses' hoofs from injury. "The Horse," by W. Youatt, new edition, 1880. See *Races and Carriages*, 1896.

British horses. Their great strength is described by Julius Cæsar about 54 B.C. Henry VIII. established a royal stud, and enacted laws to promote the breed of strong horses in certain shires, hence the term *shire horses;* these afterwards became draught or cart horses.

The horse-tax was imposed in 1784. Its operation was extended, and its amount increased, in 1796; and again in 1808. The existing duty upon "horses for riding" only, in England, amounts to about 350,000*l.* per year 1862

Horse-shoeing is very ancient. It is represented on a coin of Tarentum, S. Italy, probably about 300 B.C. HOUR. The early Egyptians divided the day and night each into twelve hours, a custom adopted by Jews or Greeks probably from the Babylonians. The day is said to have been first divided into hours from 293 B.C., when L. Papirius Cursor erected a sun-dial in the temple of Quirinus at Rome. Previously to the invention of water-clocks (*which see*) 158 B.C., the time was called at Rome by public criers. In England, the measurement of time was, in early days, uncertain; one expedient was by wax candles, three inches burning an hour, and six wax candles burning twenty-four hours, said to have been invented by Alfred, A.D 886; see *Day.* For *Hours of Prayer*, *Horæ*, see *Breviary.* The *Hour*, daily conservative newspaper, first appeared, 24 March, 1873; last time, 11 Aug. 1876.

HOUSEHOLD SUFFRAGE, after one year's residence, was introduced into parliamentary elections for boroughs, by the reform act passed 15 Aug. 1867. Attempts have been frequently made to extend household suffrage to counties, and have failed; Mr. (afterwards sir) G. O. Trevelyan's proposal lost in the commons (287 to 173), 13 May, 1874; (268 to 166), 7 July, 1875; (264 to 165), 30 May, 1876; (276 to 220), 29 June, 1877; (271 to 219), 22-23 Feb. 1878; (291 to 226), 4 March, 1879. Thomas, the 10th duke, was beheaded for conspiracy against queen Elizabeth on behalf of Mary, queen of Scots, in 1572. HUDSON'S BAY, discovered by Sebastian Cabot, 1512, and re-discovered by captain Henry Hudson, when in search of a north-west passage to the Pacific Ocean, 1610, had been visited by Frobisher. The "governor and company of adventurers of England trading to Hudson's Bay," obtained a charter from Charles II. in 1670. The "fertile belt" was settled by lord Selkirk in 1812. For these territories the bishopric of Rupert's Land was founded, 1849. The charter having expired, the chief part of the company's territories, on the proposition of earl Granville, the colonial secretary (9 March, 1869), were transferred to the Dominion of Canada for 300,000*l.*, and a right to claim a certain portion of land within fifty years, and other privileges; the company having consented to this, 9 April, 1869. A portion of the people resisted the annexation, and gen. Louis Riel proclaimed independence and seized the company's treasury, Jan. 1870. On 3 or 4 March he tried and shot Thomas Scott, a Canadian, who had escaped from his custody. Col. (afterwards lord) Wolseley conducted a Canadian expedition to the territories (now named Manitoba), and issued a proclamation to the loyal inhabitants, 23 July, saying "our mission is one of peace." Riel was unsupported and offered no resistance. The lieut.-governor, Adams George Archibald, arrived 3 Sept. The Company had a large sale of furs in 1888. Annual meetings are held (1893). Formerly, the *hundred* was bound to make good all loss occasioned by the robberies therein committed, unless the felon were taken; but by subsequent laws it is made answerable only for damage committed by riotous assemblies. The pursuit of a felon was aided by a description of him in the *Hue and Cry*, a gazette established for advertising felons in 1710. *Ashe.*

HUGUENOT SOCIETY of London, established by sir H. Austen Layard and other descendants of Huguenots, about 15 April, 1885. The society publishes historical works, 1888.

HUGUENOTS, a term (derived by some from the German *Eidgenossen*, confederates; by others from Hugues, a Genevese Calvinist) applied to the Reformed party in France, followers of Calvin. They took up arms against their persecutors in 1561. After a delusive edict of toleration, a great number were massacred at Vassy, 1 March, 1562, when the civil wars began, which lasted with some intermission till the edict of Nantes in 1598 (revoked in 1685). The massacre of St. Bartholomew's day, 24 Aug. 1572, occurred during a truce; see *Calvinists*, *Protestants*, *Bartholomew*, *Edict*, and *Camisard*. S. Smiles's "History of the Huguenots," appeared in 1867. The crypt in Canterbury cathedral, assigned to French protestants in 1550, is still used by them for divine worship.

On the 19th, Caxias, the Brazilian general, stormed a work to the north of Humaitá, and captured many stores. Humaitá itself, after a severe siege, was abandoned, 24 July, 1868.

HUMANE SOCIETY, ROYAL (London), for the recovery of persons apparently drowned, was founded in 1774, by Drs. Goldsmith, Heberden, Towers, Lettsom, Hawes, and Cogan, but principally by the last three. The society has above 280 depôts supplied with apparatus. The principal one was erected in 1794, on a spot of ground given by George III. on the north side of the Serpentine river, Hyde-park. HUNDRED, a Danish institution, was a part of a shire, so called, as is supposed, from its having been composed of a hundred families, at the time the counties were originally divided, about 897. The hundred-court is a court-baron held for all the inhabitants of a hundred instead of a manor.

HUNDRED YEARS' WAR, in French history, commenced with the English invasion in 1337.

HUNGARY, part of the ancient Pannonia and Dacia, was subjected to the Romans about 106, and retained by them till the 3rd century, when it was seized by the Goths, who were expelled about 376 by the Huns. See *Huns*, and *Attila*. After Attila's death, in 453, the Gepidæ, and in 500 the Lombards held the country. It was acquired by the Avars about 568, and retained by them till their destruction by Charlemagne in 799. About 890 the country was settled by a Scythian tribe, named Vingours or Ungri (whence the German name *Ungarn*) and the Magyars of Finnish origin. The chief of the latter, Arpad (889), was the ancestor of a line of kings (*see below*). The progress of the Magyars westward was checked by their defeat by the emperor Henry the Fowler, 934. HUSSITES. After the death of Huss,* many of his followers took up arms, in 1419, and formed a political party under John Ziska, and built the city of Tabor. He defeated the emperor Sigismond, 11 July, 1420, and a short truce followed. Ziska, blinded at the siege of Rabi, beat all the armies sent against him. He died of the plague, 18 Oct. 1424, and is said to have ordered a drum to be made of his skin to terrify his enemies even after death. Two Hussite generals, named Procopius, defeated the imperialists in 1431; and a temporary peace ensued. Divisions took place among the Hussites, and on 30 May, 1434, they were defeated, and Procopius the elder slain at Bömischbrod or Lippau. Toleration was granted by the treaty of Iglau, and Sigismond entered Prague 23 Aug. 1436. The Hussites opposed his successor, Albert of Austria, and called Casimir of Poland to the throne; but were defeated in 1438. A portion of the Hussites existed in the time of Luther, and were called "Bohemian brethren."

HUSTINGS (said to be derived from *house court*, an assembly among the Anglo-Saxons), an ancient court of London, being its supreme court of judicature, as the court of common council is of legislature. The court of *hustyngs* was granted to the city of London, to be holden and kept weekly, by Edward the Confessor, 1052. One was held to outlaw defaulters, Guildhall, London, 6 Dec. 1870; others in 1882 and 7 July, 1896. Above 4,000 wills are on the roll of the court, commencing with the 43rd year of king Henry III. Winchester, Lincoln, York, &c., were also granted hustings courts.

HUTCHINSONIANS included many eminent clergy, who did not form any sect, but held the opinions of John Hutchinson, of Yorkshire (1674-1737); they rejected the Newtonian system, and contended that the scriptures contain a complete system of natural philosophy. His work, "*Moses' Principia*," was published in 1724. He derived all things from the air, whence, he said, proceeded fire, light, and spirit, types of the Trinity. In 1712 he invented a time-piece for finding the longitude. He died in 1737.

He presented himself accordingly, but was thrown into prison, and after some months' confinement was adjudged to be burned alive, which he endured with resignation, 6 or 7 July, 1415. Jerome of Prague, his intimate friend, who came to this council to support and second him, also suffered death by fire, 30 May, 1416, although he also had a safe-conduct.

HYDRAULIC PRESS, see under *Hydrostatics*.

HYDROCHLORIC ACID or **CHLORHYDRIC ACID**, the only known compound of chlorine and hydrogen, was discovered by Dr. Priestley, 1772; its constitution determined by Davy, 1810. It is also called muriatic acid and spirit of salt; see under *Alkalies*.

HYDROGEN (from *hydōr*, water). Paracelsus observed a gas rise from a solution of iron in oil of vitriol, about 1500; Turquet de Mayerne discovered its inflammability, 1656; as did Boyle, 1672; Lemery noticed its detonating power, 1700. In 1766 Cavendish proved it to be an elementary body; and in 1781, he and Watt first showed that in the combination of this gas with oxygen, which takes place when it is burnt, water is produced; subsequently Lavoisier decomposed water into its elements, and gave hydrogen its present name instead of "inflammable air." One volume of oxygen combines with two volumes of hydrogen to form water. Hydrogen is never found in the free state.

In 1877, Cailletet and Wroblewski obtained by rapid expansion of the compressed gas, a condensation or mist, which was supposed to be produced by the liquefaction of hydrogen. Olszewski had seen a few drops of an unknown liquid falling in a glass tube and remaining for a few instants unevaporated, subsequently proved to be due to impurities. Prof. Dewar's paper on "The Density of Hydrogen in Palladium," was published in 1873; "The Absorption of Hydrogen by Palladium at high temperatures, pressures, etc.," was published in 1897. On 10 May, 1898, at the Royal Institution, he produced half a wine-glassful of liquefied hydrogen at 240 deg. centigrade (below zero) in 5 min., and on the 12th he doubled the quantity. On the 12th he reported it to the Royal Society, and on the 16th to the French Academy. By means of this liquid he also liquefied helium . . 10 May 1898

HYDROGENIUM, a hypothetical metal. In a paper read before the Royal Society, 7 Jan. 1869, Mr. Thomas Graham, master of the Mint, suggested that a piece of the metal palladium, into which hydrogen had been pressed, became an "alloy of the volatile metal hydrogenium."

HYDROGRAPH, an apparatus invented by capt. Neale, for transmitting sound by water, for the purpose of signalling between ships, lighthouses, &c.; it consists of a transmitter, a receiver, and electric recorder; experiments were made on the Solent under the auspices of the Trinity Board.—*Times*, 19 Oct. 1893.

HYDROGRAPHY is the description of the surface waters of the earth. The first sea-chart is attributed to Henry the Navigator, in the 16th century. There is a hydrographic department in the British admiralty, by which a series of charts has been issued.

HYDROMETER, the instrument by which is measured the gravity, density, and other properties of liquids. The oldest mention of the hydrometer occurs in the 5th century, and may be found in the letters of Synesius to Hypatia; but it is not improbable that Archimedes was the inventor of it, though no proofs of it are to be found. *Beckmann.* Archimedes was killed in 212 B.C., and

Hypatia was torn to pieces at Alexandria, A.D. 415. "Hypatia," by the rev. Charles Kingsley, appeared in 1853. Robert Boyle described a hydrometer in 1675: Baumé's (1762) and Sykes', about 1818, have been much employed. Modifications of the apparatus have been invented.

HYDROPATHY, a term applied to the treatment of diseases by cold water, practised by Hippocrates in the 4th century B.C., by the Arabs in the 10th century A.D., and revived by Dr. Currie in 1797. A system was suggested in 1825 by Vincenz Priessnitz, of Grafenberg, in Austrian Silesia. The rational part of the doctrine was understood and maintained by Dr. Sydenham, before 1689. Priessnitz died 26 Nov. 1851.

HYDROPHOBIA, in man, rabies in animals, M. Pasteur announced his discovery of a method of checking this disease, analogous to vaccination, the system afterwards applied to various diseases.

He operates on monkeys and other animals successfully, May, on dogs, Aug. 1884; on 40 persons 14 Dec. 1885. An international hospital, afterwards termed the Pasteur institute, founded (40,000*l.* subscribed) May, 1886; opened by president Carnot, 14 Nov. 1888. Out of 726 cases treated, 4 deaths reported 12 April, 1886; 1673 persons treated, 1 May, 1888, to 1 May, 1889. The principle much opposed 1886–7. A British commission for inquiry (sir James Paget, Dr. Burdon Sanderson, and others) appointed 12 April, 1886; visits Paris, and reports confidence in M. Pasteur's treatment, 27 June, 1887. M. Pasteur proposes and verifies other applications of his principles, 1887–8. The book, "M. Pasteur, Histoire d'un Savant," was published in 1883; and an English translation by lady Claud Hamilton in . 1885

HYMNS. The song of Moses is the most ancient, 1491 B.C. (*Exod.* xv.) The Psalms date from about 1060 B.C. to about 444 B.C. (from David to Ezra). The hymns of the Jews were frequently accompanied by instrumental music. Paul (A.D. 64) speaks of Christians admonishing one another "in psalms and hymns and spiritual songs" (*Col.* iii. 16.) The composition of hymns for the Christian church is very ancient. The hymns of Dr. Watts (died 1784), of John Wesley (died 1791), and of his brother Charles (died 1788), are used by English churchmen and dissenters. Minor surgical operations have, it is said, been performed without pain on persons in this state. The lecture by R. Heidenhain, at Breslau 19 Jan. 1880, on "Hypnotism or Animal Magnetism" was translated by L. C. Wooldridge; and published in 1888. See *Mesmerism—Trials* (Addenda) 1898.

"The use of hypnotical suggestion" (the entire concentration of the mind on one subject caused by the suggestion of another person) in medical practice, has been advocated by Bernheim, Beaunis and other foreign physicians, Oct. 1889; but strongly opposed by other eminent physiologists, especially Du Bois Reymond . In 1841 there were sixteen companies in Boston, U.S., engaged in exporting ice, brought from Wenham lake and Fresh and Spy Ponds, about 18 miles from that city. The trade was begun by Mr. Tudor in 1806. 156,540 tons were sent from Boston alone in 1854. In New York, in 1855, 305,000 tons were stored up, of which 20,000 were for exportation. ICONOCLASTS (image-breakers). The controversy respecting images (which had been introduced into churches for popular instruction about 300) was begun about 726, and occasioned much disturbance and loss of life in the Eastern Empire. Leo Isauricus published two edicts for demolishing images in churches in that year, and enforced them with great rigour in 736. The defenders of images were again persecuted in 752 and 761, when Constantine forbade his subjects becoming monks. The worship of images was restored by Irene in 780. This schism was the occasion of the second council of Nice, 787. Theophilus banished all the painters and statuaries from the Eastern Empire, 832. The Iconoclasts were finally excommunicated at the 8th general council at Constantinople, 869-870. This controversy led to the separation of the Greek

and Latin churches. Many images in churches were destroyed in Scotland and the Netherlands in the 16th century, and in England during the Reformation and the civil war, 1641-8.

In the other months the 8th Ide fell on the 6th, and the first on the 13th. On the Idus of March (the 15th) 44 B.C., Julius Cæsar was assassinated.

ILLUMINATED BOOKS. The practice of adopting ornaments, drawings, and emblematical figures, and even portraits, to enrich MSS., is of great antiquity. Varro wrote the lives of 700 illustrious Romans, which he embellished with their portraits, about 70 B.C. *Plin. Nat. Hist.* Some beautiful missals and other works were printed in the 15th and 16th centuries *et seq.*, and fine imitations have lately appeared.

The ceremony was closed by a benediction from the archbishop of Canterbury.
The royal procession proceeded from Buckingham palace to the institute, both sides of the route being lined by military and a vast concourse of

people of all ranks. Among the military engaged during the day were contingents from Canada, Australia and India.
The beautiful key used by the queen in opening the institute was composed of gold and other metals brought from the colonies, and was made by Messrs. Chubb. All the arrangements of the day were successful.

IMPERIALISM. The word was much used in 1878, to signify that which related to the welfare of the British empire as a whole, in contradistinction to that of Great Britain itself or any other separate part of the empire.

IMPOSTORS. The following are among the most extraordinary:—

Aldebert, a Gaul, in 743, pretended he had a letter from the Redeemer, which fell from heaven at Jerusalem; he seduced multitudes to follow him into woods and forests, and to live in imitation of John the Baptist. He was condemned by a council at Rome in 745.
Gonzalvo Martin, a Spaniard, pretended to be the angel Michael in 1359: he was burnt by the inquisition in Spain in 1360.
George David, son of a waterman at Ghent, styled himself the son of God, sent into the world to adopt children worthy of heaven: he denied the resurrection, preached in favour of a community of women, and taught that the body only could be defiled by sin; he had many followers; died at Basle, 1556, promising to rise again in three years.
Otrefief, a monk, pretended to be Demetrius the son of Ivan, czar of Muscovy, whom the usurper Boris had put to death; he maintained that another child had been substituted in his place: he was supported by Poland; his success led the Russians to invite him to the throne, and deliver into his hands, Feodor, the reigning czar, and all his family: his imposition discovered, he was assassinated in his palace, 1606.
Sabbata Levi, a Jew of Smyrna, amused the Jews and Turks a long time at Constantinople and other places, by personating our Saviour, 1666.
Joseph Smith, see *Mormonites*.
Apparition of our Lady of Salette; the imposture exposed and several persons prosecuted, April, 1846. The superstition revived and flourishing, Aug. 1872.
Pilgrimage of about 20,000 persons to Lourdes, in the Pyrenees, on account of alleged miracles (the virgin was said to have appeared to two girls, 11 Feb. 1858), 6 Oct. 1872; see *France*.
Insurrection of the Mahdi, see *Soudan* 1881 *et seq.*
An adventurer, who named himself "Comte Blanco," and "prince Louis Marie Cèsar of Bourbon, grandson of Ferdinand VII. of Spain," was recognised at Paris in 1869 by queen Isabella and others. Detected by a photographer as his son-in-law. Supported by a rich English widow. Kept a small court at Jurangon near Pau, as a king. Deposed and expelled by the police. He afterwards went to Holland and England, and died in London.

IN BRITISH HISTORY.

A man pretending to be the Messiah, and a woman assuming to be the Virgin Mary, were burnt, 1222.
Jack Cade assumed the name of Mortimer; see *Cade*, 1450.
In 1487, Lambert Simnel, tutored by Richard Simon, a priest, supported by the duke of Burgundy, personated the earl of Warwick. Simnel's army was defeated by Henry VII., and he was made a scullion in the king's kitchen.
For Warbeck's imposture in 1492, see *Warbeck*.
Elizabeth Barton, styled the Holy Maid of Kent, spirited up to hinder the Reformation by pretending to inspirations from heaven, foretelling that the king would have an early and violent death if he divorced Catherine of Spain and married Anne Boleyn. She and her confederates were executed at Tyburn, 21 April, 1534.
In 1553 (first year of Mary's reign, after her marriage with Philip of Spain), Elizabeth Croft, a girl 18 years of age, was secreted in a wall, and with a whistle made for the purpose, uttered many seditious speeches against the queen and the prince, and also against the mass and confession, for which she did penance.
William Hacket, a fanatic, personated our Saviour, and was executed for blasphemy, 1591.
Valentine Greatrix, an Irish impostor, who pretended to cure all diseases by stroking the patient: his imposture deceived the credulous, and occasioned very warm disputes in Ireland and England about 1666. Boyle and Flamsteed believed in him.
Dr. Titus Oates, see *Oates*.
Robert Young, a prisoner in Newgate, forged the hands of the earls of Marlborough, Salisbury, and other nobility, to a pretended association for restoring king James: the lords were imprisoned, but the imposture being detected, Young was fined 1000*l.*, and put in the pillory, 1692. He was afterwards hanged for coining.
Three French refugees pretend to be prophets, and raise tumults; convicted as impostors, Nov. 1707.
Mary Tofts of Godalming, by pretending she bred rabbits within her, so imposed upon many persons (among others, Mr. St. Andre, surgeon to the king), that they espoused her cause, 1726.
The Cock-lane ghost impostures by William Parsons, his wife, and daughter, 1762; see *Cock-lane Ghost*.
Johanna Southcote, who proclaimed her conception of the Messiah, and had a multitude of followers; she died 27 Dec. 1814.

IMPRESSIONISTES, a name given to artists who aim at producing rapid unstudied effects independent of the canons of art, such as Manet, Duez, and others in France. In England Mr. Whistler exhibited such pictures in 1877, including moonlight scenes, &c., painted in two days, showing great sense of colour. For Mr. Ruskin's criticisms see *Trials*, 1878. The Impressionistes are also characterized as illustrators of their own times by pure art; MM. Manet, Durand, Ruel, Degas, and Renoir, are French examples; they exhibited in London in June, 1882 and since, especially in April, 1889.

IMPRESSMENT OF SEAMEN, affirmed by sir M. Foster to be of ancient practice. The stat. 2 Rich. II. speaks of impressment as a matter well known, 1378. The first commission for it was issued 29 Edw. III. 1355. Pressing, either for the sea or land service, declared to be illegal by the parliament, Dec. 1641, but practised till present times. Impressment was not resorted to in the Russian war, 1854-5.

IMPRISONMENT FOR DEBT, see *Arrests*, *Debtors*, and *Ferrars' Arrest*.

IMPROPRIATION (applying ecclesiastical property to lay purposes). On the suppression of abbeys in 1539, their incomes from the great tithes were distributed among his courtiers by Henry VIII.; and their successors constitute 7597 lay impropriators.

INCOME TAX. In 1512, parliament granted a subsidy of two-fifteenths from the commons, and two-tenths from the clergy, to enable the king to enter on a war with France. In Dec. 1798, Mr. Pitt proposed and carried, amid great opposition, resolutions for increased taxes "as an aid for the prosecution of the war" with France.

Graduated duties on income imposed, beginning with 60*l.* per annum, by the act passed 9 Jan. 1799.

Increased to 6½ per cent. 1805; 10 per cent., embracing the dividends at the bank, 1806.

It produced about 5,350,000*l.* a-year; and led to repeal of about 12,000,000*l.* indirect taxes.

Renewed for three years, 1845; and 1848.

Large meetings assembled in Trafalgar-square, London (for the ostensible purpose of opposing the income tax); rioting ensued, which was soon quelled, 6, 7 March, 1848.

The tax of 7*d.* limited to seven years (till 1860); to be gradually reduced in amount; but all incomes from 100*l.* to 150*l.* made liable to 5*d.* in the pound for all that period: the tax also extended to Ireland, June, 1853.

The assessment on incomes raised—on those above 100*l.* to 7*d.*; on those above 150*l.* to 10*d.*

INDEMNITY BILL, by which the minister of the crown or the government is relieved from the responsibility of measures adopted in extreme and urgent cases, without the previous sanction of parliament. One was passed 19 April, 1801; another to indemnify ministers against their acts during the suspension of the *Habeas Corpus* act, was carried in the commons (principal divisions, 190 to 64); and in the lords (93 to 27), 10 March, 1818. In 1848 and 1857, bills of indemnity were passed for the suspension of the Bank Charter act by the ministry; see *Oblivion*. An *indemnity bill* is passed at the end of every session of parliament for persons who transgress through ignorance of the law. The practice began in 1715.

Ibsen's "Romershölm" was performed 23 Feb., and his "Ghosts" 13 March, 1891. Other performances were given at the private theatre in the club-house erected on the site of Evans' hotel, Covent Garden, 22 May, 1891 *et seq.* An English version of Zola's "Thérèse Raquin" given at the Royalty, 9 Oct. 1891. INDEPENDENTS or CONGREGATIONALISTS, hold that each church or congregation is independent of all others in religious matters; that there is no absolute occasion for synods or councils, whose resolutions may be taken for advice, but not as decisions to be peremptorily obeyed; and that one church may advise or reprove another, but has no authority to excommunicate. Robert Brown preached these doctrines about 1585, but, after 32 imprisonments, he eventually conformed to the established church. A church was formed in London in 1593, when there were 20,000 independents. They were driven by persecution to Holland, where they formed several churches; that at Leyden was under Mr. Robinson, often regarded as the author of Independency. In 1616 Henry Jacobs returned to England and founded a meeting-house. Cromwell, himself an independent, obtained them toleration, in opposition to the Presbyterians. The independents published an epitome of their faith, drawn up at a conference at the Savoy, in 1658; and the congregational union of England and Wales formed in 1831, published their "de-

claration of faith, order, and discipline," in 1833. In 1851 they had 3244 chapels for 1,067,760 persons in England and Wales; total for United Kingdom, 4,919 churches; 3,112 ministers, 22 Dec. 1897. INDEXES OF PROHIBITED BOOKS. The Index by which the reading of the Scriptures was forbidden (with certain exceptions) to the laity, was confirmed by a bull of pope Clement VIII. in 1595.

The council of Nice (325) forbade magical books.
Pope Paul IV., 1555, began the "Index" published by Pius IV., 1559. The Talmud and heretical books were especially prohibited, causing much dissatisfaction. The Inquisition was engaged in the work, which was organized by the Council of Trent. The Congregation of the Index was instituted and rules laid down.
The Indexes are—1. *Prohibitorius*, of books absolutely forbidden to be read; 2. *Expurgatorius*, of books not to be licensed till purged from error.
Many of the works of the great authors of France, Spain, Germany, and England, are thus prohibited. On 25 June, 1864, Hugo's "Les Misérables" and other books were added to the number, and many others since.

INDEX SOCIETY, established by the librarians of various London scientific and literary institutions and societies, and literary men, to form a library of indexes, and to make indexes to rare serial works, important books, &c. 17 Dec. 1877.

* On the introduction of the improved (Enfield) musket in the Indian army, greased cartridges had been brought from England. These were objected to by the native soldiers, and the issue of them was immediately discontinued by orders in Jan. 1857. A mutinous spirit however gradually arose in the Bengal native army. In March several regiments were disbanded, followed by others, till in June the army had lost by disbandment and desertion, about 30,000 men. On 5 April, a sepoy, and on 20 April, a jemadar, or native lieutenant, were executed. At the end of May 34 regiments were lost. In April, 85 of the 3rd Bengal native cavalry at Meerut refused to use their cartridges. On 9 May they were committed to gaol. On Sunday, the 10th, a mutiny in the native troops broke out; they fired on their officers, killing col. Finnis and others. They then released their comrades, massacred many Europeans, and fired the public buildings. The European troops rallied and drove them from their cantonments. The mutineers then fled to Delhi (*which see*).
